How do you fix your troubled adolescent? After years of working as an in-home therapist and probation officer, author William Glover grew frustrated with the conventional wisdom that said medication and/or therapy offered the only hope for angry, defiant, unmotivated, ADHD, ADD, oppositional, defiant, drug involved, juvenile court involved, and behaviorally handicapped kids. Based on his work with adolescents and their parents, he became convinced that the solution for the majority of troubled kids resided not with the professionals, but with the parents of these children. With this as a starting point, Glover began developing "The Adolescent Owner's Manual," a unique and effective resource designed to provide parents with the practical, common-sense tools and skills essential to parenting troubled adolescents.

Integrated Pitchfork Analysis: Basic to Intermediate Level is an introductory text to the branch of Technical Analysis which uses the Andrews' pitchfork trading technique. Designed for traders with no experience of Pitchfork Analysis this book demonstrates how to analyse the markets and trade using pitchfork analysis, assisting the novice trader in achieving a consistent performance. Written by experienced trader, Dr Mircea Dologa, founder of www.pitchforktrader.com, the book begins by introducing and discussing the basic theory of pitchfork trading, providing a description of the technique, how to analyse the charts and how to make a decision based on that analysis. It then moves on to the more practical aspects about the low risk high-probability trade from its inception to its termination. Crucially expert guidance on money management and risk management techniques - when to get in, when to get out and where to locate the initial or trailing stops is also provided. Ultimately Integrated Pitchfork Analysis: Basic to Intermediate Level will teach you how to trade, how to follow the markets and how to consistently make money. Reviews "Dr. Mircea Dologa picks up where Dr. Alan Andrews left off in his breakthrough studies of "pitchfork" pattern analysis. In his new book, the author has taken the interpretation and application of "pitchfork" patterns to an entirely new level. After studying Dr. Dologa's well written and very well illustrated book I will never look at a chart the same way again. What Dr. Dologa has done with "pitchforks" is absolutely amazing. You've got to read it to believe it. Pitchforks patterns can provide so much practical and useful information that you will be referring to this book over and over. The book ends on a high note with an excellent chapter on Case Studies and Money Management. Traders will want to keep this powerful book handy for frequent reference. Highly recommended." Chuck LeBeau, Director of Quantitative Analysis for SmartStops.net and co-author of Computer Analysis of the Futures Market, noted trader, lecturer and trading systems developer. "Dr. Mircea Dologa's book, Integrated Pitchfork Analysis, combines the breadth of evolving theory with the depth of experience acquired from years of practical application, leaving almost no stone unturned in an exploration of the Pitchfork and its application to profitable short-term trading. Many of Dr. Dologa's ideas are truly innovative, reflecting his understanding of human nature. It would be difficult to find a more complete coverage of Pitchfork trading. It is a mine of (literally) valuable information." Tony Plummer, Director, Helmsman Economics Ltd. "It has indeed been a privilege for me to have access to Dr Mircea Dologa's amazing analysis which I consider to be an extremely important contribution to Technical Analysis. His development of Integrated Pitchfork Analysis in synergy with existing state-of-the-art trading tools resulting in an easy to use professional edge technique, has not been previously utilized. This undoubtedly increases the improvement of trading accuracy, leading to enhanced confidence with greater profitability for both trading and investing. This book is truly a remarkable achievement in the field of Technical Analysis and Dr. Dologa, like myself, is motivated to educate traders and investors on the wonderful world of Technical Analysis and how it can help them in these volatile markets. I believe Dr. Dologa will join the true Market Masters of the 21st Century." Dawn Bolton-Smith, Founder-Member of the Australian Technical Analysis Association, Senior Technical Analyst, Educator & Writer. "Dr.Mircea Dologa has masterfully defined and delineated the Median Line procedure that is central to Pitchfork Analysis and trading. His basic and intermediate theory and practice is a definitive work in this important realm of technical market analysis." Professor Oliver Henry Pruden, Professor of Business Administration and Executive Director of the Institute for technical Market Analysis, Golden Gate University, San Francisco, USA.

Radio astronomy is a mystery to the majority of amateur astronomers, yet it is the best subject to turn to when desirous of an expanded knowledge of the sky. This guide intends to instruct complete newcomers to radio astronomy, and provides help for the first steps on the road towards the study of this fascinating subject. In addition to a history of the science behind the pursuit, directions are included for four easy-to-build projects, based around long-term NASA and Stanford Solar Center projects. The first three projects constitute self-contained units available as kits, so there is no need to hunt around for parts. The fourth - more advanced - project encourages readers to do their own research and track down items. Getting Started in Radio Astronomy provides an overall introduction to listening in on the radio spectrum. With details of equipment that really works, a list of suppliers, lists of online help forums, and written by someone who has actually built and operated the tools described, this book contains everything the newcomer to radio astronomy needs to get going.

The Owner's Manual to the Voice demystifies the voice, enabling singers and all voice professionals - whether actors, broadcasters, teachers, preachers, lawyers, public speakers- to communicate intelligently with physicians and understand dangers, treatments, vocal hygiene and medical procedures.

Development Skills and Concepts through Educational Technology Skills are involved in construing the meaning of symbols used for conveying the conceptual content. These skills fall under broad categories namely literacy, numeracy and graphicacy. Literacy includes understanding terminology and explanations using words. Numeracy includes understanding mathematical notations for communication using numbers. Teacher knowledge of appropriate performance strategies for a learning activity is also required for guiding different work. For example, the teacher needs to know why and when to ask students to reconsider their choice of the numerical scale while plotting a graph. To gradually develop this skill, graphs involving one nominal variable, e.g., months of the year, have been found as good starting points for facilitating students to focus on numerical issues along a single dimension. Technology in education is most simply and comfortably defined as an array of tools that might prove helpful in advancing student learning and may be measured in how and why individuals behave. Educational Technology relies on a broad definition of the word "technology." Technology can refer to material objects of use to humanity, such as machines or hardware, but it can also encompass broader themes, including systems, methods of organization, and techniques. Hope this book will be useful to students as a reference book and will be a priced collection for their own library. Contents: • Distance Education and Curriculum Technology • Attitude of Experimentation • Information Technology and Agriculture • Use the Internet to Teach Information Literacy • Manage Classroom Using Technology • Confidence-Based Learning, Sleep-Learning, Over-Learning, Observational Learning, Cooperative Learning and Operant Conditioning • Government Investment in Educational Technology, Methodology, Research and Development • Higher Education in Science and Engineering: An American Perspective on Educational Technology • Use of Distance Education in Non-formal Education: An Indian Perspective on Research in Distance Education
