Andy Warhol's explosive Pop Art and sharp commentary on advertising and celebrity culture are renowned and deeply relevant even decades after their creation. Though Warhol himself could be a polarizing figure both personally and professionally, there is no doubt that he was today, as a result, his works regularly fetch astronomical prices. Eric Shiner, Warhol expert and former Andy Warhol Museum director, curates the 100 quintessential, unique works that define the evolution of this illustrious artist, tracing Warhol's dynamic career from the late 1950s to the 1990s, creating a stunning compendium whose pieces, due to their rarity, value, and prestige as part of a museum or other collection, could simply never all be acquired by a single collector.

An expert communicator, Jack McAfgan writes the memoirs of his four-legged life as a mixed-breed Afghan Hound. From obedience and agility training to hospice work, Jack and his master learn their lessons side by side, inevitably applying what they have learned as their own life and after death. He reminds us that the way we think can change the course of our lives. This story will touch everyone who has ever loved. It matters not if they have four legs or two. Jack leads us to a higher love as he expands our tolerance and compassion for all of humanity.

the earth, every human on the planet, every spirit in the universe and most of all, to the bona fide Master over all.

Remembering the Past, Changing the Future

Reimagining Museums for Climate Action

This treatise on Engineering Materials and Metallurgy contains comprehensive treatment of the matter in simple, lucid and direct language and envelopes a large number of figures which reinforce the text in the most efficient and effective way. The book comprises five chapters (excluding basic concepts) in all and fully and exhaustively covers the syllabus in the above mentioned subject of 4th Semester Mechanical, Production, Automobile Engineering and 2nd semester Mechanical disciplines of Anna University.

This book is found as a public domain and free book based on various online catalogs, if you think there are any problems regard copyright issues please contact us immediately via DMCA@publicdomain.org.uk.

Satoru Iwata was the global president and CEO of Nintendo and a gifted programmer who played a key role in the creation of many of the world's best-known games. He led the production of innovative platforms such as the Nintendo DS and the Wii, and laid the groundwork for the development of the wildly successful Pokémon Go game and the Nintendo Switch. Known for his analytical and imaginative mind, but even more for his humility and people-first approach to leadership, Satoru Iwata was beloved by game fans and developers worldwide. In this motivational collection, Satoru Iwata addresses diverse subjects such as locating bottlenecks, how success breeds resistance to change, and why programmers should never say no. Drawn from the "Iwata Asks" series of interviews with key contributors to Nintendo games and hardware, and featuring conversations with renowned Mario franchise creator Shigeru Miyamoto and creator of EarthBound Shigesato Itoi, Ask Iwata offers game fans and business leaders an insight into the leadership, development, and design philosophies of one of the most beloved figures in gaming history. -- VIZ Media

Creating and Digitizing Language Corpora

Toward Resilience: A Guide to Disaster Risk Reduction and Climate Change Adaptation is an introductory resource for development and humanitarian practitioners working with populations at risk of disasters and other impacts of climate change.

A range of electronic corpora has become accessible via the WWW and CD-ROM. This coincides with improvements in standards governing the collecting, encoding and archiving of such data. This book develops similar standards for enriching and preserving 'unconventional' data': the fragmentary texts and voices left to us as accidents of history.

"A small place always needs a guy willing to do the stuff no one else will do, and well, I am that guy. My name is Jake Rutledge and I am a handyman." This is a story about a drifter handyman, a flag-burning scientist, weaponized weather, and what happens when a guy just wants to make a little money for coffee and a plate of eggs.

Forty very short stories that reimagine the genre of crime writing from some of today's most imaginative and thrilling writers "An intriguing take on crime/noir writing, this collection of 40 very short stories by leading and emerging literary voices—Amelia Gray, Brian Evenson, Elizabeth Hand, Carmen Maria Machado, Benjamin Percy, Laura van den Berg and more—investigates crimes both real and imagined. Despite their diminutive size, these tales promise to pack a punch." —Chicago Tribune, 1 of 25 Hot Books for Summer Tiny Crimes gathers leading and emerging literary voices to tell tales of villainy and intrigue in only a few hundred words. From the most hard-boiled of noirs to the coziest of mysteries, with diminutive double crosses, miniature murders, and crimes both real and imagined, Tiny Crimes rounds up all the usual suspects, and some unusual suspects, too. With illustrations by Wesley Allsbrook and flash fiction by Carmen Maria Machado, Benjamin Percy, Amelia Gray, Adam Sternbergh, Yuri Herrera, Julia Elliott, Elizabeth Hand, Brian Evenson, Charles Yu, Laura van den Berg, and more, Tiny Crimes scours the underbelly of modern life to expose the criminal, the illegal, and the depraved.

The Anti-Counterfeiting Trade Agreement (ACTA) is the most important effort undertaken to lay down a plurilateral legal framework for the enforcement of intellectual property rights. With the view to learn more about the origins of this treaty, the process leading to its conclusion and its implications for law making in this field, the ACTA and the Plurilateral Enforcement Agenda: Genesis and Aftermath analyses in great depth both the context and the content of the agreements. In order to attain this objective, a large and diverse group of experts - renowned scholars, policy makers, civil society and industry actors - who represent different perspectives on the necessary balance between intellectual property enforcement and other economic and social interests have been gathered together. This book is the most comprehensive analysis of ACTA, and of its relation with ongoing initiatives to improve enforcement of intellectual property and norms pertaining to a range of international legal regimes, conducted so far.

This book is not a typical academic edited volume. Nor does it subscribe to the usual dictates of an exhibition catalogue. It does not seek to provide a comprehensive overview of work on climate change and museums or claim to have discovered One Quick Trick to Solve the Climate Emergency. Instead, the book reflects the main characteristics of the Reimagining Museums for Climate Action project: it is collaborative, distributed, conversational, subversive, nomadic and, at times, playful. The arguments it puts forward emerge through dialogue and speculation just as much as they respond to and build on empirical research. In this sense, the book is perhaps best seen as a partial and in many ways still evolving artefact of the Reimagining Museums project. It can be read from cover-to-cover, or its varied contents can be traversed in a less rigid fashion. It is one "output" among many, and its main aim is to prompt further transdisciplinary alliances, rather than set out a particular position or manifesto. To this end, the book invites peripatetic readings and strange deviations. It is anchored by eight concepts that reflect the diversity and creativity of museums, but it is also motivated by a desire to (re)situate this field within a broader set of debates on the roots of social and environmental injustice, and the role of museums in these histories.

Within this 333-page guidebook, you will find the knowledge and practical steps upon implementation can help one achieve a natural state of abundance and experience conscious expansion. While other books focus on the "the secret" of the law of attraction, you will learn that there is far more available to you than material possessions and societal status. Inside these pages are revealed tools readily available to you that you may not even be aware of. This book is organized around the Mind, Body, and Spirit—the three spheres of being that need to operate in equilibrium for true knowledge of self, accelerated self betterment and the manifestation of desire. Written from a state of enlightenment reached only after deep meditation and facing life's many hardships, this guidebook presents full details of the metaphysical aspects of the mind and thoughts, the ego and self-identification, presence and creation, mindfulness, the anatomy of fear, chakra energy systems and healing, exercise and well-being, mineral-supplemented diets, along with the benefits of juicing, detoxing, clean eating, and living on a plant-based diet.

While the memorialization of slavery has generated an impressive number of publications, relatively few studies deal with this subject from a transnational, transdisciplinary and transracial standpoint. As a historical phenomenon that crossed borders and traversed national communities and ethnic groups producing alliances that did not overlap with received identities, slavery as well as its memory call for comparative investigations that may bring to light aspects obscured by the predominant visibility of US-American and British narratives of the past. This study addresses the memory of slavery from a transnational perspective. It brings into dialogue texts and practices from the transatlantic world, offering comparative analyses which interlace the variety of memories emerging in diverse national contexts and fields of study and shed light on the ways local counter-memories have interacted with and responded to hegemonic narratives of slavery. The inclusion of Brazil and the French, English, and Spanish Caribbean alongside the United States and Europe, and the variety of investigative approaches-ranging from cinema, popular culture and visual culture studies to anthropology and literary studies-expand the current understanding of the slave past and how it is reimagined today. This fascinating book brings freshness to the topic by considering objects of investigation which have so far remained marginal in the academic debate, such as heroic memorials, civic landscape, white family sagas, Young Adult literature of slavery, Latin American telenovelas and filmic narrations within and beyond Hollywood. What emerges is a multifarious set of memories, which keep changing according to generation, race, gender, nation and political urgency and indicate the advancing of a dynamic, mobilized memorialization of slavery willing to move beyond mourning towards a more militant stand for justice. This is an important book for those interested in African American, American, and Latin American studies and working across literature, cinema, visual arts, and public culture. It will also be useful to public official and civil servants interested in the question of slavery and its present memory.

"This title was first published in 2000: John Ruskin's three-volume "The Stones of Venice" (1851-3) remains massively influential in art and architecture. To mark the centenary of Ruskin's death, this illustrated guide links Ruskin's descriptions of individual buildings with a photograph of the architecture and sculpture as it is today. Much of Ruskin's prose is reproduced, together with many of his drawings and watercolours and a number of 19th-century engravings. Sarah Quill's photographs identify the details described by Ruskin and show the extent to which the city's architecture has survived, or changed, since first publication of "The Stones of Venice". The opening chapter provides an introduction to Ruskin's involvement with Venice and to the periods and styles of Venetian architecture."—Provided by publisher.

Creating Places for Urban Agriculture

Carrot City is a collection of ideas, both conceptual and realized, that use design to enable sustainable food production, helping to reintroduce urban agriculture to our cities. Focusing on the need and desire to grow food within the city to supply food from local sources, the contributions of architecture, landscape design, and urban design are explored. Forty projects demonstrate how the production of food can lead to visually striking and artistically interesting solutions that create community and provide inhabitants with immediate access to fresh, healthful ingredients. The authors show how city planning and architecture that considers food production as a fundamental requirement of design result in more community gardens, greenhouses tucked under raised highways, edible landscapes in front yards in place of resource-devouring lawns, living walls that bring greenery into dense city blocks, and productive green roofs on schools and large apartment blocks that can be tended and harvested by students and residents alike.

This collection is packed with 20 easy-to-make recipes that rely on little more than chicken and pantry staples. You'll learn how a few flavor-packed ingredients can transform humble chicken into the star of the dinner table. Take our spice-cabinet chicken recipes, which will simplify your grocery shopping—just raid your spice cabinet for three delicious takes on roast whole chicken. Or how about Southern-Style Stewed Chicken and Rice, a comforting one-pot meal that features rice plumped with flavored stock and tossed with tender pieces of shredded chicken? Chicken Mole Poblano surprisingly depends on pantry essentials such as dried chiles, nuts, a handful of common dried herbs and spices, and a bit of chocolate for its deeply complex flavor.

Keep track of your appointments, special days, and holidays. Over 475 fun pictures and words to highlight holidays and happenings month by month throughout the year. Perfect for any calendar, journal, or bullet journal

Each set fits in the back pockets of Peter Pauper Press engagement calendars and journals. Each package (including hangtag) measures 4" wide x 7-1/2" high (10 cm wide x 19.3 cm high) .

The Disinformation Guide to Secrets and Lies

Nocturnelle Journal

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

The New York Times bestseller—"a rollicking account" (The Kansas City Star) of the infamous baseball game between the Yankees and Royals in which a game-winning home run was overturned and set off one of sports history's most absurd and entertaining controversies. On July 24, 1983, during the finale of a heated four-game series between the dynastic New York Yankees and small-town Kansas City Royals, umpires nullified a go-ahead home run based on an obscure rule, when Yankees manager Billy Martin pointed out an illegal amount of pine tar—the sticky substance used for a better grip—on Royals third baseman George Brett's bat. Brett wildly charged out of the dugout and chaos ensued. The call temporarily cost the Royals the game, but the decision was eventually overturned, resulting in a resumption of the game several weeks later that created its own hysteria. The game was a watershed moment, marking a change in the sport, where benign cheating tactics like spitballs, Superball bats, and a couple extra inches of tar on an ash bat, gave way to era of soaring salaries, labor strikes, and rampant use of performance-enhancing drugs. In The Pine Tar Game acclaimed sports writer Filip Bondy paints a portrait of the Yankees and Royals of that era, replete with bad actors, phenomenal athletes, and plenty of yelling. Players and club officials, like Brett, Goose Gossage, Willie Randolph, Ron Guidry, Sparky Lyle, David Cone, and John Schuerholz, offer fresh commentary on the events and their take on the subsequent postseason rivalry. "A sticky moment milked for all its nutty, head-shaking glory" (Sports Illustrated), The Pine Tar Game examines a more innocent time in professional sports, and the shifting tide that resulted in today's modern iteration of baseball. Some watchers of the Royals' 2015 World Series win over New York's "other baseball team," the Mets, may see it as sweet revenge for a bygone era of talent flow and umpire calls favoring New York.

Paperblanks Nocturnelle journal, a reproduction of an antique French binding, is based on a cover designed in 1829 by publishers A. & W. Galignani for The Poetical Works of Thomas Moore. This notebook cover suggests the fine Moroccan leather, structural sturdiness, careful finishing and ridged spine preferred for bindings of that era
