books offer
little help by
focusing on
management for
sales and

environment. The books usually deal with the business problems whereas the medical care system is a bureaucracy and should be understood as such. In this book, the author refocuses traditional

management information in the form of material which will be of use to the medical community. There is no discussion of sales, markets, profit and loss, etc. in the traditional sense. Each

discussion has been based on medical and hospital procedure and the activity of the health care system. The book looks closely on topics such as standards, controls, and feedback because these are
