This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

In this up-close and personal look at the heroines who make family, community, and society tick, Miriam Ching Yoon Louie showcases immigrant women workers speaking out for themselves, in their own words. While public outrage over sweatshops builds in intensity, this book shows us who these workers really are and how they are leading campaigns to fight for their rights. In-depth, accessible analyses of the immigration, labor, and trade policies, which together have forced these women into the most dangerous, poorly paid jobs, dovetail with vivid portraits of the women themselves. Louie, a longtime writer/activist and well-known figure in feminist, immigrant, and labor circles, is uniquely poised to make her case: that the labor of immigrant women worker-activists not only sustains families and communities, but the vibrant social activism that undergirds democracy itself. With chapters on successful campaigns against Levi-Strauss, Donna Karan, and restaurants in Los Angeles; Koreatown, among others. Miriam Ching Yoon Louie is a longtime writer/activist in campaigns to organize women of color. She is national campaign media director of Fuerza Unida, a board member of the Women of Color Resource Center, and former media director of Asian Immigrant Women Advocates. Her essays and articles on immigrant women and labor issues have been widely anthologized, including in the 1997 collection *Dragon Ladies: Asian American Feminists Breathe Fire* (South End Press) and she speaks at public events internationally. She is the co-author, with Linda Burnham, of *Women's Education in the Global Economy* (Women of Color Resource Center, 2000).

Reproductive technologies, says Thompson, are part of the increasing tendency to turn social problems into biomedical questions and can be used as a lens to see the resulting changes in the relations between science and society."--BOOK JACKET.

Sports medicine and sports science are relatively new and rapidly developing fields of knowledge. During the past 2 decades, a significant body of scientific knowledge has been published in these areas. However, there is a demand for practical references which address sports medicine and science in the context of different sports. This demand is higher in some sports including combat sports, which are highly physically and mentally demanding, and cause challenging issues such as risk of blood-borne infections, weight reduction, head injuries, stress management, and safety for women and children.

This book has been developed to meet the needs of the practitioners who work with combat sports athletes in order to improve their health and performance. Combat sports include four Olympic sports (boxing, wrestling, judo, and taekwondo) and other popular sports such as karate, kick boxing, and Wushu. These sports are popular in most countries of the world, both at competitive and recreational levels. Combat sports are practiced by people of different ages for a variety of reasons such as to gain fitness and health benefits and to learn self-defense.

After-school programs, scout groups, community service activities, religious youth groups, and other community-based activities have long been thought to play a key role in the lives of adolescents. But what do we know about the role of such programs for today's adolescents? Community Programs to Promote Youth Development explores these questions, focusing on essential elements of adolescent well-being and healthy development. It offers recommendations for policy, practice, and research to ensure that programs are well designed to meet young people's developmental needs. Recognizing the importance of adolescence as a period of transition to adulthood, Community Programs to Promote Youth Development offers authoritative guidance to policy makers, practitioners, researchers, and other key stakeholders on the role of youth development programs to promote the healthy development and well-being of the nation's youth.

**5 STAR DOODY'S REVIEW! "This is an extraordinarily thorough, useful book. It manages to summarize numerous topics, many of which are not a part of a traditional medical curriculum, in concise, relevant chapters. Physicians who do not understand the dynamics behind the doctor-patient relationship usually end up being poor doctors, and this book reviews the many behavioral issues that patients have that can affect this relationship. This is a very welcome addition to the medical education literature, and should be required reading for all practicing clinicians."--Doody's Review Service Behavioral Medicine delivers practical coverage of behavioral and interactional issues that occur between provider and patient in everyday clinical practice. You will learn how to deliver bad news, how to conduct an effective patient interview, how to clinically manage behavioral issues in the dying patient, the principles of medical professionalism, behavioral issues in men's and women's health, and much more. **Asian American Women: Issues, Concerns, and Responsive Human and Civil Rights Advocacy reveals the struggles of Asian American women at the bottom of the socio-economic ladder where hunger, illness, homelessness, sweatshop labor, exposure to hazardous chemicals and even involuntary servitude are everyday realities. Asian American women of all socio-economic classes suffer from domestic violence whose root causes stem from the particular forms of patriarchy that exist in Asian cultures. Their health and lives are endangered due to prevalent but wrong stereotypes about Asian women. The model minority myth hides the appalling level of human and civil rights violations against Asian American women. The lack of research or the lumping together of the over 24 subgroups of Asian Americans into a homogeneous whole misleads the public as to the extent of injustices inflicted on Asian American women. The book captures their suffering and also the fighting spirit of Asian American women who have waged social and economic justice campaigns**

Seven million youngsters--one in four adolescents--have only limited potential for becoming productive adults because they are at high risk for encountering serious problems at home, in school, or in their communities. This is one of the disturbing findings in this unique overview of what is known about young people aged 10 to 17 growing up in the United States today. The book explores four problem areas that are the subject of a great deal of public interest and social concern: delinquency, substance abuse, teen pregnancy, and school failure. In examining these problem areas, Dryfoos has three objectives: to present a more cogent picture of adolescents who are at risk of problem behaviors and where they fit in society; to synthesize the experience of programs that have been successful in changing various aspects of these behaviors; and to propose strategies for using this knowledge base to implement more effective approaches to helping youngsters succeed. Among the key concepts emerging from this study are the importance of intense individual attention, social skills training, exposure to the world of work, and packaging components in broad, community-wide interventions. Schools are recognized as the focal institution in prevention, not only in regard to helping children achieve academically, but in giving young people access to social support and health programs. The author also proposes comprehensive youth development initiatives at the local, state and national level, based on programs shown to be effective in real practice. This landmark, state-of-the-art study represents an indispensable resource for anyone interested in the welfare and current problems of youth, including psychologists, sociologists, school administrators, state and federal officials, policymakers, and concerned parents.

This book highlights concepts of professionalism in medicine such as ethical issues and both clinical and non-clinical challenges in patient care.
