

Al Di L Dellarea Di Rigore

This richly illustrated volume presents the remarkable results of the Italian Archaeological Mission's investigations at the site of the walled town of Barāqish in interior Yemen, ancient Yathill of the Sabaeans and Minaeans, between 1986 and 2007.

Bringing together the scientific contributions of a wide panel of Sicilian and mainland Italian specialists in prehistory, this book focuses on the Saccia region and its landscape which is extraordinarily rich in natural geological phenomena and associated archaeological activity. Archeologica Data wants to reach an Italian and international audience of scholars, professionals, students, and, more generally, early-career archaeologists, and it accepts contributions written both in Italian and English. Archeologica Data proposes to indissolubly associate data and interpretation. It embraces that global idea of archaeological data that integrates all the discipline declinations without any thematic or chronological constraints. Data is at the centre, and around lies everything that can stem from it: interpretations, hypotheses, reconstructions, applications, theoretical and methodological reflections, critical ideas, constructive discussions.

Merging cultures across North Africa

This volume is dedicated to the Archaeological Mission in Cyrenaica, starting with the reports and researches of the seasons from 2006 to 2008. The emphasis of the publication is to present archaeological data to form part of an archive of finds, sites and monuments: a resource and reference point for archaeologists from Libya and elsewhere.

This contributed volume is a collection of international writings on dance, human rights, and social justice in the 20th and 21st centuries. The book illuminates and analyzes dance in contexts of oppression and its subversion, as well as in situations promoting access to dance, and those encouraging healing from human rights abuses through movement.

Origins of a new economic union (7th-12th centuries). Preliminary results of the nEU-Med project: October 2015-March 2017

The nEU-Med project is part of the Horizon 2020 programme, in the ERC Advanced project category. It began in October 2015 and will be concluded in October 2020. The University of Siena is the host institution of the project. The project is focussed upon two Tuscan riverine corridors leading from the Gulf of Follonica in the Tyrrhenian Sea to the Colline Metallifere. It aims to document and analyze the form and timeframe of economic growth in this part of the Mediterranean, which took place between the 7th and the 12thc. Central to this is an understanding of the processes of change in human settlements, in the natural and farming landscapes in relation to the exploitation of resources, and in the implementation of differing political strategies. This volume brings together the research presented at the first nEU-Med workshop, held in Siena on 11-12 April, 2017. The aim of the workshop was to draw up an initial survey of research and related work on the project, one and a half years after its inception. The project is composed of several research units. Each unit covers an aspect of the interdisciplinary research underpinning the nEU-Med project, each with their own methodology. For this first volume of results, it was decided not to give an account of all the work carried out within all the units, but to select those lines of investigation which, at the end of the first year and a half, have made it possible to articulate and develop an interdisciplinary research strategy.

Profili giuridici ed economici del bilancio d'esercizio delle società di capitali (corporations) operanti negli Stati Uniti d'America. Vengono delineate le norme federali e statali applicabili, i principali principi contabili

U.S. Gaap, e le problematiche che si riscontrano tra le società quotate (public company) e società non quotate. Inoltre viene trattato il bilancio d'esercizio, nell'Unione Indiana, la Rep. Popolare Cinese e la Svizzera. Legal and economic profile of the financial statements about the corporations operating in the United States of America . This book outline the applicable federal and state Acts, Statutes and regulations, the main US GAAP accounting standards, and the problems that exist between the listed companies (public company) and non-listed companies . Also it is outlined the financial statements in the Indian Union, in the Popular Rep. of China and Switzerland.

The nEU-Med project: Vetricella, an Early Medieval royal property on Tuscany's Mediterranean

The papers of this volume focus on the sacred landscapes of ancient Sicily. Religious and cultural dimensions of Greek sanctuaries are assessed in light of the results of recent excavations and new readings of literary sources. The material dimension of cult practices in ancient sanctuaries is the central issue of all contributions, with a focus on the findings from ancient Akragas. Great attention is also paid to past ritual activities, which are framed in three complementary areas of enquiry. Firstly, the architectural setting of sanctuaries is examined beyond temple buildings to assess the wider context of their structural and spatial complexity. Secondly, the material culture of votive deposition and religious feasting is analysed in terms of performative characteristics and through the lens of anthropological approaches. Thirdly, the significance of gender in cultic practice is investigated in light of the fresh data retrieved from the field. The new findings presented in this volume contribute to close the existing research gaps in the study of sanctuaries in Sicily, as well as the wider practice of Greek religion.

The nEU-Med project is part of the Horizon 2020 programme, in the ERC Advanced project category. It began in October 2015 and the University of Siena is the host institution of the project. The project is focussed upon two Tuscan riverine corridors leading from the Gulf of Follonica in the Tyrrhenian Sea to the Colline Metallifere. It aims to document and analyze the form and timeframe of economic growth in this part of the Mediterranean, which took place between the 7th and the 12thc. Central to this is an understanding of the processes of change in human settlements, in the natural and farming landscapes in relation to the

exploitation of resources, and in the implementation of differing political strategies. This volume presents the multi-disciplinary research focussed upon the key site of the project, Vettricella, and its territory. Vettricella is thought to be the site of Valli, a royal property in the Tuscan march. It is the only Early Medieval property to be extensively studied in Italy. Located on Italy ' s Tyrrhenian coast, the archaeology and history of this site provide new insights on estate management, metal production and wider Mediterranean relations in the later first millennium. Apart from reports on the archaeology, the finds from excavations and environmental studies, three essays consider the wider European historical and archaeological context of Vettricella. Future monographs will feature studies by members of the project team on aspects of Vettricella, its finds and territory.

Papers in Italian Archaeology VII: The Archaeology of Death

This volume is the first of the series Corollaria Crustumina aimed at the publication of conference proceedings, doctoral theses and specialist studies on the Latin settlement of Crustumerium (Rome). It contains multidisciplinary papers of an international group of archaeologists discussing new fieldwork data on Crustumerium's settlement, cemeteries and material culture in light of the site's cultural identity.

Conference proceedings

Il volume 30 di «Archeologia e Calcolatori» si apre con un inserto speciale, dedicato al

trentennale della rivista. Alle introduzioni di F. Djindjian e di P. Moscati, che delineano un quadro dell'informatica archeologica nel suo divenire, seguono gli articoli dei membri del Comitato di Redazione, a testimoniare l'attività di ricerca e di sperimentazione che ha caratterizzato il cammino editoriale della rivista, e il contributo di una giovane laureata dell'Università Bocconi, che ha lavorato a stretto contatto con il team di «Archeologia e Calcolatori». Nella parte centrale sono pubblicati gli articoli proposti annualmente dagli autori. Ne emerge un quadro che rappresenta gli aspetti applicativi più qualificanti dell'informatica archeologica (le banche dati, i GIS, le analisi statistiche, i sistemi multimediali), ma che guarda oggi con sempre maggiore interesse agli strumenti di visualizzazione scientifica e di comunicazione delle conoscenze. Il volume si chiude con gli Atti del XII Workshop ArcheoFOSS (Free, Libre and Open Source Software e Open Format nei processi di ricerca archeologica), un'iniziativa lodevole, nata nel 2006, cui si è più volte dato spazio nelle pagine della rivista.

This monograph is a comparative study of the Saline area and of the Aeolian Islands dioceses' settlement in Late Antiquity and in the Early Middle ages.

This volume results from the conference "Between Appia and Latina, Settlement

Dynamics and Territorial Development on the Slopes of the Alban Hills", held at the Royal Dutch Institute at Rome (KNIR) in February, 2017. It contains 23 methodological, thematic and material culture studies on the historical topographical reconstruction of the Alban Hills in Antiquity with a focus on the area of contact with the suburbium of Rome. Papers present both data from new research and results of research done in the past. In the initiative a range of research institutions partook (foreign Institutes at Rome, Universities, Archaeological Services) and independent researchers stimulating the exchange of current knowledge of this small, but important part of the Campagna Romana. Contiene gli Atti del Convegno Internazionale (Milano, 13 marzo 2019) "Milano internazionale: la fragilità territoriale dei contesti archeologici, Atti del Convegno Internazionale" e l'International Conference on Metrology for Archaeology and Cultural Heritage (Florence, 4-6 December 2019) "Logic and computing. The underlying basis of digital archaeology".

Le risorse POR e FAS destinate alla Sicilia

In recent years, funding for the conservation of cultural heritage has become increasingly

difficult to obtain, and this trend shows no sign of changing significantly in the foreseeable future. The twelfth triennial meeting of the International Committee for the Conservation of Mosaics, held in Sardinia in October 2014, focused on the theme of cost, broadly considered, relating specifically to the preservation and presentation of the world's mosaic heritage. This handsome, abundantly illustrated volume provides a comprehensive record of the conference. The volume's sixty-seven papers and posters, comprising contributions from more than one hundred leading experts in the field, reflect the conference's principal themes: cost, methods of survey and documentation, conservation and management, education and training, backing materials and techniques, presentation and display, and case studies. Papers are presented either in English, French, or Italian; there are abstracts in English and either French or Italian for all entries. The volume will be of interest to conservators, site managers, and others responsible for conserving the mosaic heritage, especially in these challenging times.

This book presents a series of papers in honour of Sandro Salvatori divided into three main sections reflecting his long years of work in Middle Asia, his time in Italy as an officer of the Archaeological Superintendency (Ministry of Cultural Heritage), and finally his studies on the prehistory of north-eastern Africa.

L'Annuario della Scuola Archeologica di Atene e delle Missioni Italiane in Oriente è pubblicato dal 1914. Presenta articoli originali e di sintesi sull'arte, l'archeologia, l'architettura, la topografia, la storia, le religioni, l'antropologia del mondo antico, l'epigrafia e il diritto.

L'interesse è rivolto alla Grecia e alle aree della grecità attraverso il tempo, dalla preistoria all'età bizantina e oltre, nonché alle interazioni con l'Oriente, l'Africa e l'Europa continentale.

L'Annuario è composto da tre sezioni: Saggi, Scavi e Ricerche e Atti della Scuola 2021, a cura

The Conservation and Presentation of Mosaics: At What Cost?

Origins of a new economic union (7th-12th centuries). Preliminary results of the nEU-Med
project: October 2015-March 2017

This volume collects more than 60 papers by contributors from the
British Isles, Italy and other parts of continental Europe, and North
and South America, focussing on recent developments in Italian
archaeology from the Neolithic to the modern period.

In Roman Egypt, major changes and a slow process of transformation can
be observed alongside unbroken traditions. The multi-ethnical
population was situated between new patterns of rule and traditional
lifeways. This tension between change and permanence was investigated
during the conference.

Nelson Fausto The Greek myth of Prometheus with its picture of a

Read Free *Al Di L Dellarea Di Rigore*

vulture feasting on its chained victim has traditionally provided a visual image of liver regeneration. It is a powerful and frightening representation but if one were to substitute the vulture by a surgeon and Prometheus by a patient laying on a properly prepared operating table, the outcome of the procedure would not differ significantly from that described by Greek poets. Yet few of us who work in the field have stopped long enough to ask where this myth originated. Did the poet observe a case of liver regeneration in a human being? Was it brilliant intuition or perhaps, literally, just a 'gut feeling' of a poet looking for good rhymes that led to the prediction that livers grow when part of the tissue is removed? This book does not attempt to solve these historical issues. It does, instead, cover in detail some of the major modern themes of research on liver regeneration, injury and repair. As indicated in Dr. N. Bucher's chapter, the modern phase of experimental studies on liver regeneration started in 1931 with the publication by Higgins and Anderson of a method to perform a two-thirds resection of the liver of a rat. The technique described has 3 remarkable features: 1) it is highly reproducible, resulting in the removal of 68% of the liver, 2) it has minimal if any mortality, and 3) it consists only of blood vessel ligation and does not involve cutting through or wounding hepatic tissue.
