This book explores the interconnections and differentiations between artisanal workshops and alchemical laboratories and between the arts and alchemy from Antiquity to the eighteenth century. In particular, it scrutinizes epistemic exchanges between producers of the arts and alchemists. In the fifteenth and sixteenth centuries the term laboratorum uniquely referred to workplaces in which 'chemical' operations were performed: smelting, combustion, distillation, dissolution and precipitation. *'chemical' operations were performed were also known as laboratories. Transmutational alchemy (the transmutation of all base metals into more noble ones, especially gold) was only one aspect of alchemy in the early modern period. The practice of alchemy was also about the chemical production of things--medicines, porcelain, dyes and other products as well as precious metals and about the knowledge of how to produce them. This book uses examples such as the Uffizi to discuss how Renaissance courts established spaces where artisanal workshops and laboratories were brought together, thus facilitating the circulation of materials, people and knowledge between the worlds of craft (today's decorative arts) and alchemy. Above all, texts and books, products and symbols of scholarly culture played an increasingly important role in artisanal workshops. In these workplaces a sort of hybrid figure was at work. With one foot in artisanal and the other in scholarly culture this hybrid practitioner is impossible to categorize in the mutually exclusive categories of scholar and craftsman. By the seventeenth century the expertise of some glassmakers, silver and goldsmiths and producers of porcelain was just as based in the worlds of alchemical and bookish learning as it was grounded in hands-on work in the laboratory. 'La Merda d'artista' [Artist's shit] è sicuramente l'opera italiana più chiacchierata del dopoguerra. A fronte del successo di scandalo, tuttavia, gli interventi che ne hanno esaminato effettivamente la straordinaria portata storico-concettuale sono fino a questo momento piuttosto pochi. Questo saggio conduce un'analisi articolata dell'opera, sia in relazione al percorso interno di Piero Manzoni, sia in relazione ai precedenti più importanti (su tutti Marcel Duchamp) e agli artisti coevi (in particolare Jasper Johns, Yves Klein, Arman). Procedendo in una sorta di zoom in, la lettura parte dai primi quadri di

it. It gives special emphasis to the 1980s and 1990s when Japan's economy experienced vast swings in activity. According to the author, the most recent upheaval in the Japanese economy is the result of the policies of a central bank less concerned with stimulating the economy than with its own turf battles and its ideological agenda to change Japan's economic structure. The book combines new historical research with an in-depth behind-the-scenes account of the bureaucratic competition between Japan's most important institutions: the Ministry of Finance and the Bank of Japan. Drawing on new economic data and first-hand eyewitness accounts, it

Up to now the theme of the artist in the service of Italian courts has been examined in various studies focused mostly on the High Renaissance, as though the phenomenon was relevant only to the XV and XVI centuries. It actually lasted much longer, spanning the whole *longue durée* of the lives of the courts of the ancient regime. The present volume intends to fill this gap, presenting for the first time a comprehensive examination of the subject of the court artist from

sixteenth to seventeenth century and the transformations of this role. “Court artist” is here defined as one who received a regular salary, and was therefore attached to the court by a more or less exclusive service relationship. The book is divided in six chapters: each of them examines the position of the court artist in the service of the most important ruling families in Italy (the Savoy in Turin, the Gonzaga in Mantua, the Este in Modena, the Della Rovere in Pesaro and Urbino, the Medici in Florence) and in papal Rome, a particular and unique center of power.

This open access book presents current knowledge about ecosystem services (ES) in urban planning, and discusses various urban ES topics such as spatial distribution of urban ecosystems, population distribution, and physical infrastructure properties. The book addresses all these issues by: i) investigating to what extent ecosystem services are currently included in urban plans, and discussing what is still needed to improve planning practice; ii) illustrating how to develop ecosystem services indicators and information that can be used by urban planners to enhance plan design; iii) demonstrating the application of ES assessments to support urban planning processes through case studies; and iv) reflecting on criteria for addressing equity in urban planning through ecosystem

Through fully worked out case studies, from policy questions, to baseline analysis and indicators, and from option comparison to proposed solutions, the book offers readers detailed and accessible coverage of outstanding issues and proposed solutions to better integrate ES in city planning. The overall purpose of the book is to provide a compact reference that can be used by researchers as a key resource offering an updated perspective and overview on the field, as well as by practitioners and planners/decision makers as a source of inspiration for their activity. Additionally, the book will be a suitable resource for both undergraduate and post-graduate courses in planning

in the Tyrrhenian Sea to the Colline Metallifere. It aims to document and analyze the form and timeframe of economic growth in this part of the Mediterranean, which took place between the 7th and the 12thc. Central to this is an understanding of the processes of change in human settlements, in the natural and farming landscapes in relation to the exploitation of resources, and in the implementation of differing political strategies. This volume presents the multi-disciplinary research focussed upon the key site of the project, Vetricella, and its territory. Vetricella is thought to be the site of Valli, a royal property in the Tuscan march. It is the only Early Medieval property to be extensively studied in Italy. Located on Italy's Tyrrhenian coast, the archaeology and history of this site provide new

Perhaps no economist was more vindicated by the global financial crisis than Hyman P. Minsky (1919–96). Although a handful of economists raised alarms as early as 2000, Minsky's warnings began a half-century earlier, with writings that set out a compelling theory of financial instability. Yet even

today he remains largely outside mainstream economics; few people have a good grasp of his writings, and fewer still understand their full importance. *Why Minsky Matters* makes the maverick economist's critically valuable insights accessible to general readers for the first time. L. Randall Wray shows that by understanding Minsky we will not only see the next crisis coming but we might be able to act quickly enough to prevent it. As Wray explains, Minsky's most important idea is that "stability is destabilizing": to the degree that the economy achieves what looks to be robust and stable growth, it

is setting up the conditions in which a crash becomes ever more likely. Before the financial crisis, mainstream economists pointed to much evidence that the economy was more stable, but their predictions were completely wrong because they disregarded Minsky's insight. Wray also introduces Minsky's significant work on money and banking, poverty and unemployment, and the evolution of capitalism, as well as his proposals for reforming the financial system and promoting economic stability. A much-needed introduction to an economist whose ideas are more relevant than ever, *Why Minsky*

Secondo questa visione divenuta imperante, vince il più forte, con buona pace dei concetti giuridici di giustizia ed equità; il pubblico deve cedere il posto al privato; lo Stato deve deregolamentare, spacchettare, liberalizzare; tutto confluisce nel mercato globale e tutto viene mercificato – anche ciò che, per sua natura, non può avere un valore di scambio e non può essere oggetto di commercio, poiché è di appartenenza collettiva (pensiamo ad esempio all'idea che ai beni paesaggistici e culturali di proprietà dello Stato si possa anche solo assegnare un «prezzo»). In questo quadro, la menzogna del neocapitalismo, la crescita infinita, si rivela in tutta la sua illusorietà. La ricchezza non si è ridistribuita ma concentrata, generando squilibri drammatici. Come ormai molti riconoscono, anche tra gli economisti, occorre una «decrescita» che indirizzi le attività produttive verso la soddisfazione innanzitutto dei bisogni primari, tralasciando la soddisfazione dei desideri indotti; occorre che la ricchezza prodotta sia effettivamente ridistribuita
