and then learn about parabolas. In this book, you first learn the method of Completing the Square and then the quadratic formula. You then learn how to graph a parabola by finding its vertex and intercepts. Near the end of the book, you will apply what you have learned about quadratics to analyze a variety of real-world scenarios. The final topic is an introduction to quadratic inequalities. This book builds on Algebra 1: Books 5 and 7 and Algebra 2: Book 1. Student testimonials: "This is the best way to learn math." "Summit Math books are unlike typical textbooks. strong foundation in the material before asking students to apply what they've learned. Coverage and Scope In determining the concepts, skills, and topics to cover, we engaged dozens of highly experienced instructors with a range of student audiences. The resulting scope and sequence proceeds logically while allowing for a significant amount of flexibility in instruction. Chapters 1 and 2 provide both a review and foundation for study of Functions that begins in Chapter 3. description: This book builds on the introduction to rates at the end of Algebra 1: Book 1. Students learn that a constant rate of change produces a linear relationship. They learn about x- and y-intercepts and they graph equations in Standard Form. After they learn about slopes of lines, the book introduces them to equations in Slope-Intercept Form and guides them through scenarios that include graphing lines in that form and writing equations to model linear relationships. Students also learn about
