In this important book, Nicholas Hartlep and Daniel Scott's detailed analyses on both visual and historical representations of Asian Americans in textbooks and teacher manuals used in our elementary and secondary schools poignantly tell us that generations of children are growing up being fed this single story about Asian Americans. Hartlep and Scott write. Asian Americans have once again been constructed as the “good minority” that can succeed on their own and be used as a political instrument to shame the Blacks for their underachievement and their fight for equality. Over and over again, the media has been telling “a single story” about Asian Americans to the public for the past fifty years. The consequence of this fabricated story is that it “discourages others—even Asian-Americans themselves—from believing in the validity of their struggles” (Linshi, 2014, p. 1).

For a century and a half, Abraham Lincoln's signing of the Emancipation Proclamation has been the dominant narrative of African American freedom in the Civil War era. However, David Williams suggests that this portrayal marginalizes the role that African American slaves played in freeing themselves. At the Civil War's

outset, Lincoln made clear his intent was to save the Union rather than free slaves - despite his personal distaste for slavery, he claimed no authority to interfere with the institution. By the second year of the war, though, when the Union army was in desperate need of black support, former slaves who escaped to Union lines struck a bargain: they would fight for the Union only if they were granted their freedom. Williams importantly demonstrates that freedom was not simply the absence of slavery but rather a dynamic process enacted by self-emancipated African American refugees, which compelled Lincoln to modify his war aims and place
