5/5 No Compromise is an African centered perspective on solving the x factor in the human equation: 3/5 slave + x = 5/5 whole human beings, for Black Americans, specifically, and Black people world wide in general. The book written by Jeff Weaver, is inspired and driven by the divine wisdom of Almighty God, the African Forces (Lwa, Orisa, Obosum) / Holy Spirit and the ancestors. The premise of 5/5 No Compromise is to establish the fact that: 1) The United States Constitution codified the value of Black lives, in Article I, Section 2, Chapter 3 (more popularly known as the "3/5 Clause") as "3/5 of a person." A codification which has never been, expressly, amended or eradicated; and 2) in order for Black victims of the trans Atlantic slave trade, white supremacy and colonialism to establish their genuine human status they must embrace their own traditions, customs and culture, in an autonomous mutual respect based co-existence with their former slave masters and governors. Furthermore, in order to connect the various "splinters" of Black sub-cultures that exist in the US and globally, there must be an establishment of the one cultural thread that exist in common with the genetic heredity of the people in question. For Black Americans and Black people, worldwide, that common cultural thread is the drum pulse which originated in Africa. It is the one cultural element that is powerful and consistent, wherever Black people are heavily populated in the world. The author, Jeff Weaver calls that thread, "drum centered culture" and has identified it as the key element in sowing together the global cultural fabric that will restore Black people to a 5/5 autonomous culture of thriving human beings, with lives that matter.

This is the story of Galicia, once a crown land of the Austrian Empire, located in the center of Europe. Although largely forgotten today, Galicia was a vibrant, multicultural place where the lives of numerous ethnic and religious groups were intertwined for generations. Galician Trails explores every facet of this long-gone land, from tiny farming villages tucked into mountain passes, to towns filled with a variety of small industries and craftspeople, to modern cities with the conveniences of the late nineteenth and early twentieth centuries. The political struggles and wise compromises that kept Galicia's citizens together for centuries, and the tragic forces that ultimately tore Galicia apart, unfold here before our eyes. When Andrew Zaleski set out to learn a bit more about his grandmother, little did he know that he was embarking on the journey of a lifetime—one that would take him back to faraway Galicia. Along the way, he encountered many of his ancestors, from simple sheep farmers to nobles, from men who helped establish railroads—the exciting new technology of the late nineteenth century—to pioneering professional women of the early twentieth. One of the latter was the author's grandmother, Helena Regiec Sobolewska, a talented educator and a determined, independent woman. She raised a daughter single-handedly through the turmoil of the Great War and the little-known conflicts that followed it. Although the real Galicia disappeared from maps long ago, it will live on in the memory of anyone who travels there through the richly illustrated pages of Galician Trails. This book is for you if you are interested to Discover the rich lives of those who lived in Galicia in the nineteenth and twentieth centuries Find out something about your Austrian, Jewish, Polish, or Ukrainian ancestors who once lived in the land that is divided today between Poland and Ukraine See how new mixed with old to change people's lives Learn little-known details of how World War I and the events that followed forever changed the lives of the people of Galicia

Forty Centuries of Wage and Price Controls
The Epic History of Art in America

5/5 No Compromise

The Mises Institute is thrilled to bring back this popular guide to ridiculous economic policy from the ancient world to modern times. This outstanding history illustrates the utter futility of fighting the market process through legislation. It always uses despotic measures to yield socially catastrophic results. It covers the ancient world, the Roman Republic and Empire, Medieval Europe, the first centuries of the U.S. and Canada, the French Revolution, the 19th century, World Wars I and II, the Nazis, the Soviets, postwar rent control, and the 1970s. It also includes a very helpful conclusion spelling out the theory of wage and price controls. This book is a treasure, and super entertaining!

The 1934 State of the Union Address was given by the 32nd president of the United States, Franklin D. Roosevelt. It was the first State of the Union address to be given in January. Except: "Now that we are definitely in the process of recovery, lines have been rightly drawn between those to whom this recovery means a return to old methods—and the number of these people is small—and those for whom recovery means a reform of many old methods, a permanent readjustment of many of our ways of thinking and therefore of many of our social and economic arrangements..."

The ability to see deeply affects how human beings perceive and interpret the world around them. For most people, eyesight is part of everyday communication, social activities, educational and professional pursuits, the care of others, and the maintenance of personal health, independence, and mobility. Functioning eyes and vision system can reduce an adult's risk of chronic health conditions, death, falls and injuries, social isolation, depression, and other psychological problems. In children, properly maintained eye and vision health contributes to a child's social development, academic achievement, and better health across the lifespan. The public generally recognizes its reliance on sight and fears its loss, but emphasis on eye and vision health, in general, has not been integrated into daily life to the same extent as other health promotion activities, such as teeth brushing, hand washing, physical and mental exercise, and various injury prevention behaviors. A larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts to expand the scope of behavior change. The shaping of socioeconomic environments can eventually lead to social norms that promote eye and vision health. Making Eye Health a Population Health Imperative: Vision for Tomorrow proposes a new population-centered framework to guide action and coordination among various, and sometimes competing, stakeholders in pursuit of improved eye and vision health and health equity in the United States. Building on the momentum of previous public health efforts, this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can be translated into cohesive areas for action at federal, state, and local levels.

This book gives writers pointers and guidelines on how to improve their action scenes by implementing some of the same kinds of techniques used in film-making. Loaded with new terminology and definitions, an introduction to the basic concepts of an Action Scene, and application of the concepts, this book gives writers the tools to write their own expert-level action scenes! Comparative Perspectives on School Textbooks

A future Europe has spiraled into barbarism. The Western Hemisphere stands alone, isolated and sheltered from the destruction - for now. Influenced by the events of World War I, this is the year 2137 as portrayed by Edgar Rice Burroughs' in his science fiction novel The Lost Continent, its subtitle Beyond Thirty being the longitude that Western Hemisphere inhabitants are forbidden to pass.

LOST Lessons was written by Randy Johnson and David Rutledge. The book has been well received and is reaching varied individuals. Young adults who are dedicated followers of Jesus Christ are learning to see media, Hollywood and even the world from a Christian perspective, while those who aren't necessarily connecting with a church are seeing Jesus in a fresh way. Based on this success, the authors decided to write on Season 2 of LOST, but with a twist: they involved 56 high school juniors and seniors

Robert Hughes begins where American art itself began, with the Native Americans and the first Spanish invaders in the Southwest; he ends with the art of today. In between, in a scholarly text that crackles with wit, intelligence and insight, he tells the story of how American art developed. Hughes investigates the changing tastes of the American public; he explores the effects on art of America's landscape of unparalleled variety and richness; he examines the impact of the melting-pot of cultures that America has always been. Most of all he concentrates on the paintings and art objects themselves and on the men and women -

from Winslow Homer and Thomas Eakins to Edward Hopper and Georgia O'Keeffe, from Arthur Dove and George Bellows to Jackson Pollock and Mark Rothko -who created them. This is an uncompromising and refreshingly opinionated exploration of America, told through the lens of its art.

Stories For Young Readers, Book 2

This book examines the discourses on nation-building, civic identity, minorities, and the formation of religious identities in school textbooks worldwide. It offers up-to-date, practical, and scholarly information on qualitative and mixed-method textbook analysis, as well as the broader context of critical comparative textbook and curriculum analyses in and across selected countries. The volume offers unique and empirical research on how internal educational policies and ideological goals of dominant social, political, and economic groups affect textbook production and the curricular aims in different educational systems worldwide. Chapters address the role of school textbooks in developing nationhood, the creation of citizenship through school textbooks, the complexity of gender in normative discourses, and the intersection of religion and culture in school textbooks.

In this important book, Nicholas Hartlep and Daniel Scott's detailed analyses on both visual and historical representations of Asian Americans in textbooks and teacher manuals used in our elementary and secondary schools poignantly tell us that generations of children are growing up being fed this single story about Asian Americans. As Hartlep and Scott write, Asian Americans have once again been constructed as the "good minority" that can succeed on their own and be used as a political instrument to shame the Blacks for their underachievement and their fight for equality. Over and over again, the media has been telling "a single story" about Asian Americans to the public for the past fifty years. The consequence of this fabricated story is that it "discourages others—even Asian-Americans themselves—from believing in the validity of their struggles" (Linsih, 2014, p. 1).

In a work of sweeping scope and luminous detail, Elizabeth Borgwardt describes how a cadre of World War II American planners inaugurated the ideas and institutions that underlie our modern international human rights regime. Borgwardt finds the key in the 1941 Atlantic Charter and its Anglo-American vision of "war and peace aims." In attempting to globalize what U.S. planners heralded as domestic New Deal ideas about security, the ideology of the Atlantic Charter—buttressed by FDR's "Four Freedoms"—and the legacies of World War I—redefined human rights and America's vision for the world. Three sets of international negotiations brought the Atlantic Charter blueprint to life—Bretton Woods, the United Nations, and the Nuremberg trials. These new institutions set up mechanisms to stabilize the international economy, promote collective security, and implement new thinking about international justice. The design of these institutions served as a concrete articulation of U.S. national interests, even as they emphasized the importance of working with allies to achieve common goals. The American architects of these charters were attempting to redefine the idea of security in the international sphere. To varying degrees, these institutions and the debates surrounding them set the foundations for the world we know today. By analyzing the interaction of ideas, individuals, and institutions that transformed American foreign policy—and Americans' view of themselves—Borgwardt illuminates the broader history of modern human rights, trade and the global economy, collective security, and international law. This book captures a lost vision of the American role in the world.

With ancestral surnames that date to the first millennium A.D. in England and the Colonial era in the U.S.A., these Eads and Tipton families have been emigrating from the earliest times. Their tales of travel include a heroic knight in a Welsh forest, a kidnapped boy sold into servitude who became a plantation owner in Jamaica, farmers who emigrated from Maryland and North Carolina west to Ohio and Tennessee, and homesteaders in Illinois and Missouri with land grants from the government. Other interesting stories include a link to the Jesse James Gang and a U.S. President, and war veterans from the Civil War to WWII. Biographies of fifteen turn-of-the-century babies (born around 1900) and four Tipton siblings (born in the early 20th century just before the Great Depression) complete this substantial American family history. The author, James Eads, is a professional genealogical researcher in finding their own roots. Also included are Ancestors and Descendants charts with numerous surnames, including: Allen, Atmip, Barker, Barrett, Bennett, Bishop, Campbell, Canning, Chiles, Coffel, Collins, Croney, Dees, Eads, Gentry, Hache, Harden, Heath, Johnson, Jones, Leach, London, Long, Machen, Masters, Meador, Miller, Montgomery, Neece, Rainwater, Smith, Sutton, Tipton, Vannoy, Ward, White, Wright, and many others.

The Inalienable Human Rights & Souls of Black Folk!

The Films of Frank Capra

The author describes his early life, growing up in a dysfunctional family, and how he ended up becoming a CIA case officer. A gripping ritual by a secret society in the English Countryside nearly costs Thomas Spell his life. He returns home to Chicago to find that he carries within himself something unspeakable - a condition for which he believes there is no cure, until he meets Penelope, a beautiful and brilliant pre-med student determined to heal him. But the Brotherhood searches for him still, convinced that he holds the key to an unimaginable power. As his life begins to spiral out of control, Thomas is forced to confront his own past, as well as the dark forces closing in on him and everything he holds dear.

When the American Ambassador to Iraq announces her true identity and sparks the Arab Revolution and Reformation of Islam on a global scale, the world is turned upside down. "Safina" is the first book in a trilogy that spans three generations of thrilling intrigue and battles, and tells her story of courageous commitment to the struggle for freedom around the globe. From Safina's cruel beginning as an abused eleven year old child bride in the deserts of Iraq, to the highest society of European aristocracy and power, she joins forces with Lieutenant Colonel, Brecken Petersen, a United States Marine Special Forces combat-hardened veteran, and takes her position as the most powerful leader on the planet. She fights every inch of her way from Basra to Amsterdam, and to Paris, on to Washington DC and finally to Egypt. She establishes the UFAS, (United Federation of Arab States), and recruits member states around the world to join the UFN (United Free Nations). Safina and her fellow revolutionaries fight to liberate Islam from 1400 years of barbaric enslavement of half its population - women. The United States Government is in flux, on the verge of civil war. Europe is wounded, and pockets of serious counter insurgencies continue to be a source of concern. Safina recruits Claude Molyneau, a world banker and financier who attempts to restore the financial foundations of Europe, and the monetary solution of the United States. Readers who relish intrigue and espionage will like this novel. Those who appreciate a sophisticated love story will be engaged with all of their emotional and erotic scenes. Individuals who thrill to the perfectly choreographed hand-to-hand combat and the expert use of martial arts and sophisticated weaponry will be in their element. Science geeks will recognize state-of-the-art new technologies that will be deployed in the near future. Political junkies will love the behind-the-scenes machinations that propel the world to the brink of annihilation. This novel is a page-turner, a fast-paced, action-packed, and accessible. Increased consumer knowledge and awareness about healthy nutrition and physical activity will foster a growing demand for healthy food products and exercise options, dramatically influencing marketing trends. Hospitals, work sites, and communities should make it easy for mothers to initiate and sustain breastfeeding as this practice has been shown to prevent childhood obesity. Working together, we will create an environment that promotes and facilitates healthy choices for all Americans. And we will live longer and healthier lives. In the 2001 Surgeon General's Call to Action to Prevent and Decrease Overweight and Obesity, former Surgeon General David Satcher, MD, PhD, warned us of the negative effects of the increasing weight of our citizens and outlined a public health response to reverse the trend. Although we have made some strides since 2001, the prevalence of obesity, obesity-related diseases, and premature death remains too high. The Surgeon General is calling on all Americans to join in a national grassroots effort to reverse this trend. Plans include showing people how to choose nutritious food, add more physical activity to their daily lives, and manage the stress that so often derails their best efforts at developing healthy habits. The real goal is not just a number on a scale, but optimal health for all Americans at every stage of life. To achieve this goal, we must all work together to share resources, educate our citizens, and partner with business and government leaders to find creative solutions in our neighborhoods, towns, and cities from coast to coast. Together, we can become a nation committed to become healthy and fit.

"We need to refocus on leadership as a value important to our American republic. The book is a small effort in restarting the dialogue to stimulate the effort to produce more and better leadership on the ice and off."

Investigation even more difficult, there are translation issues. Many of the works of those who wrote soon after the destruction of Jerusalem in A.D. 70 and beyond remain untranslated. This book seeks to remedy some of these problems. Thomas Ice, in his chapter on the history of preterism in The End Times Controversy, makes some bold historical claims that cannot be supported when the historical record is actually analyzed. The early church was not monolithic in its views of Bible prophecy. There was no unanimous acceptance of either premillennialism or a distant future. The Early Church and the "End of the World" will show that some of the earliest writers, most likely writing before the destruction of Jerusalem in A.D. 70, were referring to the judgment coming of Jesus, an event that the gospel writers tell us was to take place before that first-century generation passed away (Matt. 24:34). Adding to the confirmation of this view are the writings of the church's first historian, Eusebius Pampilius of Caesarea, whose Ecclesiastical History is a window on the first few centuries of the church. In kind, adding, Francis Gumerlok has undertaken the task of translating a number of ancient and medieval commentators who have written on Matthew 24. He shows that many early and medieval writers believed that these prophecies had already been fulfilled before the end of Jerusalem, that is, before its destruction by the Romans in A.D. 70 - Publisher.

Cottage Communities is a study of the American Camp Meeting Movement, from 1786-present, showing how the planning, land use, governance, architecture and detailing created these unique places where a strong experience of community is clear even today. There are still approximately 1000 Camp Meeting Grounds left from a high point of over 3000 locations. Camp Meetings are about vernacular or historic design, as well as a resource for those interested in urban design, ingenuity in structure and use of materials, and building detailing. As part of the discussion on Lean Urbanism, these places are source information on small or tiny houses, cottage design, pocket neighborhoods, affordable housing and self-building for lean, efficient living. Design and site planning to generate community through an intuitive understanding of spaces, distances and how it all works is also discussed. The observations on how behavior is affected by built space reflects knowledge achieved over time. The beauty of the buildings and design concepts that are cutting-edge even by today's standards, are shown in many color photographs, maps, and drawings. The history of the movement is recounted to show the evolution of Camp Meetings alongside the evolution of the United States as the movement started just after the Revolution. Today's concepts of land trust communities, resorts, condominiums, trailer parks, co-housing, even town design owe much to the communities designs as Camp Meetings. The book is a rich collection of vernacular construction techniques, ideas that support tiny houses, movable houses, and self-built found here. Simple and lean lifestyle and design is shown in Camp Meeting Communities from over 50 Camp Grounds from Maine to Mississippi and Colorado. The book is a good resource for architects, planners and designers, but it also provides an overview of the subject appropriate to anyone interested in Camp Meetings.

The first edition of A Symphony of Silence: An Enlightened Vision was inspired by the desire to share with humanity, through multiple voices, the ineffable beauty we experience in our lives when the veil of ignorance is pulled back and the wonder of our essential nature is revealed.. The voices emerging from these pages add vitality and validity to our shared experience of the silence of the transcendent. It is not something beyond our reach, but a reality that has always been with us, quietly awaiting an opportunity to unfold. In this second edition of A Symphony of Silence, several new voices are added to the chorus of the first edition. A Catholic priest tells us of using TM as part of his inspired vision of the power of love to transform the lives of abused and destitute children from the streets of South America. The founding director of an orphanage and school in Uganda, who likewise brings TM to children in need, describes to us his compassionate resolve to eradicate suffering within his community. A poet expresses for us in verse the joy of a seeker reaching for the light. A scientist and his colleagues show us the power of TM to reduce stress and alleviate PTSD in the field of law enforcement. An actor, director, producer, and entrepreneur, explores with us his innovative projects for inner city students through "Edutainment." Women, who for decades dedicated themselves to introducing the TM program to their multicultural community, share with us delightful and very personal stories. A pioneering social activist brings us into the conversation he had with Maharishi in 1968 at a conference in Squaw Valley, California. He talked candidly with Maharishi about the need to introduce TM as a tool to bring inner freedom to the inner cities, helping to fulfill the quest for true civil rights. The voices in A Symphony of Silence create a glimpse into the vast impact that Maharishi has on many lives throughout the world.
