An Age Of License A Travelogue Lucy Knisley

A graphically illustrated, recipe-complemented memoir by the indie cartoonist author of *French Milk* describes her food-enriched youth as the daughter of a chef and a gourmet, key memories that were marked by special meals and the ways in which cooking has imparted valuable life lessons. Original.

Written during a European book tour promoting her work, a cartoonist depicts the new experiences, romantic encounters, and cute cats she met as she visited historic cities across the continent.

A Complete Digest of All Reported
Cases from 1906 to 1916

Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. A classic teenage fetish object, the American driver's license has long symbolized freedom and mobility in a nation whose design assumes car travel and whose vastness rivals continents. It is youth's pass to regulated vice-cigarettes, bars, tattoo parlors, casinos, strip joints, music venues, guns. In its more recent history, the license has become increasingly associated with freedom's flipside: screening. The airport's heightened security

checkpoint. Controversial ID voting laws. Federally mandated, anti-terrorist driver's license re-designs. The driver's license encapsulates the contradictory values and practices of contemporary American culture-freedom and security, mobility and checkpoints, self-definition and standardization, democracy and exclusion, superficiality and intimacy, the stable self and the self in flux. Object Lessons is published in partnership with an essay series in The Atlantic.

*Transportation research has traditionally
been dominated by engineering and logistics
research approaches. This book integrates
social, economic, and behavioral sciences
into the transportation field. As its title
indicates, emphasis is on socioeconomic
changes, which increasingly govern the
development of the transportation sector.
The papers presented here originated at a
conference on Social Change and
Sustainable Transport held at the University
of California at Berkeley in March 1999,*

under the auspices of the European Science Foundation and the National Science Foundation. The contributors, who represent a range of disciplines, including geography and regional science, economics, political science, sociology, and psychology, come from twelve different countries. Their subjects cover the consequences of environmentally sustainable transportation vs. the "business-as-usual" status quo, the new phenomenon of "edge cities," automobile dependence as a social problem, the influence of leisure or discretionary travel and of company cars, the problems of freight transport, the future of railroads in Europe, the imposition of electronic road tolls, potential transport benefits of e-commerce, and the electric car.
