Vote: America's Best Loved Novel in PBS's The Great American Read Harper Lee's Pulitzer Prize-winning masterpiece of honor and injustice in the deep South—and the heroism of one man in the face of blind and violent hatred One of the most cherished stories of all time, To Kill a Mockingbird has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by critics and readers alike Wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime.

A Drama in Three Acts

Tells a story about the strange relationship of two migrant workers who are able to realize their dreams of an easy life until one of them succumbs to his weakness for soft, helpless creatures and strangles a farmer's wife.

A new way of thinking about data science and data ethics that is informed by the ideas of intersectional feminism. Today, data science is a form of power. It has been used to expose injustice, improve health outcomes, and topple governments. But it has also been used to discriminate, police, and surveil. This potential for good, on the one hand, and harm, on the other, makes it essential to ask: Data science by whom? Data science for whom? Data science with whose interests in mind? The narratives around big data and data science are overwhelmingly white, male, and techno-heroic. In Data Feminism, Catherine D'Ignazio and Lauren Klein present a new way of thinking about data science and data ethics—one that is informed by intersectional feminist thought. Illustrating data feminism in action, D'Ignazio and Klein show how challenges to the male/female binary can help challenge other hierarchical and empirically wrong) classification systems. They explain how, for example, an understanding of emotion can expand our ideas about effective data visualization, and how the concept of invisible labor can expose the significant human efforts required by our automated systems. And they show why the data never, ever "speak for themselves." Data Feminism offers strategies for data scientists seeking to learn how feminism can help them work toward justice, and for feminists who want to focus their efforts on the growing field of data science. But Data Feminism is about much more than gender. It is about power, about who has it and who doesn't, and about how those differentials of power can be challenged and changed.

The Elements of Style William Strunk concentrated on specific questions of usage—and the cultivation of good writing—with the recommendation "Make every word tell"; hence the 17th principle of composition is the simple instruction: "Omit needless words." The book was also listed as one of the 100 best and most influential books written in English since 1923 by Time in its 2011 list.

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

We all have a story to tell. We often judge our own stories as being good or bad, right or wrong. The truth is, each and every one of them not only holds meaning for us but for those around us as well. Chicken Soup for The Teenage Soul IV is filled with such stories: what it really means to be a teenager in today's world.

WRITING ANALYTICALLY treats writing as a tool of thought, offering prompts that lead students through the process of analysis and help them to generate original, well-developed ideas. The authors of this brief, popular rhetoric believe that learning to write well requires learning to use writing as a tool to think well. Rosenwasser and Stephen emphasize analysis as a mode of enriching understanding that precedes and in some cases supplants argument. Materials in the eighth edition are better integrated, more contextualized and—when possible—condensed. A new chapter, Thinking Like a Writer, contains a broad array of strategies for integrating opportunities for writing into a course. It makes explicit a subtext that pervades the book: that to think of yourself as a writer is to see more, to think differently and to engage the meaning of things more earnestly. Leonardo da Vinci is one of the outstanding figures of the Renaissance and of all time. Gorgeous, spirited and extravagantly rich, Cora Cash is the closest thing 1890s New York society has to a princess. Her masquerade ball is the prelude to a campaign that will see her mother whisk Cora to Europe, where Mrs Cash wants nothing less than a title for her daughter. In England, impoverished blue-bloods are queuing up for introductions to American heiresses, overlooking the sometimes lowly origins of their fortunes. Cora makes a dazzling impression, but the English aristocracy is a realm fraught with arcane rules and pitfalls, and there are those less than eager to welcome a wealthy outsider...

**The extraordinary, groundbreaking novel from Laurie Halse Anderson, with more than 2.5 million copies sold! "The first ten lies they tell you in high school. "Speak up for yourself—we want to know what you have to say." From the first moment of her freshman year at Merryweather High, Melinda knows this is a big fat lie, part of the nonsense of high school. She is friendless, outcast, because she busted an end-of-summer party by calling the cops, so now nobody will talk to her, let alone listen to her. As time passes, she becomes increasingly isolated and practically stops talking altogether. Only her art class offers any solace, and it is through her work on an art project that she is finally able to face what really happened at that terrible party: she was raped by an upperclassman, a guy who still attends Merryweather and is still a threat to her. Her healing process has just begun when she has another violent encounter with him. But this time Melinda fights back, refuses to be silent, and thereby achieves a measure of vindication. In Laurie Halse Anderson's powerful novel, an utterly believable heroine with a bitterly ironic voice delivers a blow to the hypocritical world of high school. She speaks for many a disenfranchised teenager while demonstrating the importance of speaking up for oneself. Speak was a 1999 National Book Award Finalist for Young People's Literature.**

**A seemingly ordinary village participates in a yearly lottery to determine a sacrificial victim. In Writing Anthropology, fifty-two anthropologists reflect on scholarly writing as both craft and commitment. These short essays cover a wide range of territory, from ethnography, genre, and the politics of writing to affect, storytelling, authorship, and scholarly responsibility. Anthropological writing is more than just communicating findings: anthropologists write to tell stories that matter, to be accountable to the communities in which they do their research, and to share new insights about the world in ways that might change it for the better. The contributors offer insights into the beauty and the function of language and the joys and pains of writing while giving encouragement to stay at it—to keep writing as the most important way to not only improve one's writing but to also honor the stories and lessons learned through research. Throughout, they share new thoughts, prompts, and agitations for writing that will stimulate conversations that cut across the humanities. Contributors.
