Nine hundred light-years from home, Major Andrew Grayson and the crew of NACS Washington are marooned in a sunless system with limited water, reactor fuel, and food. The last hope for survival is to go where nothing human has gone before. After embarking on a scouting mission to the only moon with surface signs of life, Andrew and his Special Tactics Team make two startling discoveries. One is a dream: a form of protein and plant life that could save the starving humans in the rogue system. The second is a nightmare: this harvested rock is infested with Lankies. Far from the seemingly mindless aggressors Andrew has battled for years, these show a terrifying awareness, and they have surprising secrets of their own hidden away in the darkness. When the Lankies sense an uninvited presence in their world, Andrew's operation becomes an expedition to hell. The odds against his small crew are stacked high. Of

Special Forces soldiers are daring, seasoned troops from America's heartland, selected in a tough competition and trained in an extraordinary range of skills. They know foreign languages and cultures and unconventional warfare better than any U.S. fighters, and while they prefer to stay out of the limelight, veteran war correspondent Linda Robinson gained access to their closed world. She traveled with them on the frontlines, interviewed them at length on their home bases, and studied their doctrine, methods and history. In *Masters of Chaos* she tells their story through a select group of senior sergeants and field-grade officers, a band of unforgettable characters like Rawhide, Killer, Michael T, and Alan -- led by the unflappable Lt. Col. Chris Conner and Col. Charlie Cleveland, a brilliant but self-effacing West Pointer

who led the largest unconventional war campaign since Vietnam in northern Iraq. Robinson follows the Special Forces from their first post-Vietnam combat in Panama, El Salvador, Desert Storm, Somalia, and the Balkans to their recent trials and triumphs in Afghanistan and Iraq. She witnessed their secret sleuthing and unsung successes in southern Iraq, and recounts here for the first time the dramatic firefights of the western desert. Her blow-by-blow story of the attack on Ansar al-Islam's international terrorist training camp has never been told before. The most comprehensive account ever of the modern-day Special Forces in action, *Masters of Chaos* is filled with riveting, intimate detail in the words of a close-knit band of soldiers who have done it all. This volume represents an early attempt at assessing the Long War, now in its 14th year. Forged in the fires of the 9/11 attacks, the war includes campaigns against al Qaeda, major conflicts in Iraq and

Afghanistan, and operations in the Horn of Africa, the Republic of the Philippines, and globally, in the air and on the sea. The authors herein treat only the campaigns in Afghanistan and Iraq, the largest U.S. efforts. It is intended for future senior officers, their advisors, and other national security decision makers. By derivation, it is also a book for students in joint professional military education courses, which will qualify them to work in the field of strategy. While the book tends to focus on strategic decisions and developments of land wars among the people, it acknowledges that the status of the United States as a great power and the strength of its ground forces depend in large measure on the dominance of the U.S. Navy and U.S. Air Force in their respective domains.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They

also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain

a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

**Bowden takes us inside the rooms where decisions were made and on the ground where the action unfolded. After masterminding the attacks of September 11, 2001, Osama bin Laden managed to vanish. Over the next ten years, as Bowden shows, America found that its war with al Qaeda—a scattered group of individuals who were almost impossible to track—demanded an innovative approach. Step by step, Bowden describes the development of a new tactical strategy to fight this war—the fusion of intel from various agencies and on-the-ground special ops.
