Viesturs knows the mountain firsthand. He and renowned alpinist Scott Fischer climbed it in 1992 and got caught in an avalanche that sent them sliding to almost certain death before Ed managed to get into a self-arrest

After John Hunt's successful 1953 expedition he wrote in his diary that at least the Everest story was finished. In fact, it had scarcely begun. The first ascent was the

When eleven climbers died on K2 on August 1, 2008, it was a stark reminder that the world's second-highest mountain has, for more than a century, been regarded as

to make history as the first Americans—and the first women—to scale the treacherous slopes of Annapurna I, the world's tenth highest peak. Expedition leader Arlene Blum here tells their dramatic story: the logistical problems, storms, and hazardous ice climbing; the

conflicts and reconciliations within the team; the terror of avalanches that threatened to sweep away camps and climbers. On October 15, two women and two Sherpas at last stood on the summit—but the celebration was cut short, for two days later, the two women of the

'It's a preposterous plan. Still, if you do get up it, I think it'll be the hardest thing that's been done in the Himalayas.' So spoke Chris Bonington when Peter Boardman and Joe Tasker

presented him with their plan to tackle the unclimbed West Wall of Changabang - the Shining Mountain - in 1976. Bonington's was one of the more positive responses; most felt the climb impossibly hard, especially for a two-man, lightweight expedition. This was, after all,

perhaps the most fearsome and technically challenging granite wall in the Garhwal Himalaya and an ascent - particularly one in a lightweight style - would be more significant than anything done on Everest at the time. The idea had been Joe Tasker's. He had photographed the sheer, shining,

white granite sweep of Changabang's West Wall on a previous expedition and asked Pete to return with him the following year. Tasker contributes a second voice throughout Boardman's story, which starts with acclimatisation, sleeping in a Salford frozen food store, and progresses

through three nights of hell, marooned in hammocks during a storm, to moments of exultation at the variety and intricacy of the superb, if punishingly difficult, climbing. It is a story of how climbing a mountain can become an all-consuming goal, of the tensions

inevitable in forty days of isolation on a two-man expedition; as well as a record of the moment of joy upon reaching the summit ridge against all odds. First published in 1978, *The Shining Mountain* is Peter Boardman's first book. It is a very personal and honest story that is also amusing,

lucidly descriptive, very exciting, and never anything but immensely readable. It was awarded the John Llewelyn Rhys Prize for literature in 1979, winning wide acclaim. His second book, Sacred Summits, was published shortly after his death in 1982. Peter Boardman and Joe Tasker

#1 NATIONAL BESTSELLER • "A harrowing tale of the perils of high-altitude climbing, a story of bad luck and worse judgment and of heartbreaking heroism." —PEOPLE
A bank of clouds was assembling on the not-so-distant horizon, but

Get Free Annapurna 1 Expedition Maurice Herzog Htmnepal

journalist-mountaineer Jon Krakauer, standing on the summit of Mt. Everest, saw nothing that "suggested that a murderous storm was bearing down." He was wrong. The storm, which claimed five lives and left countless more--including

Krakauer's--in guilt-ridden disarray, would also provide the impetus for Into Thin Air, Krakauer's epic account of the May 1996 disaster. By writing Into Thin Air, Krakauer may have hoped to exorcise some of his own demons and lay to rest

some of the painful questions that still surround the event. He takes great pains to provide a balanced picture of the people and events he witnessed and gives due credit to the tireless and dedicated Sherpas. He also avoids blasting easy

targets such as Sandy Pittman, the wealthy socialite who brought an espresso maker along on the expedition. Krakauer's highly personal inquiry into the catastrophe provides a great deal of insight into what went wrong. But

for Krakauer himself, further interviews and investigations only lead him to the conclusion that his perceived failures were directly responsible for a fellow climber's death. Clearly, Krakauer remains haunted by the disaster, and

although he relates a number of incidents in which he acted selflessly and even heroically, he seems unable to view those instances objectively. In the end, despite his evenhanded and even generous assessment of others'

actions, he reserves a full measure of vitriol for himself. This updated trade paperback edition of *Into Thin Air* includes an extensive new postscript that sheds fascinating light on the acrimonious debate that flared between Krakauer and

Everest guide Anatoli Boukreev in the wake of the tragedy. "I have no doubt that Boukreev's intentions were good on summit day," writes Krakauer in the postscript, dated August 1999. "What disturbs me, though, was Boukreev's refusal to

acknowledge the possibility that he made even a single poor decision. Never did he indicate that perhaps it wasn't the best choice to climb without gas or go down ahead of his clients." As usual, Krakauer supports his points with dogged

research and a good dose of humility. But rather than continue the heated discourse that has raged since Into Thin Air's denouncement of guide Boukreev, Krakauer's tone is conciliatory; he points most of his criticism at G.

Weston De Walt, who coauthored The Climb, Boukreev's version of events. And in a touching conclusion, Krakauer recounts his last conversation with the late Boukreev, in which the two weathered climbers agreed to

disagree about certain points. Krakauer had great hopes to patch things up with Boukreev, but the Russian later died in an avalanche on another Himalayan peak, Annapurna I. In 1999, Krakauer received an Academy Award in

of the finest tradition of investigative journalism with the stylish subtlety and profound insight of the born writer. His account of an ascent of Mount Everest has led to a general reevaluation of climbing and of the commercialization of what was

once a romantic, solitary sport; while his account of the life and death of Christopher McCandless, who died of starvation after challenging the Alaskan wilderness, delves even more deeply and disturbingly into the fascination of

nature and the devastating effects of its lure on a young and curious mind."

The bestselling author of *No Shortcuts to the Top* and *K2* chronicles his three attempts to climb the world's tenth-highest and

statistically deadliest peak, Annapurna in the Himalaya, while exploring the dramatic and tragic history of others who have made -- or attempted - the ascent, and what these exploits teach us about facing life's greatest challenges. As a high

school student in the flatlands of Rockford, Illinois, where the highest objects on the horizon were water towers, Ed Viesturs read and was captivated by the French climber Maurice Herzog's famous and grisly account of the first ascent of

Annapurna in 1950. When he began his own campaign to climb the world's 14 highest peaks in the late 1980s, Viesturs looked forward with trepidation to undertaking Annapurna himself. Two failures to summit in 2000 and 2002 made

Annapurna his nemesis. His successful 2005 ascent was the triumphant capstone of his climbing quest. In *The Will To Climb* Viesturs brings the extraordinary challenges of Annapurna to vivid life through edge-of-your-seat accounts of the

greatest climbs in the mountain's history, and of his own failed attempts and eventual success. In the process he ponders what Annapurna reveals about some of our most fundamental moral and spiritual questions--questions, he

believe, that we need to answer to lead our lives well. "Of all fourteen of the world's highest mountains, which I climbed between 1989 and 2005," writes Viesturs, "the one that came the closest to defeating my best efforts was Annapurna."

Although it was the first 8,000-meter peak to be climbed, Annapurna is not as well known as the world's highest mountain, Everest, or second highest, K2. But as Viesturs argues, Annapurna, while not technically the most

Get Free Annapurna 1 Expedition Maurice Herzog Htmnepal

difficult of the 8,000ers, is the most daunting because it has no route--no ridge or face on any side of the mountain--that is relatively free of what climbers call "objective danger"-the threat of avalanches, above all, but also of collapsing

seracs (huge ice blocks), falling rocks, and crevasses. Since its first ascent in 1950, Annapurna has been climbed by more than 130 people, but 53 have died trying. This high fatality rate makes Annapurna the most dangerous of

the 8,000-meter peaks. Viesturs and co-author David Roberts chronicle Ed's three attempts to climb Annapurna, as well as the attempts of others, from the two French climbers who made the landmark first ascent of Annapurna

on June 3, 1950, through the daring and tragic campaigns of such world-class mountaineers as Reinhold Messner and Anatoli Boukreev. Viesturs's accounts and analyses of these extraordinary adventures serve as a point of departure for his

captures the energy of an optimistic world shaking off the restraints of war and austerity. It's a mountaineering classic. This magisterial and thrilling history argues that the story of American mountaineering is the story of America itself. In Continental Divide, Maurice Isserman tells the history of American

mountaineering through four centuries of landmark climbs and first ascents.

Mountains were originally seen as obstacles to civilization; over time they came to be viewed as places of redemption and renewal. The White Mountains stirred the transcendentalists; the Rockies and Sierras pulled explorers westward toward

Manifest Destiny; Yosemite inspired the early environmental conservationists.

Climbing began in North America as a pursuit for lone eccentrics but grew to become a mass-participation sport.

Beginning with Darby Field in 1642, the first person to climb a mountain in North America, Isserman describes the

exploration and first ascents of the major American mountain ranges, from the Appalachians to Alaska. He also profiles the most important American mountaineers, including such figures as John C. Frémont, John Muir, Annie Peck, Bradford Washburn, Charlie Houston, and Bob Bates, relating their exploits both at

home and abroad. Isserman traces the evolving social, cultural, and political roles mountains played in shaping the country. He describes how American mountaineers forged a "brotherhood of the rope," modeled on America's unique democratic self-image that characterized climbing in the years leading up to and

immediately following World War II. And he underscores the impact of the postwar "rucksack revolution," including the advances in technique and style made by pioneering "dirtbag" rock climbers. A magnificent, deeply researched history, Continental Divide tells a story of adventure and aspiration in the high peaks

that makes a vivid case for the importance of mountains to American national identity.

In the heart of the Swiss Alps stand the three majestic peaks of the Bernese Oberland, Europe's most famous mountain range. The highest, at 13,638 feet, is the Jungfrau. Next is the Mönch, at 13,465

feet. But it is the smallest, the Eiger, rising 13,038 feet above sea level, that is by far the deadliest. Called a "living" mountain for its constantly changing conditions- unpredictable weather, disintegrating limestone surfaces, and continuously falling rock and ice-its mile-high north wall is perhaps the most dangerous climb

in the world. And that may be just what beckons elite Alpinists to scale the treacherous peak against the odds. In 1957, nearly forty years before the well-known Mount Everest tragedy, two teams of confident climbers set out to summit the north wall of the Eiger Mountain. Not long into their journey, onlookers could tell

that the four men were headed for disaster. Soon rescue teams from all over Europe raced toward the Eiger-yet only one of the four climbers survived to face unfounded international accusations.
