Suffolk's Defended Shore presents an illustrated history of the development of military defences on the Suffolk coast using data collected as part of the English Heritage national survey. The survey involved the examination of both modern and historic aerial photographs which led to the creation of a detailed map of the archaeological remains on the county's coast. The results of the survey are dominated by evidence for the military defence of the coast, reflecting the importance of the Suffolk coast in national defence strategies over many years. Extensively illustrated, this book highlights the particular importance of historic aerial photographs which provide a different and unique perspective on the coastal defences constructed in World War II. Photographs taken during and immediately after this war sometimes provide the only visual record of the rapidly evolving defences from this period.

Subversive Champagne re-examines the 1960s cult television series, The Avengers, through a close analysis of 25 filmed episodes. The book examines how The Avengers - during the classic Emma Peel era (1964-1967) - was continually shifting the boundaries of audience expectation, defying both genre classification and viewers' traditional desire for kitchen sink drama. Subversive Champagne centres on eighteen episodes from the monochrome Peel Season 4 - widely acknowledged as the artistic pinnacle of the series. It is in this era - caught between video-tape and colour film - that The Avengers was undergoing arguably its most profound stylistic and thematic transitions, from mild eccentricity to something genuinely experimental. The author extends his journey into the exhilarating but 'uneasy' colour Season 5, adding chapters on seven more episodes, thus allowing us to explore the entire Emma Peel era. Entertaining froth or groundbreaking art? Rediscover the most iconic show in television history.

This revised edition of the Arden Shakespeare Complete Works includes the full text of Double Falsehood, which was published in the Arden Third series to critical acclaim in 2010. The play is an eighteenth century rewrite of Shakespeare's "lost" play Cardenio and as such is a fascinating testament to the original. A short introduction outlines its complex textual history and the arguments for including it within the Shakespeare canon. The Complete Works contains the texts of all Shakespeare's plays, poems and sonnets, edited by leading Shakespeare scholars for the renowned Arden series. A general introduction gives the reader an overall view of how and why Shakespeare has become such an influential cultural icon, and how perceptions of his work have changed in the intervening four centuries. The introduction summarises the known facts about the dramatist's life, his reading and use of sources, and the nature of theatrical performance during his lifetime. Brief introductions to each play, written specially for this volume by the Arden General Editors, discuss the date and contemporary context of the play, its position within Shakespeare's oeuvre, and its subsequent performance history. An extensive glossary explains vocabulary which may be unfamiliar to modern readers.

The Dictionary of International Trade Law book was the first of its kind and remains the indispensable reference that students, scholars, and practitioners around the world frequently consult. This Dictionary defines and explains in detail hundreds of terms -- common and uncommon ones -- used in the field, from the "ACU" and "GMA" to "TIFA" and the "WCO.". Many entries include organizational charts (e.g., the structure of the new Department of Homeland Security) and tables (e.g., of precedent-setting cases on zeroing). Many entries also provide references for further research. Notably, the Dictionary has two Annexes: • Annex A has data on U.S. FTAs, including votes by political party in Congress, on immediate versus deferred duty-free treatment for goods, market access for services, and government procurement thresholds. It also boasts a Note on TPP, which is rich in breadth and depth. • Annex B sets out research tools, such as tables on milestones in Chinese history (from early dynasties through modern legal reforms), EU institutions, and U.S. trade statutes. Like the globally acclaimed book, International Trade Law: An Interdisciplinary, Non-Western Textbook, the Dictionary enjoys both legal and non-legal audiences. That is because the Dictionary pays special attention to practical terms and theoretical concepts from international economics and development studies. Among the highlights of the third edition of the Dictionary are: • Several dozen brand New and Expansive entries for even more thorough coverage. • Updated and expanded material for hundreds of existing entries. • Several hundred Suggestions for Further Research, covering materials published up through the first 20 years of the life of the WTO. • Compilation, synthesis, and analysis of updated data on every one of Japan's FTAs, and of every one of Japan's EPAs. • Updated historical information about milestones in the economic development of the EU and China. In sum, the 1,500-page Dictionary is the user-friendly tool for students, scholars, and practitioners to navigate through and critically analyze the complex jargon and concepts in trade. The eBook versions of this title feature links to Lexis Advance for further legal research options.

An inside look into why Millennials are rejecting careers in politics, and what this means for the future of America's political system Millennials are often publicly criticized for being apathetic about the American political process and their lack of interest in political careers. But what do millennials themselves have to say about the prospect of holding political office? Are they as uninterested in political issues and the future of the American political system as the media suggests? Out of the Running goes directly to the source and draws from extensive research, including over 50 interviews, with graduate students in elite institutions that have historically been a direct link for their graduates into state or federal elected office: Harvard Law, Harvard's Kennedy School of Government, and Boston's Suffolk University Law School. Shauna Shames, herself a young graduate of Harvard University, suggests that millennials are not uninterested; rather, they don't believe that a career in politics is the best way to create change.

Millennials view the system as corrupt or ineffective and particularly skeptical about the fundraising, frenzied media attention, and loss of privacy that have become staples of the American electoral process. They are clear about their desire to make a difference in the world but feel that the "broken" political system is not the best way to do so—a belief held particularly by millennial women and women of color. The implications of Shames' argument are crucial for the future of the American political system—how can a system adapt and grow if qualified, intelligent leaders are not involved? An engaging and accessible resource for anyone who follows American politics, Out of the Running highlights the urgent need to fix the American political system, as an absence of diverse millennial candidates leaves its future in a truly precarious position. In addition, this edition provides an in-depth discussion of the concept of coercive control in domestic violence and its importance in understanding victim needs. Finally, this volume includes international perspectives in order to broaden the reader's understanding of alternative responses to the problem of domestic violence.

This book considers the rapidly evolving, both legally and socially, nature of image-based abuse, for both minors and adults. Drawing mainly from UK data, legislation and case studies, it presents a thesis that the law is, at best, struggling to keep up with some fundamental issues around image based abuse, such as the sexual nature of the crimes and the long term impact on victims, and at worst the case of supporting minors, not fit for purpose. It shows, through empirical and legislative analysis, that the death of education around this topic, coupled with cultural norms, creates a victim blaming culture that extends into adulthood. It proposes both legislative developments and need for wider stakeholder engagement to understand and support victims, and the impact the non-consensual sharing of intimate images can have on their long-term mental health and life in general. The book is of interest to scholar of law, criminology, sociology, police and socio-technical studies, and is also to those who practice law, law enforcement or wider social care role in both child and adult safeguarding.
