THE BATTLE TO SAVE HUMANITY HAS BEGUN. Off the coast of Antarctica, a research vessel discovers a mysterious structure buried deep within an iceberg. Entombed for thousands of years, it can't possibly be man-made. But a secretive and ruthless cabal think they know what it is... and what it means. The Immari have spent millennia preparing for the return of humanity's ancient enemy. Faced with an extinction-level threat, they believe mankind's only chance of survival will mean sacrificing 99.9% of the planet's population. It's a price the Immari are prepared to pay. Geneticist Kate Warner and intelligence agent David Vale may have a chance to avert the looming catastrophe, but only if they can decode the secrets of the Atlantis Gene and unlock the truth about humanity's origins.

Letters and journal entries from a visit to Antarctica, the windiest, coldest, most forbidding region on earth.

Over the years the earth has moved many times under San Francisco. But it has been thirty-eight years since the last strong earthquake. People have forgotten how bad it can be. But soon they will remember. Based on actual events of the 1906 San Francisco earthquake and told from the alternating perspectives of two young friends, the earth dragon awakes chronicles the thrilling story of the destruction of a city, and the heroes that emerge in its wake.

Everything You Need to Know

The Life and Times of the Ant

"And I tell you, if you have the desire for knowledge and the power to give it physical expression, go out and explore," wrote Apsley Cherry-Garrard in the opening chapters of his now classic exploration narrative, *The Worst Journey in the World*. The incredible tale that he tells is of the fated last voyage of Captain Robert Scott and his crew to the outermost reaches of the South Pole on the Terra Nova. Chronicling the journey of the Terra Nova from England in 1910 to New Zealand in 1913, *The Worst Journey in the World* vividly describes the entirety of Scott's harrowing and tragic final expedition. Driven by a lust to investigate the untold scientific knowledge contained within the South Pole, these courageous pioneers embarked on a journey into previously unexplored territory, subjecting themselves to the ultimate physical and mental limits as they traveled the massive expanses of the icy tundra. Cherry-Garrard was a key member of the Terra Nova crew that, in addition to the desire to uncover scientific data, desperately sought to be the first Europeans to reach the South Pole. But the expedition was thwarted at every turn by punishing weather, extreme bad luck, and the intense physical and mental decline of the crew on the final stages of their journey. Confronted by the shattering knowledge that rival explorer Roald Amundsen had reached the South Pole only a few weeks before them, Scott's team then had to negotiate the last stage of their voyage, a doomed attempt which has no equal in peril, disaster, and tragedy. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

The cabin boy on the "Santa Maria" keeps a diary which records his experiences when he sails with Columbus on his first voyage to the New World in 1492.

This New York Times–bestselling exploration of the Arctic, a National Book Award winner, is “one of the finest books ever written about the far North” (Publishers Weekly). “The nation’s premier nature writer” travels to a landscape at once barren and beautiful, perilous and alluring, austere yet teeming with vibrant life, and shot through with human history (San Francisco Chronicle). The Arctic has for centuries been a destination for the most ambitious explorers—a place of dreams, fears, and awe-inspiring spectacle. This “dazzling” account by the author of *Of Wolves and Men* takes readers on a breathtaking journey into the heart of one of the world’s last frontiers (The New York Times). Based on Barry Lopez’s years spent traveling the Arctic regions in the company of Eskimo hunting parties and scientific expeditions alike, *Arctic Dreams* investigates the unique terrain of the human mind, thrown into relief against the vastness of the tundra and the frozen ocean. Eye-opening and profoundly moving, it is a magnificent appreciation of how wilderness challenges and inspires us. Renowned environmentalist and author of *Desert Solitaire* Edward Abbey has called *Arctic Dreams* “a splendid book . . . by a man who is both a first-rate writer and an uncompromising defender of the wild country and its native inhabitants”—and the New Yorker hails it as a “landmark” work of travel writing. A vivid, thoughtful, and atmospheric read, it has earned multiple prizes, including the National Book Award, the Christopher Medal, the Oregon Book Award, and a nomination for the National Book Critics Circle Award. This ebook features an illustrated biography of Barry Lopez including rare images and never-before-seen documents from the author’s personal collection.

"Who Goes There?" is the novella that formed the basis of John Carpenter's film "The Thing." John W. Campbell's classic tells of an antarctic research base that discovers and thaws the ancient, frozen body of a crash-landed alien -- with terrifying results!

The latest in the Understanding the Common Core series covers the structure, terminology, and emphases of the standards for both mathematics and English language arts and literacy at the upper elementary level. Here, teachers of grades 3-5 and elementary school leaders will find the insight they need to turn the standards' new and challenging content into coherent curriculum and effective classroom-level lessons.

Not mighty in size, but mighty in resourcefulness and industry, the ant has crawled the earth since prehistoric times. It has dwelt in rainforest tree trunks and acorns of oak trees, beneath logs, and under sidewalks. It has protected forests by capturing insects, cleared weeds away from accacia trees, and by growing gardens has released important nutrients into the soil. Seed lifters, dirt diggers, social beings, ants have the most advanced brain of all insects! So watch where you step, especially on a warm day: a small but mighty ant may be underfoot.

This engaging retelling of the Southern Sierra Miwok legend features the great Yosemite Valley monolith, El Capitan, and how it came to be. Mother Grizzly Bear thinks that her two playful cubs are wrestling and having fun along the Merced River while she is checking her fish traps. When she returns to join her sons, however, she discovers the cubs are nowhere to be found. It takes an unlikely hero to bring her cubs safely home. Populated with characters based on real Sierra animals, this story is about the value of all beings, the nature of courage, and the idea that being a hero has very little to do with one's size. Includes notes about the life and culture of the Southern Sierra Miwok and a bibliography.

Equal parts adventure and STEM, Rebecca E. F. Barone's *Race to the Bottom of the Earth: Surviving Antarctica* is a thrilling nonfiction book for young readers chronicling two treacherous, groundbreaking expeditions to the South Pole—and includes eye-catching photos of the Antarctic landscape. "Riveting! I raced to the end of this book!" —Alan Gratz, New York Times bestselling author of *Refugee* In 1910, Captain Robert Scott prepared his crew for a trip that no one had ever completed: a journey to the South Pole. He vowed to get there any way he could, even if it meant looking death in the eye. Then, not long before he set out, another intrepid explorer, Roald Amundsen, set his sights on the same goal. Suddenly two teams were vying to be the first to make history—what was to be an expedition had become a perilous race. In 2018, Captain Louis Rudd readied himself for a similarly grueling task: the first unaided, unsupported solo crossing of treacherous Antarctica. But little did he know that athlete Colin O’Brady was training for the same trek—and he was determined to beat Louis to the finish line. For fans of Michael Tougias’ *The Finest Hours*, this gripping account of two history-making moments of exploration and competition is perfect for budding scientists, survivalists, and thrill seekers. “A nail-biting tale of adventure, tragedy, and superhuman determination—and also a luminous example of how our present lives are shaped by our immeasurably deep connection to our past.” —Elizabeth Wein, #1 New York Times bestselling author of *Code Name Verity* “A huge treat for adventure story fans—not one, but two incredible races across the fearsome and fascinating Antarctic!” —Steve Sheinkin, New York Times bestselling author of *Bomb and Undefeated*

"The Narrative of Arthur Gordon Pym of Nantucket" is the only complete novel written by American writer Edgar Allan Poe. The story was inspired by a newspaper account of the shipwreck and subsequent rescue of the two men on board. Poe developed the story into a tale of the young Arthur Gordon Pym, who stows away aboard a whaling ship called the *Grampus*. Yet, it's not the mere adventures that make this book a literary masterpiece. Poe imbued his tale with allegorical richness, biblical imagery, and psychological insights. This novel has influenced numerous writers, including Melville, James, Verne, and Nabokov.

Roals Amundsen (1872–1928), the foremost polar explorer, records his race to be the first man to reach the South Pole.

Providing practical guidance and resources, this book helps teachers harness the power of children’s literature for developing ELLs’ literacy skills and language proficiency. The authors show how carefully selected fiction, nonfiction, and poetry can support students’ learning across the curriculum. Criteria and guiding questions are presented for matching books and readers based on text features, literacy and language proficiency, and student background knowledge and interests. Interspersed throughout are essays and poems by well-known children’s authors that connect in a personal way with the themes explored in the chapters. The annotated bibliography features over 600 engaging, culturally relevant trade titles.

What determines whether complex life will arise on a planet, or even any life at all? Questions such as these are investigated in this groundbreaking book. In doing so, the authors synthesize information from astronomy, biology, and paleontology, and apply it to what we know about the rise of life on Earth and to what could possibly happen elsewhere in the universe. Everyone who has been thrilled by the recent discoveries of extrasolar planets and the indications of life on Mars and the Jovian moon Europa will be fascinated by Rare Earth, and its implications for those who look to the heavens for companionship.

By the #1 New York Times bestselling author of *Killers of the Flower Moon*, a powerful true story of adventure and obsession in the Antarctic, lavishly illustrated with color photographs Henry Worsley was a devoted husband and father and a decorated British special forces officer who believed in honor and sacrifice. He was also a man obsessed. He spent his life idolizing Ernest Shackleton, the nineteenth-century polar explorer, who tried to become the first person to reach the South Pole, and later sought to cross Antarctica on foot. Shackleton never completed his journeys, but he repeatedly rescued his men from certain death, and emerged as one of the greatest leaders in history. Worsley felt an overpowering connection to those expeditions. He was related to one of Shackleton’s men, Frank Worsley, and spent a fortune collecting artifacts from their epic treks across the continent. He modeled his military command on Shackleton’s legendary skills and was determined to measure his own powers of endurance against them. He would succeed where Shackleton had failed, in the most brutal landscape in the world. In 2008, Worsley set out across Antarctica with two other descendants of Shackleton’s crew, battling the freezing, desolate landscape, life-threatening physical exhaustion, and hidden crevasses. Yet when he returned home he felt compelled to go back. On November 13, 2015, at age 55, Worsley bid farewell to his family and embarked on his most perilous quest: to walk across Antarctica alone. David Grann tells Worsley’s remarkable story with the intensity and power that have led him to be called “simply the best narrative nonfiction writer working today.” Illustrated with more than fifty stunning photographs from Worsley’s and Shackleton’s journeys, *The White Darkness* is both a gorgeous keepsake volume and a spellbinding story of courage, love, and a man pushing himself to the extremes of human capacity.
