But the 'curse' that surrounds it, which Kurin puts to rest once and for all, is only one small piece of a long and lustrous story that moves between ancient religion and modern magic, royal power and class rivalry, revenge and greed. Richly illustrated, Hope Diamond works in a grand historical

A Practical Guide to the Antiquarian Book Market

Antique silver is one of the oldest and best loved collecting subjects. At the top end of the quality scale, the work that went into making a fine piece was of an extremely high order. However, the majority of silver was used in the middle levels of British society and the collector has clearly to understand the varying qualities of production that he encounters if he is to buy well and avoid inferior pieces.

A scientific study that keeps in mind the needs of butterfly collectors and of all those who love the country in the hope that it may increase their pleasure by widening the scope of their interests. This edition is exclusive to newnaturalists.com Dr Ford, the author of this fascinating volume on butterflies, was an enthusiastic butterfly

collector in his youth. He was not only a professional biologist of great distinction but also brought his wide knowledge of genetics and evolution to bear on the problems arising out of his collecting. Thus he was able to see butterflies both as an absorbing hobby and as part of the great panorama of biology. The resultant book is an outstanding contribution to Natural History in the best sense of the term. Natural History is not something inferior to science - it is part of science, inviting an approach by way of field study. While, therefore, Dr Ford's book contains a somewhat higher proportion of scientific history and technical ideas than most books on Natural History, this for the great majority of amateurs will be a stimulus rather than an obstacle, and throughout the author has kept in
