"This Fan, then, of which the text runs or winds across the coloured prints of the volume, is not by any means a work of mighty wisdom and erudition ... it was in dreaming of the publication of many volumes under the collective title of 'Woman's ornaments, that I ... write The fan, which opens the series of these little books on the boudoir.'"--Pref.

*Preserved in a single manuscript in the British library, the *Life of Saint Audrey or Vie Seinte Audree* is the story of an Anglo-Saxon princess, who, though twice married, remains a virgin until her death. Her tale reveals that spiritual marriage was not an easy path to sainthood, particularly with an unwilling husband. The text is a fine example of what some critics have called a hagiographical romance--a saint's life that borrows many characteristics from secular romance. Recent scholarship, thoroughly discussed in this book's introduction, suggests that the *Vie Seinte Audree* is a fourth text by Marie de France, to whom the *Fables*, the *Lais*, and the *Espurgatoire Seint Patriz* have been attributed. Written in the late twelfth or early thirteenth century, the *Vie Seinte Audree* is published here for the first time in English, along with the Old French text. The editors of this new edition provide helpful material on the life of the historical Saint Etheldreda (as St. Audrey is called in Latin) and her Anglo-Saxon world. They also discuss women's writing in Anglo-Norman England as well as the subject of spiritual marriage. In addition, they examine secondary sources that have focused on the *Vie Seinte Audree*. A map of seventh-century England, a table of proper names and a genealogical chart of the Royal Lineage of Saint Audrey are all included.*

*Over the past two decades, scholarship in architectural history has transformed, moving away from design studio pedagogy and postmodern historicism to draw instead from trends in critical theory focusing on gender, race, the environment, and more recently global history, connecting to revisionist trends in other fields. With examples across space and time—from medieval European coin trials and eighteenth-century Haitian revolutionary buildings to Weimar German construction firms and present-day African refugee camps—*Writing Architectural History* considers the impact of these shifting institutional landscapes and disciplinary positionings for architectural history. Contributors reveal how new methodological approaches have developed interdisciplinary research beyond the traditional boundaries of art history departments and architecture schools, and explore the challenges and opportunities presented by conventional and unorthodox forms of evidence and narrative, the tools used to write history.*

*Practical Language Testing equips you with the skills, knowledge and principles necessary to understand and construct language tests. This intensely practical book gives guidelines on the design of assessments within the classroom, and provides the necessary tools to analyse and improve assessments, as well as deal with alignment to externally imposed standards. Testing is situated both within the classroom and within the larger social context, and readers are provided the knowledge necessary to make realistic and fair decisions about the use and implementation of tests. The book explains the normative role of large scale testing and provides alternatives that the reader can adapt to their own context. This fulfils the dual purpose of providing the reader with the knowledge they need to prepare learners for tests, and the practical skills for using assessment for learning. *Practical Language Testing* is the ideal introduction for students of applied linguistics, TESOL and modern foreign language teaching as well as practicing teachers required to design or implement language testing programmes. The book is supported by frequently updated online resources at <http://languagetesting.info/> including sets of scenarios providing resources to study aviation English assessment, call centre assessment, military language assessment, and medical language assessment. The materials can be used to structure debates and seminars, with pre-reading and video activities. *Practical Language Testing* was commended as a 2012 runner-up of the prestigious SAGE/ILTA Award for Best Book on Language Testing.*

Fears of a Setting Sun

Printing Images in Antwerp

Why do early films present the Netherlands as a country full of canals and windmills, where people wear traditional costumes and wooden shoes, while industries and modern urban life are all but absent? Images of Dutchness investigates the roots of this visual repertoire from diverse sources, ranging from magazines to tourist brochures, from anthropological treatises to advertising trade cards, stereoscopic photographs, picture postcards, magic lantern slide sets and films of early cinema. This richly illustrated book provides an in-depth study of the fascinating corpus of popular visual media and their written comments that are studied for the first time. Through the combined analysis of words and images, the author identifies not only what has been considered "typically Dutch" in the long nineteenth century, but also provides new insights into the logic and emergence of national clichés in the Western world.

Pluck has a little red tow truck. He drives it all over town looking for a place to live. Then Dolly the pigeon tells him that the tower of the Pill Building is empty. In the Pill Building, Pluck meets Mr. Penn and Zaza the cockroach. Pluck makes lots more friends and solves all kinds of problems. But the biggest problem is Dove Grove. It used to be a garden with tall trees, but it has been neglected and gone wild. Grown-ups never go there, but the kids from the Pill Building love playing there. But now the Park Superintendent has decided to chop down the trees to make a paved square. Pluck and his friends try to save Dove Grove. But first he has to rescue Longmount from the canal.

You read about it every day: How can we create a sustainable, reliable and affordable energy supply? Does a local water supply play a role in this? Why don't we drive hydrogen cars that are powered by the sun and rain? The availability of cheap green energy is increasing. . We have solar and wind power, and even energy derived from ambient heat. At the same time we have very diverse energy needs: fuel for cars, electricity, heat for buildings, feedstock

for industrial processes, to name just a few. Energy supply and demand do not match, which means that we have to match resources, storage and consumption in an intelligent way. Solar Power to the People casts a thoughtful vision on sustainable energy. We have to bring the power of the sun to the people. That is what sustainable energy and water is all about. The authors believe we have to act quickly. The matter is urgent.

In addition, the series will include re-editions or entirely new translations into English of 'classic' accounts in the field which have been out of print for many years and have become rare books even in larger university libraries. Each of these new editions will be prefaced by an introductory essay by a present-day specialist in the discipline who will place the book in its original historical context and analyze its significance in the light of contemporary work in the history of linguistic thought

The Activist Drawing

The Story of My Baldness

The surprising story of how George Washington, Alexander Hamilton, John Adams, and Thomas Jefferson came to despair for the future of the nation they had created. Americans seldom deify their Founding Fathers any longer, but they do still tend to venerate the Constitution and the republican government that the founders created. Strikingly, the founders themselves were far less confident in what they had wrought, particularly by the end of their lives. In fact, most of them—including George Washington, Alexander Hamilton, John Adams, and Thomas Jefferson—came to deem America's constitutional experiment an utter failure that was unlikely to last beyond their own generation. Fears of a Setting Sun is the first book to tell the fascinating and too-little-known story of the founders' disillusionment. As Dennis Rasmussen shows, the founders' pessimism had a variety of sources: Washington lost his faith in America's political system above all because of the rise of partisanship, Hamilton because he felt that the federal government was too weak, Adams because he believed that the people lacked civic virtue, and Jefferson because of sectional divisions laid bare by the spread of slavery. The one major founder who retained his faith in America's constitutional order to the end was James Madison, and the book also explores why he remained relatively optimistic when so many of his compatriots did not. As much as Americans today may worry about their country's future, Rasmussen reveals, the founders faced even graver problems and harbored even deeper misgivings. A vividly written account of a chapter of American history that has received too little attention, Fears of a Setting Sun will change the way that you look at the American founding, the Constitution, and indeed the United States itself.

The notion of citizenship has gradually evolved from being simply a legal status or practice to a deep sentiment. Belonging, or feeling at home, has become a requirement. This groundbreaking book analyzes how 'feeling rules' are developed and applied to migrants, who are increasingly expected to express feelings of attachment, belonging, connectedness and loyalty to their new country. More than this, however, it demonstrates how this culturalization of citizenship is a global trend with local variations, which develop in relation to each other. The authors pay particular attention to the intersection between sexuality, race and ethnicity, spurred on by their awareness of the dialectical construction of homosexuality, held up as representative of liberal Western values by both those in the West and by African leaders, who use such claims as proof that homosexuality is un-African. The true cost of what the global food industry throws away. With shortages, volatile prices and nearly one billion people hungry, the world has a food problem—or thinks it does. Farmers, manufacturers, supermarkets and consumers in North America and Europe discard up to half of their food—enough to feed all the world's hungry at least three times over. Forests are destroyed and nearly one tenth of the West's greenhouse gas emissions are released growing food that will never be eaten. While affluent nations throw away food through neglect, in the developing world crops rot because farmers lack the means to process, store and transport them to market. But there could be surprisingly painless remedies for what has become one of the world's most pressing environmental and social problems. Waste traces the problem around the globe from the top to the bottom of the food production chain. Stuart's journey takes him from the streets of New York to China, Pakistan and Japan and back to his home in England. Introducing us to foraging pigs, potato farmers and food industry CEOs, Stuart encounters grotesque examples of profligacy, but also inspiring

innovations and ways of making the most of what we have. The journey is a personal one, as Stuart is a dedicated freegan, who has chosen to live off of discarded or self-produced food in order to highlight the global food waste scandal. Combining front-line investigation with startling new data, Waste shows how the way we live now has created a global food crisis—and what we can do to fix it.

Printed Maps of Scandinavia and the Arctic, 1482–1601, the first scholarly cartobibliography of the far north, presents a thorough and systematic survey of the subject. Each woodblock and copperplate map of the region is described in an illustrated entry that discusses the cartographer, publishing history, and cartography of the map. To the extent practicable, all states, variants, and editions of the maps have been identified and differentiated. The inclusion of contemporary related maps and later derivations in the essays contributes to the context and completeness of the entries.

Comparative Analyses of Operating Hours and Working Times in the European Union

Reporting on the Kennedy Assassination

From "Empire" by Invitation to Transatlantic Drift

In 1624 the Dutch West India Company established the colony of Brazil. Only thirty years later, the Dutch Republic handed over the colony to Portugal, never to return to the South Atlantic. Because Dutch Brazil was the first sustained Protestant colony in Iberian America, the events there became major news in early modern Europe and shaped a lively print culture. In *Amsterdam's Atlantic*, historian Michiel van Groesen shows how the rise and tumultuous fall of Dutch Brazil marked the emergence of a "public Atlantic" centered around Holland's capital city. Amsterdam served as Europe's main hub for news from the Atlantic world, and breaking reports out of Brazil generated great excitement in the city, which reverberated throughout the continent. Initially, the flow of information was successfully managed by the directors of the West India Company. However, when Portuguese sugar planters revolted against the Dutch regime, and tales of corruption among leading administrators in Brazil emerged, they lost their hold on the media landscape, and reports traveled more freely. Fueled by the powerful local print media, popular discussions about Brazil became so bitter that the Amsterdam authorities ultimately withdrew their support for the colony. The self-inflicted demise of Dutch Brazil has been regarded as an anomaly during an otherwise remarkably liberal period in Dutch history, and consequently generations of historians have neglected its significance. *Amsterdam's Atlantic* puts Dutch Brazil back on the front pages and argues that the way the Amsterdam media constructed Atlantic events was a key element in the transformation of public opinion in Europe.

Structure for Architects: A Case Study in Steel, Wood, and Reinforced Concrete Design is a sequel to the authors' first text, *Structure for Architects: A Primer*, emphasizing the conceptual understanding of structural design in simple language and terms. This book focuses on structural principles applied to the design of typical structural members—a beam, a girder, and a column—in a diagrammatic frame building. Through the application of a single Case Study across three key materials, the book illustrates the theory, principles, and process of structural design. The Case Study progresses step-by-step for each material, from determining tributary areas and loads through a member's selection and design. The book addresses the frequent disparity between the way architects and engineers perceive and process information, with engineers focusing on technical aspects and architects focusing on visual concepts. *Structure for Architects: A Case Study in Steel, Wood, and Reinforced Concrete Design* presents readers with an understanding of fundamental engineering principles through a uniquely thematic Case Study. Focusing on the conceptual understanding of structural design, this book will be of interest to architecture students and professionals looking to understand the application of structural principles in relation to steel, wood, and concrete design.

Iran, 1969. In the house of the mosque, the family of Aqa Jaan has lived for eight centuries. The house teems with life, played out under the watchful eyes of the storks that nest on the minarets above. But this family will experience upheaval unknown to previous generations. For in Iran, political unrest is brewing. The shah is losing his hold on power; the ayatollah incites rebellion from his exile in France; and one day the ayatollah returns. The consequences will be felt in every corner of Aqa Jaan's family.

The Chemical Challenge to Medical and Scientific Tradition in Early Modern France

Early Reactions to Cartesian Philosophy, 1637-1650

Theo Verbeek provides the first book-length examination of the initial reception of Descartes's written works. Drawing on his research of primary materials written in Dutch and Latin and found in libraries all over Europe, even including the Soviet Union, Theo Verbeek opens a period of Descartes's life and of the development of Cartesian philosophy that has been virtually closed since Descartes's death. Verbeek's aim is to provide as complete a picture as possible of the discussions that accompanied the

introduction of Descartes's philosophy into Dutch universities, especially those in Utrecht and Leiden, and to analyze some of the major problems that philosophy raised in the eyes of Aristotelian philosophers and orthodox theologians. The period covered extends from 1637, the year in which Descartes published his Discours de la Méthode, until his death in 1650. Verbeek demonstrates how Cartesian philosophy moved successfully into the schools and universities of Holland and how this resulted in a real evolution of Descartes's thought beyond the somewhat dogmatic position of Descartes himself. Verbeek further argues that this progression was an essential step in the universal propagation of Cartesian philosophy throughout Europe during the second half of the seventeenth century. As he details the disputes between Cartesians and anti-Cartesians in Holland, Verbeek shows how the questions raised were related on the one hand to religious conflicts between the Remonstrants and the Orthodox Calvinists and on the other hand to political conflicts between more liberal factions fighting for the union of church and state to enhance religious control of society in general. Contending that Descartes and Cartesian philosophy were central to the development of the modern Dutch state, Verbeek illuminates the role they played in Dutch political, religious, and intellectual life.

Based on new and existing research by a world-class scholar, this is the first book in twenty years to examine the dynamics of the entire American-West European relationship since 1945. The relationship between the United States and Western Europe has always been crucial and recent events dictate that it is becoming ever more so. In this important new work, Geir Lundestad analyses the balance between the cooperation and conflict which has characterized this relationship in the post-war period. He examines talk of transatlantic drift, and the strain now apparent between the USA and the nation states of Western Europe. In the concluding section, Lundestad offers a topical view of the future of transatlantic interaction. Throughout the work Lundestad's much cited 'empire by invitation' thesis is both put into practice and extended in time and scope. This book is essential reading for anyone interested in one of the most important and enduring international relationships of the last sixty years.

The scientific revolution of the sixteenth and seventeenth centuries is normally characterised in terms of astronomy and the physics of motion. In The French Paracelsians, first published in 1992, Allen Debus narrates an important episode whose contribution to the scientific revolution has been largely ignored: the long-standing contention between Paracelsians and Galenists.

Dutch journalist William Oltmans recounts his decade-long investigation of the Kennedy assassination in a combination of personal memoir and factual reporting.

Growth and Structure of the English Language

Ibrahim offers Momo his ear and advice, and gradually teaches the precocious boy that there is more to life than whores and stealing groceries. When Momo's father, an aggressive lawyer who neglects his son's well being, disappears and is found dead, Ibrahim adopts the newly orphaned boy.

Holland on the Hudson traces the history of New Netherland from Henry Hudson's exploration of the region in 1609 to the surrender of the Dutch colony to an Englishman. Oliver A. Rink's approach is both narrative and analytic as he describes in detail the colony's commercial origins, its social and economic development, and the colonists' struggle to become English in the New World.

In this darkly funny novel, an obsessive Viennese philosophy student is in search of l'amour.

Lou Bertignac has an IQ of 160 and a good friend called Lucas, who gets her through the school day. At home her father cries in secret in the bathroom and her mother is unable to run the house properly for years. But Lou is about to change her life - and that of her parents - for good, all because of a school project she decides to do about the English language. For the project Lou meets No, a teenage girl living on the streets. As their friendship grows, Lou cannot bear that No is still on the streets when she goes back home - even though No is saddened and desolate. So she asks her parents if No can come to live with them. To her astonishment, her parents - eventually - agree. No's presence forces Lou and her parents to finally face the sadness that has enveloped them. But No has disruptive as well as positive effects. Can this shaky newfound family continue to live together? A tense

tackling the true meaning of home and homelessness.

The Culturalization of Citizenship

An Economic and Social History of Dutch New York

A Text by Marie de France

The Dutch in Brazil, 1624-1654

Tree Story

The French Paracelsians

In the past 20 years, a wave of right-wing populist movements has swept over Europe, changing the face of European politics. The Netherlands has been one of the more iconic countries to pass internationally as an emblem of progressivism and tolerance, the country soon became a frontrunner in the revival of nationalist and anti-immigrant sentiment. This is the first study to offer an analysis of the ideas behind the Dutch swing to the right. The emergence of Dutch populism, this book shows, formed an integral part of a broader conservative tendency, identified as the Dutch New Right. The term New Right has been used to describe conservative backlash movements that arose in opposition to the progressive movements of the 1960s. The Dutch swing to the right, this book argues, is part of the New Right backlash that occurred overseas. This text will be essential reading for students and scholars in the fields of European Studies and Political Science, and Dutch politics and society.

A reconsideration of Constant Nieuwenhuys's visionary architectural project, New Babylon, and of the role of drawing in an electronic age.

In this survey, Arthur der Weduwen and Andrew Pettegree have brought together the first 6,000 advertisements placed in Dutch and Flemish newspapers between 1620 and 1675. Provided here with an introduction and accompanied by seven indices, this work provides for the first time a complete overview of the development of newspaper advertising, highlighting its impact on the Dutch book trade, economy and society.

Trouet delights us with her dedication to the tangible appeal of studying trees, a discipline that has taken her to austere and beautiful landscapes around the globe and has enabled scientists to learn more about the planet of Earth and its human inhabitants.

Do you want to learn how to use python for beginners in a simple way? Do you want to enter into the new world of Python for beginners in an efficient and effective way? This book will teach you the basics as well as the advanced concepts of computers and programming. The gaming industry is growing rapidly and Python offers a lot of libraries to create games. Many tech giants rely on Python to deliver world-class applications. In This book you will learn: Machine Learning Algorithms Basics of Python getting started with machine learning what is machine learning Installing machine libraries in your system Supervised Machine Learning for Discrete Class Label Machine learning methods K-Nearest Neighbors Decision Tree Support Vector Machine Naive Bayes Classification Logistic Regression Neural Network Regression Models Unsupervised Machine Learning Supervised Machine Learning for Continuous Class Label Understanding and challenges Dimension Reduction Clustering Models Working with Text Data Representing Text Data as bags of words Stopwords Machine Learning Real World Applications Machine Learning Real World Applications Representing Text Data as bags of words Stopwords Working with Text Data Understanding and challenges Dimension Reduction Clustering Models Unsupervised Machine Learning Regression Models Supervised Machine Learning for Continuous Class Label K-Nearest Neighbors Decision Tree Support Vector Machine Naive Bayes Classification Logistic Regression Neural Network Supervised Machine Learning for Discrete Class Label Machine learning methods What is machine learning Installing machine libraries in your system Getting Started with Machine learning This book is not just a startup guide. This book will prove beneficial for years to come. The book has the latest codes and techniques so you can equip your skills according to the current market challenges. After all, the purpose is to land a nicely paid job in a globally recognized firm. This book will help you reach that goal! Most people can learn how to code but not just anyone can code smartly. This book is going to help you to think out of the box and take on problems with a completely different perspective. The tricks mentioned will make you invaluable to any software development firm. Even if you don't have any skills this book help you step by step to achieve your goal in a few days you will be able to learn it. scroll up and buy now

This volume is the second book based on comparative and comprehensive data from the 2003 representative European Union Company survey of Operating hours, Working times and Employment (EUCOWE) in France, Germany, the Netherlands, Portugal, Spain and the United Kingdom. The EUCOWE project is the first representative and standardised European company survey which covers all categories of firm sizes and all sectors of the economy. This volume complements and builds on the first book published in 2007, in which the methodology and the descriptive national findings as well as some first comparative analytical results were presented. In this second book the EUCOWE research team presents in-depth cross-country analyses of the relationship between operating hours, working times and employment in the European Union. Six empirical chapters of this volume provide detailed comparative analyses of the determinants and consequences of the

duration and flexibility of opening hours and operating times.

Flowers are beautiful and fragrant, and they're also a key stage in a plant's life cycle. This age-appropriate text introduces readers to the basic anatomy of a flower, which is supported by highly detailed color photographs. Readers will understand fundamental life science concepts, such as the relationship between flowers and pollinators and how flowers play a role in producing the next generation of plants. This text offers a fun-yet-educational take on important classroom concepts, which is sure to get readers excited to learn about plants.

. . . the book can be recommended to all with an interest in the issue of older workers in a globalised world. Ageing and Society Early retirement has been a policy to cope with the problems of massive unemployment in many Western welfare states. However, it has become apparent that this strategy is costly and destroys human capital urgently needed in ageing societies. This book offers a comprehensive and up-to-date study of late-career patterns and processes of early retirement in fourteen OECD countries, using both cross-sectional and longitudinal data. It is an important contribution to life-course research and will provide the foundation for any serious discussion on pension reforms and increasing the employability of older workers. Hans-Jürgen Andreß, University of Cologne, Germany This timely book investigates the growth of the early retirement trend and its varying spread among different groups of older workers in fourteen modern societies. It argues for a differentiated political approach to reverse early retirement, which relies on both pension and employability policies for older workers. Examining the early retirement trend virtually all modern societies have been faced with since the onset of the globalization process in the 1970s and 1980s, this book provides a thorough analysis of older workers late careers and their retirement transitions, as well as explaining why this trend has developed differently between nations. To promote an effective reversal of the early retirement trend, national policymakers are advised not to concentrate their efforts exclusively on reducing the financial incentives for an early exit still present in most national pension systems. In addition, it is also recommended that they invest in the employability of older workers, implying a thorough reconsideration of the design of education and labor market policies. Dirk Hofäcker presents a unique and comprehensive synthesis of theories describing and explaining the trend towards early retirement, and critically discusses their comparative advantages and shortcomings. Researchers and students of sociology, economics, gerontology, demography and comparative welfare states should not be without this book and policymakers and practitioners dealing with labor market policies will find it invaluable.

Waste: Uncovering the Global Food Scandal

The new novel by the internationally acclaimed author- "a farce of nuclear proportions" (Vanity Fair) Arnon Grunberg is one of the most subtly outrageous provocateurs in world literature. The Jewish Messiah, which chronicles the evolution of one Xavier Radek from malcontent grandson of a former SS officer, to Jewish convert, to co- translator of Hitler's Mein Kampf into Yiddish, to Israeli politician and Israel's most unlikely prime minister, is his most outrageous work yet. Taking on the most well-guarded pieties and taboos of our age, The Jewish Messiah is both a great love story and a grotesque farce that forces a profound reckoning with the limits of human guilt, cruelty, and suffering. It is without question Arnon Grunberg's masterpiece.
