

Ap Chemistry Chapter 2 Test

The book itself contains chapter-length subject reviews on every subject tested on the AP Chemistry exam, as well as both sample multiple-choice and free-response questions at each chapter's end. Two full-length practice tests with detailed answer explanations are included in the book.

Explains how to prepare for the test, reviews the chemistry concepts and skills necessary for the test, and provides sample questions and three full-length practice exams.

All Access for the AP[®] Chemistry Exam - Completely Revised for the 2014 Exam! Book + Web + Mobile Everything you need to prepare for the Advanced Placement[®] exam, in a study system built around you! There are many different ways to prepare for an Advanced Placement[®] exam.

What's best for you depends on how much time you have to study and how comfortable you are with the subject matter. To score your highest, you need a system that can be customized to fit you: your schedule, your learning style, and your current level of knowledge. This book, and the free online tools that come with it, will help you personalize your AP[®] Chemistry prep by testing your understanding, pinpointing your weaknesses, and delivering flashcard study materials unique to

you. The REA AP® All Access system allows you to create a personalized study plan through three simple steps: targeted review of exam content, assessment of your knowledge, and focused study in the topics where you need the most help. Here's how it works: *Review the Book: Study the Big Ideas tested on the AP® Chemistry exam and learn proven AP® strategies that will help you tackle any question you may see on test day. Test Yourself and Get Feedback: As you review the book, test yourself with 7 end-of-chapter quizzes, plus two mini-tests. Score reports from your free online tests and quizzes give you a fast way to pinpoint what you really know and what you should spend more time studying. Improve Your Score: Armed with your score reports, you can personalize your study plan. Review the parts of the book where you are weakest, and use the REA Study Center to create your own unique AP® Chemistry e-flashcards, adding to the 100 free cards included with this book. Visit The REA Study Center for a suite of online tools: The best way to personalize your study plan and truly focus on your weaknesses is to get frequent feedback on what you know and what you don't. At the online REA Study Center, you can access three types of assessment: topic-level quizzes, mini-tests, and a full-length practice test. Each of these tools provides true-to-format questions and delivers a*

detailed score report that follows the topics set by the College Board®. Topic-Level Quizzes Short, 15-minute online quizzes are available throughout the review and are designed to test your immediate grasp of the topics just covered. Mini-Tests Two online mini-tests cover what you've studied in each half of the book. These tests are like the actual AP® Chemistry exam, only shorter, and will help you evaluate your overall understanding of the subject. Full-Length Practice Test After you've finished reviewing the book, take our full-length AP® Chemistry exam to practice under test-day conditions. Available both in the book and online, this test gives you the most complete picture of your strengths and weaknesses. We strongly recommend that you take the online version of the exam for the added benefits of timed testing, automatic scoring, and a detailed score report. Improving Your Score: e-Flashcards With your score reports from the quizzes and tests, you'll be able to see exactly which AP® Chemistry topics you need to review. Use this information to create your own flashcards for the areas where you are weak. And, because you will create these flashcards through the REA Study Center, you'll be able to access them from any computer or smartphone. Not quite sure what to put on your flashcards? Start with the 100 free cards included when you buy this book. This

complete test prep package comes with a customized study schedule and expert test-taking strategies and tips.

This book, "A Whole Year of Chemistry Quizzes" was written to provide easy to use and grade quizzes to assess the comprehension of honors students, Advance Placement students (AP), and International Baccalaureate (IB) students. This book of quizzes guides the teacher and the student through what is required in a non-watered-down chemistry course that leads students towards test and college readiness. The outline of this book has a minimum of 4 quizzes per chapter that prepares students for the formative assessment associated at the end of all chapters. The 25 chapters include topics that are covered in the honors chemistry setting as

well as specialty topics like thermodynamics, kinetics, rates of reactions that are seen in the Advance Placement classes. Included within this book are quizzes for the International Baccalaureate teacher that wishes to test students on environmental chemistry as well as biological and food chemistry. This is a book that was written to fill the void of valuable resources needed for novice and experienced teachers in institutions that continually push for more summative assessments, higher DOKs, and rapid feedback, while limiting preparation time. As a teacher for over 25 years, I know that any well outlined, structured, and comprehensive resource saves time in additional planning, searching, and preparing. Use this book to help you identify and test students on topics that are important to their comprehension and success with their final test.

THE AYAHUASCA SESSIONS: Conversations with Indigenous Curanderos and Western Shamans, is the companion volume to the critically acclaimed *Aya: a Shamanic Odyssey* by Rak Razam. Richly illustrated with

over 100 black and white photographs, this is a seminal collection of 24 interviews with native Peruvian curanderos, Western shamans, ayahuasqueros and spiritual seekers that drink the potent jungle medicine "ayahuasca." Journalist Rak Razam talks in depth with some of the leading lights of Amazonian shamanism, letting them explain in their own words what they do in their profession and what they think the unprecedented explosion in Western interest forbodes. Includes interviews with Guillermo Aravelo, Percy Garcia, Ron Wheelock, Dennis McKenna, Ph.D, Jan Kounen, Alan Shoemaker, and more. A classic text for those interested in the booming business of ayahuasca tourism,entheogens, spirituality, anthropology and counter-culture studies.

Founded in 1959 with the

purpose of disseminating the most recently developed scientific information to groups in industry, government, high schools, and universities, REA has since become a successful and highly respected publisher of study aids, test preps, handbooks, and reference works. REA's Test Preparation series includes study guides for all academic levels in almost all disciplines. Research & Education Association publishes test preps for students who have not yet completed high school, as well as high school students preparing to enter college. Students from countries around the world seeking to attend college in the United States will find the assistance they need in REA's publications. For college students seeking advanced degrees, REA publishes test preps for many major graduate school admission examinations in a wide variety of disciplines, including engineering, law, and medicine. Students at every level, in every field, with every ambition can find what they are looking for among REA's publications. While most test preparation books present practice tests that bear little resemblance to the actual exams, REA's series presents tests that accurately depict the official exams in both degree of difficulty and types of questions. REA's practice tests are always based upon the most recently administered exams, and include every type of question that can be expected on the actual exams. REA's publications and educational materials are highly regarded and continually receive an unprecedented amount of praise from professionals, instructors, librarians, parents, and students. Our authors are as diverse as the fields represented in the books we publish. They are well-

known in their respective disciplines and serve on the faculties of prestigious high schools, colleges, and universities throughout the United States and Canada.

PREFACE This book provides an accurate and complete representation of the Advanced Placement Examination in Chemistry. Our six practice exams are based on the most recently administered Advanced Placement Chemistry Exams. Each exam is three hours in length and includes every type of question that can be expected on the actual exam. Following each exam is an answer key complete with detailed explanations designed to clarify and contextualize the material. By completing all six exams and studying the explanations which follow, you can discover your strengths and weaknesses and thereby become well prepared for the actual exam. The formulas and tables for the AP Chemistry Exam can be found at the back of this book, beginning on page 417. You will be provided these formulas and tables when you take the actual exam. You should also use this material when taking the practice tests in this book.

ABOUT THE TEST The Advanced Placement Chemistry Examination is offered each May at participating schools and multi-school centers throughout the world. The Advanced Placement Program is designed to allow high school students to pursue college-level studies while attending high school. The participating colleges, in turn, grant credit and/or advanced placement to students who do well on the examinations. The Advanced Placement Chemistry course is designed to be the equivalent of a college introductory chemistry course, often taken by chemistry majors in their first year of college. Since the

test covers a broad range of topics, no student is expected to answer all of the questions correctly. The exam is divided into two sections: 1) Multiple-choice: Composed of 75 multiple-choice questions designed to test your ability to recall and understand a broad range of chemical concepts and calculations. This section constitutes 45% of the final grade and you are allowed 90 minutes for this portion of the exam. Calculators are not permitted for this section of the exam. 2) Free-response section: Composed of several comprehensive problems and essay topics. This section constitutes 55% of the final grade and the student is allowed 90 minutes for this portion of the exam. You may choose from the questions provided. These problems and essays are designed to test your ability to think clearly and to present ideas in a logical, coherent fashion. You can bring an electronic hand-held calculator for use on the 40-minute free-response section. Essay and chemical-reaction questions comprise the last 50 minutes of the test, during which calculators are not permitted. A final note about calculators: Most hand-held models are allowed in the test center; the only notable exceptions are those with typewriter-style (QWERTY) keypads. If you are unsure if your calculator is permitted, check with your teacher or Educational Testing Service.

SCORING

The multiple-choice section of the exam is scored by crediting each correct answer with one point, and deducting only partial credit (one-fourth of a point) for each incorrect answer. Omitted questions receive neither a credit nor a deduction. The essay section is scored by a group of more than 1,000 college and high school

educators familiar with the AP Program. These graders evaluate the accuracy and coherence of the essays accordingly. The grades given for the essays are combined with the results of the multiple-choice section, and the total raw score is then converted to the program's five-point scale: 5 - Extremely well qualified 4 - Well qualified 3 - Qualified 2 - Possibly qualified

This book takes a fresh look at programs for advanced studies for high school students in the United States, with a particular focus on the Advanced Placement and the International Baccalaureate programs, and asks how advanced studies can be significantly improved in general. It also examines two of the core issues surrounding

these programs: they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and the educational research community with a detailed assessment that can be used to guide change within advanced study programs.
