In July 2019, Apple updated the MacBook Air that was originally redesigned in October 2018. Even though there were no major updates to the MacBook Air, the enhancement led to a new butterfly keyboard which utilizes the same updated materials like the 2019 MacBook Pro, some small SSD changes, an improved display with True Tone, and a lower price tag. The MacBook Air has a T2 chip as well as fingerprint sensor for the Touch ID that can be used instead of entering password. This T2 chip is built for enhanced security on the MacBook Air by ensuring a secure boot process through Secure Enclave, and fast data encryption with an SSD controller. The macOS Catalina which was launched in October 2019, is the latest operating system for the Apple Mac family. The new software brought with it several new exciting features that may seem overwhelming even to existing users. Some of these features include the Screen Time,

*division of iTunes into 3 separate apps, using the iPad as a second screen, otherwise known as Sidecar and lots more. This user guide contains detailed steps on how to explore all the new features on your computer along with screenshots to make it easy for you to familiarize yourself with the workings of the macOS Catalina. Whether you are just buying a new Mac device or downloading the new software to your existing device, this book would help you to achieve better and faster productivity. Apple has also released a new iMac (24-inch, 2021) with seven vibrant colors that count the days of the iMac G3 and show Apple's confidence and gameplay, which is to be welcomed. With a nice touch, the Magic Keyboard, Mouse and Trackpad are all the same color as the iMac, and the macOS Big Sur interface elements are the same color. This is a wonderful overall effect. The new iMac has succeeded in being almost as small (and thinner and lighter) than its larger predecessor, in large part because of the biggest change in the hood: it works with the Apple M1 chip instead of the Intel technology. The way was in the MacBook Air (M1, 2020), MacBook Pro 13-inch (M1, 2020) and Mac mini (M1, 2020), Apple's transition to its own silicon has been largely successful. The macOS Big Sur operating system is fast and agile, and the new apps designed for the M1 hardware work perfectly. Previous Intel-based apps equally work well with Apple's Rosetta 2 gadget, and you can also run iOS apps and games, giving you access to thousands of titles. Thanks to the excellent 4.5K Retina display,

excellent speakers and fantastic webcam, it is a joy to work and create on the new iMac. This guide will teach you how to master your iMac [m1 chip 2021] very fast ,this guide is ideal for both pros and newbies.
