The author is an experienced systems and organisational analyst who examined ancient sources with present-day analytical methods to retrieve our ancestors' sciences. This uncovered a general quantum theory offering answers to current questions such as, • Why do galaxies form spiral arms? • Why is the universe expanding at an accelerating rate? • What can travel through a black hole? • What does dark matter do? • Where does dark energy come from? • What does String Theory describe? • Why is it impossible to detect gravitons? • Which other

boson types exist, what do they do, and when is the best time to spot them? This systematic analysis builds on the findings of experts from diverse scientific domains. It examines a selection of ancient traditions and texts in the context of more than 200 artefacts dating from before the Neolithic to pre-Renaissance times. Edward Dennett (1831-1914) produced many books of sound Christian teaching. This volume collects short pieces written in the 1870s and 1880s, from original sources. It brings together basic teaching on the gospel and the Christian path. Mr Dennett had gift in explaining fundamental subjects clearly, and was used to set out the truth in a way which addresses many questions that believers are still asking today - more than 130 years later.
