Seeking validation is a natural and normal part of human behavior. We seek to be validated on what we say, and do, and even how we appear. Children can experience having healthy validation at home and school, or they can have a lack of validation, or even experience being invalidated. The way a child was raised has a huge impact on how he or she seeks validation as an adult. Seeking validation as a young adult or as an adult becomes obsessive when the validation-seeking behavior becomes unconscious and has a pattern, and perhaps a repetition, which may have some negative consequences. The author has labeled that behavior Validation Addiction. The unconscious need for validation in a compulsive or addictive way could have serious consequences on relationships, and careers. Some people who act out this way are masking depression or anxiety, or perhaps have developed this addictive behavior in lieu of alcohol, which may have been a problem in the family of origin. Treatment for this condition will only begin when the person recognizes there is a problem. Cognitive Behavioral Therapy and perhaps medication with an approved anti-depressant

Building on her signature message of using the mind to master difficult emotions, Joyce Meyer focuses on the most destructive, insidious one of all: anger. It is responsible for broken relationships, sleepless nights, high blood pressure and ulcers. It destroys friendships, marriages and families, not to mention peace of mind. Anger is especially hard to handle for many Christians who have learned from childhood that "good Christians

don't get angry." Meyer argues that properly handled, anger is an alert system that something is wrong and needs to be resolved. In her latest book, she delves into the important process of forgiving, explaining its positive impact on the roots, the forms and the results of anger. Why forgive? Joyce explains that forgiving is the only thing that can free one from the terrible turmoil that anger causes to spill over into every part of life. Meyer understands that life will never be fair, but that is not a reason to let anger destroy our well-being and health. This is her guide to navigating that thorny territory and finding true peace.

and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and substance use disorders and brought their perspectives and experience into national discussions about mental health. However over the same 50-year period, positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances. Stigma is a complex social phenomenon based on a relationship between an attribute and a stereotype that assigns undesirable labels, qualities, and behaviors to a person with that attribute. Labeled individuals are then socially devalued, which leads to inequality and discrimination. This report contributes to national efforts to understand and change attitudes, beliefs and behaviors that can lead to stigma and discrimination. Changing stigma in a lasting way will require coordinated efforts, which are based on the best possible evidence, supported at the national level with multiyear funding, and planned and implemented by an effective coalition of representative stakeholders.
