The first full-length study of the reception of John Milton ’ s (1608-74) writings in the Arab-Muslim world, this book examines the responses of Arab-Muslim readers to Milton ’ s works, and in particular, to his epic poem: Paradise Lost. It contributes to knowledge of the history, development, and ways in which early modern writings are read and understood by Muslims. By mapping the literary and more broadly cultural consequences of the censure, translation and abridgement of Milton ’ s works in the Arab-Muslim world, this book analyses the diverse ways in which Arab-Muslims read and understand a range of literary and religious aspects of Milton ’ s writing in light of cultural, theological, socio-political, linguistic and translational issues. After providing an overview of the presence of Milton and his works in the Arab world, each chapter sheds light on how cultural and translational issues shape the ways in which Arab-Muslim readers perceive and understand the characters and motifs of Paradise Lost. Chapters outline the ways in which the figures are currently understood in Milton scholarship, before exploring how they fit into the narrative drama and theology of the poem, and their position in Islamic creed and Arab-Muslim culture. Concurrently, each chapter examines the poem ’ s subject matter in detail, placing particular emphasis on matters of linguistics, theological and cultural translation and accommodation. Chapter conclusions not only summarise the patterns and potentialities of reception, but point towards the practical functions of Arab-Muslim responses to Milton ’ s writing and their contribution to the formation of social ideas.

Apocalypse Secrets: Baha'i Interpretation of the Book of Revelation with 80 Illustrations is a fresh provocative Parallel Interpretation of the Apocalypse or Book of Revelation. The author, John Able MD, is a retired intensive-care physician. He uses Baha'i Writings that interpret parts of the Apocalypse to decode it as a global tale of three millennia now passing through four centuries of the events of religious end-times. It is a tale of the struggles of seven Empires and seven Faiths, of their materialism and militarism, and the resulting mess into which the world is now crestending furiously and fast. These events center on the apocalyptic war waging between the Revelation based of Muslim Militarism that drives the Middle East and the Revelation Babylon of Malignant Materialism that drives the Christian West. The fall of both is inevitable, with economic crises spiraling the globe into a paralytic depression, now triggered by the COVID-19 pandemic and its aftermath. The good news is that spiritual economics will arise and our painful end times into wonderful beginning times. Apocalypse Secrets is a profound and astonishing work in biblical exegesis- real tur de force as a strikingly original, scholarly, remarkably holistic, comprehensive, and rationally consistent interpretation of the Book of Revelation. Able intelligently probes and penetrates many of the great religious mysteries, and cogently argues that Revelation extends far beyond its strictly Middle East Christic origin. It transcends religious dogma, bridges religious faiths, and explains nineteen hundred years of troubling events in Christianity and Islam with amazing clarity and prescience. It is amazingly detailed and thorough. The author's stylish rhetoric is colorful and alive and his book beautifully crafted and researched, making for an engaging, enlightening, and thought-provoking read. In the end, a scholarly Translation Section decodes original Greek and Hebrew sources. Its strikingly lively translation sticks to the intention of the Greek original. It provides an authoritative base for his distinctive Parallel Interpretation. For anyone striving to penetrate the hidden secrets of the Apocalypse, Apocalypse Secrets is a must reading. This exceedingly interesting book will influence many future works about the subject and become a template of understanding and peace for all. After they read it, people who are interested in prophecy will never look at the Book of Revelation the same again. Visit www.apocalypse.info for more.

New Realities in an Ancient Land

It’s no secret that the center of Christianity has shifted from the West to the global South and East. While the truths of the Christian faith are universal, new contexts bring new questions, new understandings, and new expressions. What does this mean for theology? Is the Christian faith not only culturally translatable, but also theologically translatable?Timothy Tennent answers this question with a resounding yes. Theological reflection is alive and well in the majority world church, and these new perspectives need to be heard, considered, and brought into conversation with Western theologians. Global theology can make us aware of our own blind spots and biases. Because of its largely conservative stance, global theology has much to offer toward the revitalization of Western Christianity.Tennent examines traditional theological categories in conversation with theologians from across the globe, making this volume valuable for students, pastors, missionaries, and theologians alike.

This volume presents Theodore Abu Qurrah’s apologetic Christian theology in dialogue with Islam. It explores the question of whether, in his attempt to convey orthodoxy in Arabic to the Muslim reader, Abu Qurrah diverged from creedal, doctrinal Christian theology and compromised its core content. A comprehensive study of the theology of Abu Qurrah and its relation to Islamic and pre-Islamic orthodox Melkite thought has not yet been pursued in modern scholarship. Awwal addresses this gap in scholarship by offering a thorough analytic hermeneutics of Abu Qurrah’s apologetic thought, with specific attention to his theological thought on the Trinity and Christology.

This study takes scholarship beyond attempts at editing and translating Abu Qurrah’s texts and offers scholars, students, and lay readers in the fields of Arabic Christianity, Byzantine theology, Christian-Muslim dialogues, and historical theology an unprecedented scientific study of Abu Qurrah’s theological mind.

The World Yearbook of Education 2010 volume, Education and the Arab World: Political Projects, Struggles, and Geometries of Power, strives to do justice to the complex processes and dynamics behind the world of Arab education. Western interest in all things Arab has greatly increased over the course of the decade, but this interest runs the risk of forgetting that the Arab world is positioned within wider contexts of regional, geopolitical, and global processes. This volume examines Arab education in a range of contexts regional, diasporic, and trans-national to better understand how the field of Arab education is formed through local, regional, geopolitical and global engagements and resonances. In doing so, contributors from a range of disciplines open critical conversations about the intersections of history, culture, geopolitics, policy, and education. The World Yearbook of Education 2010 offers new conceptual and empirical approaches that deal with some of the often-neglected aspects of the study of Arab education: contested political projects; struggles towards emancipation, recognition and liberation; and a larger concern for social justice, equity, and political inclusion. Books and Readers in the Premodern World

From the first centuries of Islam to well into the Middle Ages, Jews and Christians produced hundreds of manuscripts containing portions of the Bible in Arabic. Until recently, however, these translations remained largely neglected by Biblical scholars and historians. In telling the story of the Bible in Arabic, this book casts light on a crucial transition in the cultural and religious life of Jews and Christians in Arabic-speaking lands. In pre-Islamic times, Jewish and Christian scriptures circulated orally in the Arabic-speaking milieu. After the rise of Islam—and the Qur’an’s appearance as a scripture in its own right—Jews and Christians translated the Hebrew Bible and the Greek New Testament into Arabic for their own use and as a response to the Qur’an’s retelling of Biblical narratives. From the ninth century onward, a steady stream of Jewish and Christian translations of the Hebrew Bible and New Testament crossed communal borders to influence the Islamic world. The Bible in Arabic offers a new frame of reference for the pivotal place of Arabic Bible translations in the religious and cultural interactions between Jews, Christians, and Muslims.

When Roger H. Guichard Jr. discovered a French translation of the works of Carsten Niebuhr, sole survivor of the 1761-1767 Royal Danish Expedition to the Yemen, he was astounded. They were not just another dry account of one man’s travels, but represented the record of a serious intellectual enterprise involving Enlightenment science, sacred philology, the Bible as history, ‘Orientalism’, Egyptology, and discovery’. Having translated them from French to English, and then cross-referenced his translations with the original German texts, ‘Niebuhr in Egypt’ is not, as one might expect, simply a presentation of his translation. Instead Guichard offers his readers an account of the expedition’s year in Egypt, with lengthy excursions into the several subplots- Enlightenment science, the Bible as history, and Egyptology - that he found so engaging in the original works. This is not a scholarly work but would appeal to anyone with an interest in any of the areas mentioned or simply to anyone interested in this country’s past and present. When Sultan bin Salman left Earth on the shuttle Discovery in 1985, he became the first Arab, first Muslim and first member of a royal family in space. Twenty-five years later, the discovery of a planet 500 light years away by the Qatar Exoplanet Survey - subsequently named ‘Qatar-1b’ - was evidence of the cutting-edge space science projects taking place across the Middle East. This book identifies the individuals, institutions and national ideologies that enabled Arab astronomers and researchers to gain support for space exploration when Middle East governments lacked interest. Jorg Matthias Determann shows that the conquest of space became associated with national prestige, security, economic growth and the idea of an ‘Arab renaissance’ more generally. Equally important to this success were international collaborations: to benefit from American and Soviet expertise and technology. Arab scientists and officials had to commit to global governance of space and the common interests of humanity. Challenging the view that the golden age of Arabic science and cosmopolitanism was situated in the medieval period, Determann tells the story of the new discoveries and scientific collaborations taking place from the 19th century to the present day. An innovative contribution to Middle East studies and history of science, the book also appeals to increased business, media and political interest in the Arab space industry.

Jews and Muslims in the Arab World highlights the effects of historical memory on the Arab-Israel conflict, demonstrating that both Jews and Arabs use stories of distant pasts to create their identities and shape their politics. Whether real or imagined, the past filtered through their collective memories has had and will continue to have enormous influence on how Jews and Arabs perceive themselves and each other. What Jesus as his teachings mean to contemporary Buddhists, Hindus, Muslims, Jews, and Christians in the context of their traditions and in their personal faith experiences.

Theology in the Context of World Christianity

An accessible point of entry into the rich medieval religious landscape of Jewish biblical exegesis • Medieval Judeo-Arab translations of the Hebrew Bible and their commentaries provide a rich source for understanding a formative period in the intellectual, literary, and cultural history and heritage of Jews in Islamic lands. The carefully selected texts in this volume offer intriguing insight into Arabic translations and commentaries by Rabbanite and Karaite Jewish exegetes from the tenth to the twelfth centuries CE, arranged according to the three divisions of the Torah, the Former and Latter Prophets, and the Writings.

Each text is embedded within an essay discussing its exegetical context, reception, and contribution. Features: Focus on underrepresented medieval Jewish commentators of the Eastern world A list of additional resources, including major Judeo-Arabic commentators in the medieval period Previously unpublished texts from the Cairo Geniza

Reveals the true role of James, the brother of Jesus, in early Christianity • Uses evidence from the canonical Gospels, apocryphal texts, and the writings of the Church Fathers to reveal the teachings of Jesus as transmitted to his chosen successor, James • Demonstrates how the core message in the teachings of Jesus is an expansion not a repudiation of the Jewish religion • Shows how James can serve as a bridge between Christianity, Judaism, and Islam James has been a subject of controversy since the founding of the Church. Evidence that Jesus had siblings contradicts Church dogma on the virgin birth, and James is also a symbol of Christian teachings that have been obscured. While Peter is traditionally thought of as the leader of the apostles and the “rock” on which Jesus built his church, Jeffrey Bütz shows that it was James who led the disciples after the crucifixion. It was James, not Peter, who guided them through the Church’s first major theological crisis—Paul’s interpretation of the teachings of Jesus. Using the canonical Gospels, writings of the Church Fathers, and apocryphal texts, Bütz argues that James is the most overlooked figure in the history of the Church. He shows how the core teachings of Jesus are firmly rooted in Hebraic tradition; reveals the bitter battles between James and Paul for ideological supremacy in the early Church; and explains how Paul’s interpretations, which became the foundation of the Church, are in many ways its betrayal. Bütz reveals a picture of Christianity and the true meaning of Christ’s message that are sometimes at odds with established Christian doctrine and concludes that James can serve as a desperately needed missing link between Christianity, Judaism, and Islam to heal the wounds of centuries of enmity.

Wissam S. Yafi argues that there are four dynamics leading to inevitable change in the Arab region: geopolitical, socioeconomic, geosocial, and technological. Yafi comes to the conclusion that no system will be able to support the dynamics in place except for democracy.

TO UNDERSTAND MY MESSAGE CORRECTLY THE KEY FOR IT IS I AM THE SECOND APPARET GOD LOVES OMER AND OMER LOVES GOD These two things have been written by my hand by itself when I was isolated in my sisters house.

Understand where we came from. Whether you're an avid student of the Bible or a skeptic of its relevance, *The Book That Made Your World* will transform your perception of its influence on virtually every facet of Western civilization. Indian philosopher Vishal Mangalwadi reveals the personal motivation that fueled his own study of the Bible and systematically illustrates how its precepts became the framework for societal structure throughout the last millennium. From politics and science, to academia and technology, the Bible's sacred copy became the key that unlocked the Western mind. Through Mangalwadi's wide-ranging and fascinating investigation, you'll discover: What triggered the West's passion for scientific, medical, and technological advancement How the biblical notion of human dignity informs the West's social structure and how it intersects with other worldviews How the Bible created a fertile ground for women to find social and economic empowerment How the Bible has uniquely equipped the West to cultivate compassion, human rights, prosperity, and strong families The role of the Bible in the transformation of education How the modern literary notion of a hero has been shaped by the Bible's archetypal protagonist Journey with Mangalwadi as he examines the origins of a civilization's greatness and the misguided beliefs that threaten to unravel its progress. Learn how the Bible transformed the social, political, and religious institutions that have sustained Western culture for the past millennium, and discover how secular corruption endangers the stability and longevity of Western civilization. Endorsements: “This is an extremely significant piece of work with huge global implications. Vishal brings a timely message.” (Ravi Zacharias, author, *Walking from East to West and Beyond Opinion*) “In polite society, the mere mention of the Bible often introduces a certain measure of anxiety. A serious discussion on the Bible can bring outright contempt. Therefore, it is most refreshing to encounter this engaging and informed assessment of the Bible's profound impact on the modern world. Where Bloom laments the closing of the American mind, Mangalwadi brings a refreshing optimism.” (Stanley Mattson, founder and president, C. S. Lewis Foundation) “Vishal Mangalwadi recounts history in very broad strokes, always using his cross-cultural perspectives for highlighting the many benefits of biblical principles in shaping civilization.” (George Marsden, professor, University of Notre Dame; author, *Fundamentalism and American Culture*)

One of the most common religious practices among medieval Eastern Christian communities was their devotion to venerating crosses and crucifixes. Yet many of these communities existed in predominantly Islamic contexts, where the practice was subject to much criticism and often resulted in accusations of idolatry. How did Christians respond to these allegations? Why did they advocate the preservation of a practice that was often met with confusion or even contempt? To shed light onto these questions, Charles Tieszen looks at every known apologetic or polemical text written between the eighth and fourteenth centuries to include a relevant discussion. With sources taken from across the Mediterranean basin, Egypt, Syria and Palestine, the result is the first in-depth look at a key theological debate which lay at the heart of these communities' religious identities. By considering the perspectives of both Muslim and Christian authors, *Cross Veneration in the Medieval Islamic World* also raises important questions concerning cross-cultural debate and exchange, and the development of Christianity and Islam in the medieval period. This is an important book that will shine much needed light onto Christian-Muslim relations, the nature of inter-faith debates and the wider issues facing the communities living across the Middle East during the medieval period.

How the billionaire owners of Hobby Lobby are spending hundreds of millions of dollars to make America a "Bible nation" The Greens of Oklahoma City—the billionaire owners of the Hobby Lobby chain of craft stores—are spending hundreds of millions of dollars in an ambitious effort to increase the Bible's influence on American society. In *Bible Nation*, Candida Moss and Joel Baden provide the first in-depth investigative account of the Greens' sweeping Bible projects. Moss and Baden tell the story of the Greens' efforts to place Bible curriculum in public schools; their rapid acquisition of an unparalleled collection of biblical antiquities; their creation of a closely controlled group of scholars to study and promote the collection; and their construction of a \$500 million Museum of the Bible in Washington, D.C. Revealing how all these initiatives promote a very particular set of beliefs about the Bible, the book raises serious questions about the trade in biblical antiquities, the integrity of academic research, and the place of private belief in public life.

The Oxford Handbook of Medieval Latin Literature

A book about the role of books in shaping the ancient religious landscape This collection of essays by leading scholars from a variety of academic disciplines explores the ongoing relevance of Harry Gamble’s Books and Readers in the Early Church (1995) for the study of premodern book cultures. Contributors expand the conversation of book culture to examine the role the Hebrew Bible, the New Testament, and the Qur’an played in shaping the Jewish, Christian, and Muslim religions in the ancient and medieval world. By considering books as material objects rather than as repositories for stories and texts, the essays examine how new technologies, new materials, and new cultural encounters contributed to these holy books spreading throughout territories, becoming authoritative, and profoundly shaping three global religions. Features: Comparative analysis of book culture in Roman, Jewish, Christian, and Islamic contexts Art-historical, papyrological, philological, and historical modes of analysis Essays that demonstrate the vibrant, ongoing legacy of Gamble’s seminal work

The twenty-eight essays in this Handbook represent the best of current thinking in the study of Latin language and literature in the Middle Ages. The insights offered by the collective of authors not only illuminate the field of medieval Latin literature but shed new light on broader questions of literary history, cultural interaction, world literature, and language in history and society. The contributors to this volume—a collection of both senior scholars and gifted young thinkers—vividly illustrate the field’s complexities on a wide range of topics through carefully chosen examples and challenges to settled answers of the past. At the same time, they suggest future possibilities for the necessarily provisional and open-ended work essential to the pursuit of medieval Latin studies. While advanced specialists will find much here to engage and at times to provoke them, this handbook successfully orients non-specialists and students to this thriving field of study. The overall approach of The Oxford Handbook of Medieval Latin Literature makes this volume an essential resource for students of the ancient world interested in the prolonged after-life of the classical period’s cultural complexes, for medieval historians, for scholars of other medieval literary traditions, and for all those interested in delving more deeply into the fascinating more-than-millennium that forms the bridge between the ancient Mediterranean world and what we consider modernity.
