

Arban Complete Method For Tuba

The foundation for good technique is acquired by mastering these studies. This is the only edition of the Kopprasch Opus 5 Etudes ever published for tuba. Dr. Jerry Young gives detailed instructions for every etude. This tuba edition is in a slightly higher range than the Opus 6 tuba collection. However, these studies work well for both low (BBb-CC) and high (Eb-F) tubas.

There are many books written for the Piano, Violin, etc., entirely devoted to Technic. This Work is especially written to enable the Student, by practice and application, to overcome any obstacle which may occur in musical passages written for the Cornet. By controlling the Wind Power to play these Exercises as written, in one breath, the Student will acquire ENDURANCE without strain or injury. Train the Muscles which control the Lips, to make them elastic and strong, as only a slight pressure is necessary, and not brute force. The highest as well as the lowest notes can be played with equal tone quality if practiced according to the instructions that precede each Study. Every Cornet Player should have reached a degree of excellence before attempting to play these Exercises. To become an Expert on the Cornet, one should be familiar with as many Cornet Methods as possible, and so gain the experience of each. Every Exercise in this Book is possible, and not so very difficult if practiced slowly at first, and not too long at a time. I have used them for my daily practice for years, and they have been the means of my reaching the highest notes after playing a two-hour Concert, also of preserving my lips so that they never tire, and what has been a help to me is surely good for other Cornet Players. You cannot expect to attain the highest point of excellence without hard work and perseverance. Never be perfectly satisfied with yourself. Try to make some improvement each day, feeling that it is a pleasure to have conquered that which seemed an impossibility at first. Do not neglect to correct immediately the least fault you make. Bad habits are easily formed, but are difficult to remedy. There are few Celebrated Cornet Soloists, although thousands play the instrument. Most players abuse their practicing by not knowing the proper way, and neglecting to pay more attention to the elementary work. These Studies have been found to be excellent for Clarinet Players as well as Cornet Players. The Clarinet being a Wind Instrument also, all these Exercises will appeal to the Player of that Instrument by following the same instructions.

Georg Kopprasch was born sometime before 1800, pursued a career as a horn player at least until 1832, and composed two sets of horn etudes which includes this set of 60 etudes, Op. 6. Material contained in this book will not only enable trombonists to acquaint them with the basic functions of reading the alto, tenor and bass clefs, but will also afford the opportunity to practice: Legato slurring, mixed meters, odd meters, sequential exercises, scale and arpeggio patterns, F attachment exercises. The realization of a true legato style is one of the trombonist's most cherished dreams; to further the student's progress in developing such a legato technique, the editor has cast many of the exercises formerly set in a straight

forte tonguing style into an expressive legato setting. Thus, while the student is mastering the problems of changing clefs he/she may also be applying the soft tongue (dah) legato approach to the musical examples contained herein.

This book introduces music education majors to basic instrumental pedagogy for the instruments and ensembles most commonly found in the elementary and secondary curricula. This text focuses on the core competencies required for teacher certification in instrumental music. The first section of the book focuses on essential issues for a successful instrumental program: objectives, assessment and evaluation, motivation, administrative tasks, and recruiting and scheduling (including block scheduling). The second section devotes a chapter to each wind instrument plus percussion and strings, and includes troubleshooting checklists for each instrument. The third section focuses on rehearsal techniques from the first day through high school.

This Encore edition, by Wesley Jacobs, is the only comprehensive version ever published for tuba and is carefully engraved to the highest quality standards. The many errors that exist in the old trombone edition are now corrected in this new book. The Bordogni Vocalises (or Melodious Études) are essential for all tubists. For many years tubists were required to transpose the Bordogni Vocalises (Melodious Études) down one octave from the trombone edition. Ideally-and especially when playing the high tuba-t music should be played "at pitch" as it appears on the page. Many younger tubists did not know how to transpose, and many advanced players did not use the Vocalises on instruments in higher keys. Therefore, much of the benefit of Bordogni's works remained untapped.

For band, chorus, and orchestral winds.

This is the Only Complete Arban for Trombone & Euphonium. There has never been a truly complete Arban for trombone or euphonium until now. Previous editions did not include all of Arban's studies. This benchmark edition is complete and comprehensive for both trombone and euphonium. Joseph Alessi (principal trombone of the New York Philharmonic) has written the trombone text for this edition. His guidance in applying Arban's (trumpet) techniques to the trombone puts this book into its own by itself. Dr. Brian Bowman wrote the text for euphonium. As a teacher and virtuoso performer, Dr. Bowman is uniquely qualified to transfer Arban's techniques to the euphonium.

The autobiography of “possibly the greatest tuba player of all time” (New York Times), the man who “put class in the low brass.” (Clark Terry, jazz trumpeter) With warmth and humor, tuba virtuoso Harvey Phillips tells the story of his amazing life and career—from his Missouri childhood through his days as a performer with the King Brothers and the Ringling Bros. and Barnum & Bailey circuses, his training at the Juilliard School, a stint with the U.S. Army Field Band, and his freelance days with the New York City Opera and Ballet. A founder of the New York Brass Quintet, Phillips served as vice president of the New England Conservatory of Music and became Distinguished Professor of Music at Indiana University. The creator of an industry of Tuba Christmases, Octubafests, and Tuba Santas, he crusaded for recognition of the tuba as a serious musical instrument, commissioning more than 200 works. Enhanced by an extensive gallery of photographs, Mr. Tuba conveys Phillips’s playful zest for life while documenting his important musical legacy. “Mr. Tuba is not only a memoir, but it is a history of the twentieth century American music world and a resource for all music teachers and music lovers.” —NBA Journal “A lively and informative read.” —Herald-Times “[Phillips’s] autobiography is a fitting end to his life’s works, underlined with the same sense of inspiration and integrity that informed all of his musical activities.” —Bloom Magazine
