The alphabetical index of organisations within each Whilst the editors have taken every care to ensure the country of Eastern Europe and the C.I.S. lists information in this book is up-to-date, due to the fast organisations by their country of operation.

All the methods of restoration of human matter with the help of concentration on number sequences given in this book can be used with preventive and sanitary purposes, for rejuvenation, and in case of necessity, to restore the matter, regardless of the initial data, on the basis of which the matter is restored. When using the described methods in paragraphs 1-9 in the introduction you can consider the

following: -With the aim of prophylaxis it is expedient to make rehabilitation with the simultaneous spreading the effect of concentration on number sequences for the future. -For rejuvenation it is expedient to concentrate in succession at first on the number sequence, located in the content (of the book), taking into account the task of eternal development, and then concentrate on the matter which you are locally rejuvenating. -Restoring the matter of the body, you can perform concentration on number sequences in succession with the help of the various methods given in this book. You can use the number sequences corresponding to the matter being restored, as well as the number sequences of the area, which includes the matter you are restoring. -If it is necessary to restore the matter after biological death, then you should at first concentrate on the numbers consecutively from left to right, then in reverse order - from right to left. The spiritual impulse creating human matter makes it possible to expand the methods of restoration. Restoring the human matter one must strive to develop the spiritual level to the state in which the matter is created and functions by the spiritual activity, along with the biological principles and principles of events. Such spiritual state in the process of implementation of the methods of the eternal development must ensure full restoration of human matter, regardless of the initial data and any circumstances.

Recently the world has shown great interest to the work of Grigori P. Grabovoi, head of the "International Program for health improvement of man". The method of health improvement includes diagnostics, information processing, recovery process. Grigori P. Grabovoi puts into practice all work cycles, using his abilities of clairvoyance and remote information control. Digital diagnostics is performed in addition. Grigori P. Grabovoi says: "I see my mission not only in curing. I perform matter regeneration (recovery) regardless of the initial state. This proves irrationality of destruction, shows the technology of salvation, and implements the fundamental principles of the world's ecological safety". Since

Grigori P. Grabovoi regenerates after natural death, cures the 4th stage of cancer and the 4th stage of AIDS, when many organs are also destroyed, he naturally heals from any disease. Thus, Grigori P. Grabovoi implements the principle of non-dying as a method of preventing the global catastrophe threatening the whole world. Recovery cycle can be performed remotely without distance limitations. The program includes both the elimination of man-made disasters that could lead to global catastrophes, as well as control of events that overcome critical conditions as a result.

This book is dedicated to the great scientist and outstanding individual Nikolay Wladimirovich Timofeeff-Ressovsky. The book brings together a number of brief stories/essays about Timofeeff-Ressovsky including “Stories told by himself”, and scientific chapters addressing his major research areas: genetics, radiobiology, radiation ecology and epidemiology, and evolution. Timofeeff-Ressovsky contributed to several fields of biology and established new directions of scientific research. He often repeated the phrase, which would later become famous: “Science should not be approached with the ferocity of wild animals”. In keeping with that philosophy, the issues discussed here are still open. Each scientific part starts with a current review; the chapters present leading scientific schools and views. The main theme discussed in the genetics part is mutation variability in the context of linear (replication, transcription, translation) and conformational template processes, and its dependence on phylogenetic group. In turn, the radiobiology chapters focus on the reorganization of DNA, cell, and population variability under low-dose irradiation, sparking indirect processes and adaptive response. The radiation ecology and epidemiology parts present data on the consequences of nuclear plants and related accidents for ecological systems and human beings. Here some approaches to estimating radiation risks are also offered. Evolution laws are demonstrated in the genomic universe, plant-microbe symbiosis, stabilizing and destabilizing (directional) selection. The last essay demonstrates the principles of organization

operating in local animal populations, which are approached as social organisms of complex systemic nature. The chapter 'Radiation-Induced Aging and Genetic Instability of Mesenchymal Stem Cells: An Issue for Late Health Effects?' is available open access under a CC BY 4.0 license.

Dancing Genius

Soviet Impressionism

Unified System of Knowledge

"Arkady Petrov (b.1940) is one of the most well-known artists from the "men of the seventies" generation, in whose creative work are reflected both unique individuality and the typical features of the art of this time. Over a few decades Petrov has been continuously evolving in painting, remaining, however, true to his selected themes. The main motif of Petrov's art is the life and culture of the Soviet province in the mid-XX century, more broadly,-the life of "the simple Soviet man" as the particular case of the "little man", one of the defining traditions in Russian culture. The artist brings new meaning to the stereotypes of Soviet Society, looking at them through the prism of kitsch subjects, images of national mass culture-from aniline coloured postcards to the portraits of Alla Pugacheva. Petrov transformed the impersonal aesthetics of kitsch into a gallery of distinctive and deeply perceived human types, at the same time naive

and epic, into a unique section of the epoch." -- Book Jacket.

Jamie Carpenter's father is dead, his mother is missing, and he was just rescued by an enormous creature named Frankenstein. Now Jamie is pulled into a secret organization responsible for policing the supernatural, founded more than a century ago by Abraham Van Helsing. . . . Department Nineteen takes us through history, across Europe, and beyond - from the cobbled streets of Victorian London to prohibition-era New York, from the icy wastes of Arctic Russia to the treacherous mountains of Transylvania. Part modern thriller, part classic horror, it's packed with mystery, mayhem, and a level of suspense that makes a Darren Shan novel look like a romantic comedy.

In ancient times it was assumed that the world stands on three elephants, or three columns, according to the Jewish Kabbalah. You can say that the world stands on whales, elephants or pillars - the essence will not change. Anyway, it isn't about animals but about the right and left hemispheres of the brain, the spinal cord and whether they are capable of harmonious functioning on the basis of CONSCIOUSNESS, meaning divine consciousness, of course. The left hemisphere manifests its function of logic through the scientific worldview. The right hemisphere displays its function through an intuitive perception of truth and through

religious perception of the world. At first glance, they appear to be irreconcilable opposites. But if you look closely, you will see that the nonsense of atheistic views and the shocking demands for "sacrifice of the mind" are just two extreme manifestations of the same natural life source. And while the left brain hemisphere "hits against" its own mirror reflection, unable to overcome the BOUNDARY separating the worlds, it will continue to repeat the same old statements about atheism, physical foundations of the world, speed that cannot exceed the speed of light, and space and time as the medium of our existence, not even understanding that they are secondary to the CONSCIOUSNESS OF THE CREATOR, Who has created all this in the world and in relation to WHOM they are correlated, as consequence with cause.

Nach der Trilogie «Erschaffung der Welt» kommt nun die neue Reihe «Baum des Lebens» von Arcady Petrov mit dem ersten Buch «Wer bist du, Mensch?». Dieses Buch ist ein Lehrbuch für eine neue Weltanschauung und eine Sammlung von Technologien über die Lehre «Baum des Lebens», die Lehre über eine harmonische und schaffende Welt. Es hilft dem Menschen, seinen eigenen Platz im Universum zu finden und seine persönlichen Aufgaben für die Bildung einer neuen geistigen Realität zu bestimmen. Der Planet Erde ist bereits ein Teil dieser Realität

**geworden und Dank ihm auch das ganze Weltall.

Sphäre Sonne (Teil VI)**

The epic conclusion in the blood-poundingly brilliant Department 19 series, from bestselling author, Will Hill.

Whatever we might be doing and wherever we might be going, we were moving toward one goal - to one's inner self, to remembering oneself. People who have lost the memory of their past and their future are akin to children who are ready, day after day, without ever tiring of it, to ride on their favorite carousel. Something always changes around us - one day the sun is out, the next it rains, the leaves appear on the trees and then fall off, first one set of people come along to see how these carefree folks who behave like children whirl on the carousel, and then others come to watch. We turn around a closed circle, squealing with delight at the speed, forgetting that at some point we were truly able to fly and that our exaggerated excitement is nothing but a vague memory of who we once were.

(GERMAN Edition) "Rette die Welt um dich" ist der dritte Teil der Petrov-Trilogie "Die Erschaffung der Welt." Das Buch beschreibt in lebhafter und

bildreicher Sprache den Werdegang Petrovs zu und auf seinem "neuen Weg," die Zusammenarbeit und Entwicklung mit anderen Wissenschaftlern und Heilern sowie Beispiele aus seiner Praxis.

Historische Entwicklungen werden zum Vergleich herangezogen. Ein interessanter Einblick in Leben und Arbeit des in Russland sehr bekannten Leiters mehrerer Hellseher-Schulen.

From a unique set of circumstances, that would be impossible to duplicate, Soviet Art from 1930 to 1980 was the 20th century's major realist school of painting. It powerfully expresses itself with a simple clarity of pictorial language, consummate adeptness and truthful portrayal of life. The Soviet artist acted as a willing collaborator with and portrayer of the aspirations of society. This contrasted with Western models where artists were typically alienated from their community. Acceptance will come, using the Soviet phrase, because it is historically inevitable. It is already to a certain extent here with the pictures from the period increasingly passing through the sale rooms of Europe and North America. This book should give wider understanding of this underrated but artistically exciting movement in Soviet art.

Methods of Healing Through the Application of Consciousness

Concentration Exercises

Particles Here and Beyond the Mirror

Gorky Park

Die Erschaffung der Welt

Grabovoi's exercises teach people how to control events in their lives by using different concentration techniques. The exercises will help people grow spiritually and guarantee continued development.

A New York Review Books Original Victor Serge is one of the great men of the 20th century —and one of its great writers too. He was an anarchist, an agitator, a revolutionary, an exile, a historian of his times, as well as a brilliant novelist, and in *Memoirs of a Revolutionary* he devotes all his passion and genius to describing this extraordinary—and exemplary—career. Serge tells of his upbringing among exiles and conspirators, of his involvement with the notorious Bonnot Gang and his years in prison, of his role in the Russian Revolution, and of the Revolution's collapse into despotism and terror. Expelled from the Soviet Union, Serge went to Paris, where he evaded the KGB and the Nazis before fleeing to Mexico. *Memoirs of a Revolutionary* recounts a thrilling life on the front lines of history

and includes vivid portraits not only of Trotsky, Lenin, and Stalin but of countless other figures who struggled to remake the world. Peter Sedgwick's fine translation of Memoirs of a Revolutionary was abridged when first published in 1963. This is the first edition in English to present the entirety of Serge's book.

THE LOVE CELL OF THE CREATOR CAN REJUVENATE US
The love cell of the Creator can rejuvenate us. Send impulses of love for regeneration from within, so that you perceive total harmony. Visualize a column of light from the Creator, entering through the crown to a one part of your back (below the left shoulder), where there is a tiny cell, very bright, with all the information of the Creator. See it with love, and feel the love of the Creator. From that cell send light to your organs, and see how your skin rejuvenates. Enlighten your heart and thank for the rejuvenation.

Tracing the historical figure of Vaslav Nijinsky in contemporary documents and later reminiscences, *Dancing Genius* opens up questions about authorship in dance, about critical evaluation of performance practice, and the manner in which past events are turned into history.

Join Steven Tonsager for food, jokes, and healing in *Intention Based Field Resonance Testing: The Magnification of the Whisper*. Each chapter imagines a mealtime conversation between you and Mr. Tonsager as he explains how the language of numbers is used to magnify physical, emotional, mental, and spiritual healing. Through this series of informal and entertaining conversations, Tonsager explains the ways that he develops and uses number sequences to heal the underlying problems—incoherencies—caused by any number of factors, both past and present, that manifest in the body as stress and illness. Thanks to these conversations, you will begin to understand that in whisperology, science and spirituality share a

common ground that connects us deeply with the Divine and with each other. In this common ground, there are no limits to transformation and healing. The "gripping, romantic, and dazzlingly original" (Cosmopolitan) Arkady Renko book that started it all: the #1 bestseller *Gorky Park*, an espionage classic that begins the series, by Martin Cruz Smith, "the master of the international thriller" (The New York Times). It begins with a triple murder in a Moscow amusement center: three corpses found frozen in the snow, faces and fingers missing. Chief homicide investigator Arkady Renko is brilliant, sensitive, honest, and cynical about everything except his profession. To identify the victims and uncover the truth, he must battle the KGB, FBI, and the New York City police as he pursues a rich, ruthless, and well-connected American fur dealer. Meanwhile, Renko is falling in love with a beautiful, headstrong dissident for whom he may risk everything.

"Brilliant...there are enough enigmas within enigmas within enigmas to reel the mind" (The New Yorker) in this wonderfully textured, vivid look behind the Iron Curtain. "Once one gets going, one doesn't want to stop...The action is gritty, the plot complicated, and the overriding quality is intelligence" (The Washington Post). The first in a classic series, *Gorky Park* "reminds you just how satisfying a smoothly turned thriller can be" (The New York Times Book Review).

Man maintains the homeostasis of the Universe. Adjustment of reality takes place through his consciousness. And man's every act and his every action is reflected upon the global levels of being, where planets, stars, and galaxies perform the role of atoms and cells. The Universe is the body of man's own existence on the global scale. If people understand and accept this, they become immortal.

Darkest Night (Department 19, Book 5)

"A chilling and cinematic thriller set in 1961 in one of the most secretive locations in Soviet history. Ten days before the test of largest nuclear device in history--the Tsar Bomba--a KGB officer must investigate the murder of one of the architects of the bomb, and unravel a conspiracy that could set the world on fire"--

The brochure has been prepared using research materials of the staff of the Noosphera Center - Arcady Petrov and Igor Arepyev. This is a summary of

*their joint experience and achievements in creating a new science -
Cosmopsychobiology. In this booklet you will find concrete bio-informative techniques for the improvement of one's health in oncological diseases. But let us first expand our knowledge of this little known field of science. How do we help a person in the concrete work of our own practice? Through consciousness! We do not touch anyone. We do not give any pills or shots, but the person still becomes healthy. A thought alone can save someone's life. Im Baum des Lebens ist die Sonne (Tiphereth) der Ort, an dem jede Krankheit geheilt werden kann. Dieser Ort ist auch in uns, in unserem Herzen. Arcady Petrov führt uns in die Sonne, in das Christusbewusstsein. The brochure has been prepared using research materials of the staff of the Noosphaera Center - Arcady Petrov and Igor Arepyev. This is a summary of their joint experience and achievements in creating a new science - Cosmopsychobiology. The brochure provides knowledge about the fundamental laws of the Cosmos through*

the synthesis of existing notions about the subtle-material world. The reader will receive a presentation about a new science - Cosmopsychobiology: this is the science of man as an integrated structure of the universe and about the macrocosmos and microcosmos simultaneously. Arcady Petrov

Rejuvenation Program

An all-new short story from the blood-pounding world of Department 19.

The tree of life, which exists in one's consciousness, has both inner and outer connections with reality. Within the body, these are the connections of the brain with every organ and the connections with every cell and, more importantly, with the environment that sustain the balance critical for life.

This book presents a method for improving health by focusing on seven-digit, eight-digit, and nine-digit

numbers, which the author obtained in the course of his practical work. Seven-digit numerical sequences form the basis of the system. For further specific conditions, eight-digit and nine-digit numbers are given in the table of contents, as well as throughout the book. The picture used in the design of the cover is an author's picture of Grigori Grabovoi from his book of images "Manifestations of Eternity". Foreshortening of images, in this book, fills you with eternity.

"Die Formel des Weltalls" (Kosmo Psychobiologie)

This book focuses on the evolution of plant viruses, their molecular classification, epidemics and management, covering topics relating to evolutionary mechanisms, viral ecology and emergence, appropriate analysis methods,

and the role of evolution in taxonomy. The currently emerging virus species are increasingly becoming a threat to our way of life, both economically and physically. Plant viruses are particularly significant as they affect our food supply and are capable of rapidly spreading to new plant species. In basic research, plant viruses have become useful models to analyze the molecular biology of plant gene regulation and cell-cell communication. The small size of DNA genome of viruses possesses minimal coding capacity and replicates in the host cell nucleus with the help of host plant cellular machinery. Thus, studying virus cellular processes provides a good basis for explaining DNA replication, transcription, mRNA processing, protein expression and gene silencing in plants. A better understanding of these cellular processes will help us design antiviral strategies for plants. The book provides in-depth information on plant virus gene interactions with hosts, localization and expression and the latest advances in our understanding of plant virus evolution, their responses and crop improvement. Combining characterization of plant viruses and disease management and presenting them together makes it easy to compare all aspects of resistance, tolerance and management strategies. As such, it is a useful resource for molecular biologists and plant virologists alike.

Vorliegende Broschüre entstand auf der Grundlage von Forschungsmaterialien der Mitarbeiter des Moskauer Zentrums "Noosphere" von Arcady Petrov und Igor Arepjev. Sie fasst ihre gemeinsamen Erfahrungen und Erkenntnisse bei der Schaffung einer neuen

Wissenschaft - der Kosmopsychobiologie - zusammen. Die Broschüre vermittelt Kenntnisse über fundamentale Gesetzmäßigkeiten des Kosmos durch die Synthese der vorhandenen Vorstellungen über die subtile Welt. Der Leser bekommt einen Eindruck von der neuen Wissenschaft der Kosmopsychobiologie, der Wissenschaft über den Menschen als ganzheitliche Struktur des Weltalls. Gleichzeitig erfährt er etwas über die Bedeutung von Makro- und Mikrokosmos."

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

This book elaborates on how China's previous leaders established, consolidated, developed and improved China's basic modern governance system. It also explores and discusses how to correctly, objectively and scientifically perceive, evaluate and promote the

modernization of China ' s state governance and its capacity. Using detailed and accurate data and extensive background information, this book analyzes the changing history and future perspectives of the relationship between China ' s government and the market, state-owned economy and private economy. Covering an extensive timespan, this comprehensive book includes contributions from Chinese scholars specialized in contemporary China studies discussing the major breakthroughs and decision-making consultations in Chinese development strategies. It also offers insights into the research mechanism and development levels of Chinese think tanks based at research institutes. Last but not least, it sheds light on the democratic advances in the Chinese decision-making process.
