

Ardente

Le 8 mai 1902, une gigantesque éruption volcanique détruisait Saint-Pierre, capitale de la Martinique. 30 000 personnes perdirent instantanément la vie, sauf un condamné à mort, Syparis, emprisonné dans un cul-de-basse-fosse. Tout un monde créole riche et coloré, fait d'affrontements sévères entre Grands Blancs, mulâtres et Noirs, d'amours violentes et d'amitiés tourmentées, de dur labeur et de festivités carnavalesques, disparaissait à jamais. Raphaël Confiant tente de le ressusciter au travers d'une fresque brûlante où l'on croisera des personnages aussi hauts en couleur que le négociant Dupin de Maucourt, le professeur de philosophie mulâtre Pierre-Marie Danglemont et sa bande de noceurs, Syparis, maître ès larcins, et l'énigmatique Lafrique-Guinée. D'étonnantes figures féminines se dégagent : des femmes-matador telles que Thérésine, Hermancia ou Mathilde, des femmes-debout comme la lessivière Marie-Égyptienne ou Rose Joséphine et la mystérieuse quarteronne Edmée Lemonière, à qui Danglemont voue une passion qui n'est point payée de retour.

Includes section "Reviews of recent theological literature".

Why do volcanoes erupt, and in so many different ways? What happens when a volcano erupts in the sea? How can eruptions be predicted? These are a few of the questions addressed in this wide-ranging introduction to volcanoes. Assuming little background knowledge, and providing a comprehensive glossary explaining technical terms, this title deals with all aspects of volcanic features and processes. It examines them as distinctive, and often dramatic, features of the landscape, as well as potential sources of danger to human beings.; Volcanoes provide an exciting way in which to analyze some of the major geological processes. The author sets them in their world context and explains their formation, especially in relation to the many styles of eruption, and the multitude of volcanic landscape forms that result. Some major eruptions are selected to illustrate this eruptive variety and the impact on surrounding populations. Distinctive landscape forms, from flows to cones and calderas, are described with reference to the

"biographies" of the volcanoes. There are chapters devoted to stratovolcanoes, hydrovolcanic features and erosional processes. A final chapter examines the latest methods of predicting volcanic eruptions and moderating their effects.; Drawing on an unusually wide range of sources in the French, Spanish and Portuguese literature, as well as English, the author presents examples and illustrations from around the world, including the Aegean, the French West Indies, the American West, the Azores and the Canary Islands, Italy and central France. He has also translated various eyewitness accounts of volcanic events and has included a revised version of Pliny's account of the eruption of Vesuvius.

Includes proceedings of meetings.

On May 8, 1902, on the Caribbean island of Martinique, the volcano Mount Pel é e loosed the most terrifying and lethal eruption of the twentieth century. In minutes, it killed 27,000 people and leveled the city of Saint-Pierre.

In *La Catastrophe*, Alwyn Scarth provides a gripping day-by-day and hour-by-hour account of this devastating eruption, based primarily on chilling eyewitness accounts. Scarth recounts how, for many days before the great eruption, a series of smaller eruptions spewed dust and ash. Then came the eruption. A blinding flash lit up the sky. A tremendous cannonade roared out that was heard in Venezuela. Then a scorching blast of superheated gas and ash shot straight down towards Saint-Pierre, racing down at hundreds of miles an hour. This infernal avalanche of dark, billowing, reddish-violet fumes, flashing lightning, ash and rocks, crashed and rolled headlong, destroying everything in its path--public buildings, private homes, the town hall, the Grand Hotel. Temperatures inside the cloud reached 450 degrees Celsius. Virtually everyone in Saint-Pierre died within minutes. Scarth tells of many lucky escapes--the ship *Topaze* left just hours before the eruption, a prisoner escaped death in solitary confinement. But these were the fortunate few. An official delegation sent later that day by the mayor of Fort-de-France reported total devastation--no quays, no trees, only shattered facades. Saint-Pierre was a smoldering ruin. In the tradition of *A Perfect Storm* and *Isaac's Storm*, but on a much larger scale, *La Catastrophe* takes readers inside the greatest volcanic eruption of the century and one of the most tragic natural disasters of all time.

The Presbyterian and Reformed Review

Au coeur de l'hiver 1381, le Régent de Londres charge frère Athelstan de faire le jour sur le massacre de ses collecteurs d'impôts dans l'auberge de la Torche Ardente Londres, février 1381. La capitale est immobilisée sous l'emprise d'un des hivers les plus durs de son histoire. Les impôts toujours croissants exigés par le Régent, Jean de Gaunt, suscitent de plus en plus de ressentiment de la part des citoyens défavorisés. Jusqu'à ce que le mécontentement dégénère en un massacre sanglant... Dans une somptueuse taverne de Southwark, La Torche ardente, neuf personnes, dont les collecteurs d'impôts de Gaunt, leur escorte militaire et les prostituées chargées de les divertir, sont brutalement assassinés. Le Régent, furieux, ordonne à frère Athelstan de faire le jour sur cette affaire. Car non seulement le coffre aux trésors de Gaunt a été volé, mais il a des raisons de croire qu'un espion français s'est infiltré parmi eux. Et on rapporte aussi la présence à Londres d'un assassin professionnel, Beowulf, qui a juré vengeance contre Gaunt et ses sbires...

-Qui est cette sublime créature ? - Julius, voyons, c'est l'honorable lady Grafton. Son mari est grabataire et on prétend qu'elle est toujours vierge. Mais elle refuse froidement toutes les avances que lui valent ses beaux yeux

et ses courbes... affriolantes ! Il n'en fallait pas plus pour que Julius d'Abernon, marquis de Darley, décide de relever le défi incarné par cette femme Lui le débauché dont les frasques amusent ou choquent toute l'Angleterre ne souffrira pas que lui échappe cette beauté qu'il devine sensuelle et gourmande sous ses airs prudes. N'est-il pas irrésistible ? Pourtant, la ravissante Elspeth se révèle plus imprenable qu'une forteresse, et Julius comprend qu'il va devoir changer de tactique s'il veut triompher de sa vertu, et peut-être forcer les barrières qui claquemurent son cœur...

Comprehensive yet succinct, Wicander/Monroe's Geology: Earth in Perspective, 3rd edition, delivers a complete overview of introductory geology in an engaging, student-friendly format. Completely up to date, it includes recent examples of natural disasters, new information on the 2018 eruption of Mount Kilauea, fresh insight on paleoseismology, new details on Hurricane Sandy and Hurricane Harvey, and updated dating techniques that more accurately identify historic climate change periods. GEO-FOCUS boxes in every chapter spotlight headline-generating issues like fracking, while economic and environmental geology topics are integrated throughout. In addition, photos vividly illustrate geologic processes through striking images from recent geologic events.
