

Arguing About Art 3rd Edition

Arguing about ArtContemporary Philosophical Debates

Presents a collection of the author's works, including concept art and finished products.

First published in 1942 when wartime shortages were at their worst, the ever-popular How to Cook a Wolf, continues to surmount the unavoidable problem of cooking within a budget. Here is a wealth of practical and delicious ways to keep the wolf from the door.

Four Arts of Photography explores the history of photography through the lens of philosophy and proposes a new scholarly understanding of the art form for the 21st century. Re-examines the history of art photography through four major photographic movements and with case studies of representative images Employs a top-down, theory to case approach, as well as a bottom-up, case to theory approach Advances a new theory regarding the nature of photography that is grounded in technology but doesn't place it in opposition to painting Includes commentaries by two leading philosophers of photography, Diarmuid Costello and Cynthia A. Freeland

The Australian Art Field

A Complete Course in Critical Thinking

A Contemporary Introduction

A pleasure to read and contemplate, this book reaches beyond the conventional to celebrate the poetry of wine, as well as the reasons behind its unique resonance with the human psyche.

Arguing about Law introduces philosophy of law in an accessible and engaging way. The reader covers a wide range of topics, from general jurisprudence, law, the state and the individual, to topics in normative legal theory, as well as the theoretical foundations of public and private law. In addition to including many classics, Arguing About Law also includes both non-traditional selections and discussion of timely topical issues like the legal dimension of the war on terror. The editors provide lucid introductions to each section in which they give an overview of the debate and outline the arguments of the papers, helping the student get to grips with both the classic and core arguments and emerging debates in: the nature of law legality and morality the rule of law the duty to obey the law legal enforcement of sexual morality the nature of rights rights in an age of terror constitutional theory tort theory. Arguing About Law is an inventive and stimulating reader for students new to philosophy of law, legal theory and jurisprudence.

This acclaimed anthology is ideal for newcomers to aesthetics or philosophy of art and includes new sections on pornography and erotica and societies without art, as well as new essays and revised introductions throughout.

As critical thinking and coherent argument become even more important in our contemporary world, Arguing about Literature economically combines two first-year writing books in one: a concise guide to reading literature and writing arguments, and a compact thematic anthology of stories, poems, plays, essays, and arguments for inquiry, analysis, and research. The authors of the groundbreaking Making Literature Matter draw connections between contemporary debates and literary analysis, bringing both argument and literature into a contemporary context. Through instruction in close critical reading of texts and well-supported, rhetorically sound argumentative writing, Arguing about Literature prepares students to read, write, and argue effectively. The third edition includes a new chapter on evaluating internet resources and visual arguments in the "post-truth" era, as well as dozens of new works of literature and argumentation.

"Fully revised and updated third edition"--Cover.

This is not a conventional book. It is designed to stimulate and challenge all people who are curious to find out about the world they inhabit and their place within it. It does this by suggesting questions and lines of questioning on a wide range of topics. The book does not provide answers or model arguments but prompts people to create their own questions and a reading log or journal. To this end, almost all questions have a list of books or articles to provide a starter for stimulating further reading. Once you start, you will be hooked! Never stop questioning.

Fallacies and Argument Appraisal

Arguing About Science

Thank You for Arguing, Fourth Edition (Revised and Updated)

A master class in the art of persuasion, as taught by professors ranging from Bart Simpson to Winston Churchill, newly revised and updated. The time-tested secrets taught in this book include Cicero's three-step strategy for moving an audience to action, and Honest Abe's Shameless Trick for lowering an audience's expectations. And it's also replete with contemporary techniques such as politicians' use of code language to appeal to specfic groups and an eye-opening assortment of persuasive tricks, including the Eddie Haskell Ploy, the Belushi Paradigm, Stalin's Timing Secret, and the Yoda Technique. Whether you're an inveterate lover of language books or just want to win a lot more anger-free arguments on the page, at the podium, or over a beer, Thank You for Arguing is for you. Warm, witty, erudite, and truly enlightening, it not only teaches you how to recognize a paralipsis when you hear it, but also how to wield the weapons of persuasion the next time you really, really, want to get your own way.

If you can persuade a cat ... you can persuade anyone. This is the essential guide to getting your way. Jay Heinrichs, award-winning author of Thank You for Arguing and advisor to the Pentagon, NASA and Fortune 500 companies, distils a lifetime of negotiating and rhetoric to show you how to win over anyone - from colleagues and bosses, to friends and partners at home (and even the most stubborn of feline adversaries). You'll learn to: Perfect your timing - learn exactly when to pounce Get your body language, tone and gesture just right Think about what your opponent wants - always offer a comfy lap Lure them in by making them think they have the power The result? A happy, hopefully scratch-free, resolution. 'Jay Heinrichs knows a thing or two about arguing' The Times 'A master rhetorician and persuasion guru' Salon 'You got a bunch of logical engineers to inject pathos into their arguments ... it works!' NASA engineer

Fallacies and Argument Appraisal presents an introduction to the nature, identification, and causes of fallacious reasoning, along with key questions for evaluation. Drawing from the latest work on fallacies as well as some of the standard ideas that have remained relevant since Aristotle, Christopher Tindale investigates central cases of major fallacies in order to understand what has gone wrong and how this has occurred. Dispensing with the approach that simply assigns labels and brief descriptions of fallacies, Tindale provides fuller treatments that recognize the dialectical and rhetorical contexts in which fallacies arise. This volume analyzes major fallacies through accessible, everyday examples.

Critical questions are developed for each fallacy to help the student identify them and provide considered evaluations.

An introduction to the art of rhetoric explains how persuasion can profoundly influence personal and professional successes and reveals an array of techniques employed by such personalities as Aristotle and Winston Churchill.

A Guide and Reader

Contemporary Philosophical Debates

The Art of Argument

The latest edition of Arguments and Arguing contains the same balance of theory and practice, breadth of coverage, current and relevant examples, and accessible writing style that made previous editions so popular in hundreds of classrooms. The authors draw from classic and recent argumentation theory and research, contextualized with new examples to showcase a narrative style of argumentation and the values and attitudes of audiences. Readers learn how to employ both formal and informal argumentative strategies in an array of communication forums—from interpersonal interactions to academic debate to politics to business. A newly added chapter on visual argumentation and a student exercise demonstrate the value and power of visual elements in the construction of arguments. The ability to argue is necessary if people are to solve problems, resolve conflicts, and evaluate alternative courses of action. While many are taught that arguing is counterproductive and arguments should be avoided, Hollihan and Baaske illustrate that arguing is a fundamental human activity. Learning the art of effective argumentation entails a grasp of not only the strategies and principles of analysis and logical reasoning but also the importance of arguing in a positive and socially constructive fashion.

'Philosophy: The Basics deservedly remains the most recommended introduction to philosophy on the market. Warburton is patient, accurate and, above all, clear. There is no better short introduction to philosophy.' - Stephen Law, author of The Philosophy Gym Philosophy: The Basics gently eases the reader into the world of philosophy. Each chapter covers a different area of philosophy, explaining and exploring the basic ideas and themes including: Can you prove God exists? How do we know right from wrong? What are the limits of free speech? Do you know how science works? Is your mind different from your body? Can you define art? How should we treat non-human animals? For the fifth edition of Philosophy: The Basics Warburton has added an entirely new chapter on animals, revised others and brought the further reading sections up to date. If you've ever asked 'what is philosophy?', or wondered whether the world is really the way you think it is, this is the book for you.

This volume presents over 200 selected original artworks from the collection of Betsy Beinecke Shirley, one of the great collectors of American children's literature. Shirley gathered an authoritative collection of books, original illustrations, manuscripts, as well as drawings and paintings from such children's classics as "Treasure Island" and "The Cat in the Hat." Shirley's collection guides the reader on a tour through the stages of childhood reading, this volume begins with ABC's and nursery books. It continues through adventure stories, magazines, and more, then concludes with a miscellany section of odds and ends. The images demonstrate how children's books evolved, from the nation's first children's books to modern times. Artists whose works are represented include many of the favorites, among them Ludwig Bemelmans, Maurice Sendak, A.B. Frost, Wanda Gag, Peter Newell, N.C. Wyeth, Tony Sarg, Robert Lawson, and Johnny Gruelle.

The second edition of the acclaimed Routledge Companion to Aesthetics contains fifty-four chapters written by leading international scholars covering all aspects of aesthetics. This companion opens with an historical overview of aesthetics including entries on Plato, Aristotle, Kant, Nietzsche, Heidegger, Sibley and Derrida. The second part of the book discusses the theories and theories needed for a comprehensive understanding of aesthetics including the definitions of art, taste, value of art, beauty, imagination, fiction, narrative, metaphor and pictorial representation. Part three is devoted to the topics that have attracted much contemporary interest in aesthetics including art and ethics, environmental aesthetics, and the history of art. The final part addresses the individual arts of music, photography, film, literature, theatre, dance, architecture and sculpture. With nine new and revised entries, and up to date suggestions for further reading, The Routledge Companion to Aesthetics is essential for anyone interested in aesthetics, art, literature, and visual studies.

The Products and Process of Human Decision Making, Second Edition

David Morrow and Anthony Weston build on Weston's acclaimed A Rulebook for Arguments to offer a complete textbook for a course in critical thinking or informal logic. Features of the book include: Homework exercises adapted from a wide range of actual arguments from newspapers, philosophical texts, literature, movies, YouTube videos, and other sources. Practical advice to help students succeed when applying the Rulebook's rules. Suggestions for further practice that outline activities students can do by themselves or with classmates to improve their critical thinking skills. Detailed instructions for in-class activities and take-home assignments designed to engage students in critical thinking. An appendix on mapping arguments, a topic not included in the Rulebook, that introduces students to this vital skill in evaluating or constructing complex and multi-step arguments. Model responses to odd-numbered exercises, including commentaries on the strengths and weaknesses of selected model responses as well as further discussion of some of the substantive intellectual, philosophical, and ethical issues raised by the exercises. The third edition of Workbook contains the entire text of the recent fifth edition of the Rulebook, supplementing this core text with extensive further explanations and exercises. Updated and improved homework exercises ensure that the examples continue to resonate with today's students. Roughly one-third of the exercises have been replaced with updated or improved examples. A new chapter on engaging constructively in public debates—including five new sets of exercises—trains students to engage respectfully and constructively on controversial topics, an increasingly important skill in our hyper-partisan age. Three new critical thinking activities offer further opportunities to practice constructive dialogue.

This book brings together leading scholars and practitioners to take stock of the frictions generated by a tumultuous time in the Australian art field and to probe what the crises might mean for the future of the arts in Australia. Specific topics include national and international art markets; art practices in their broader social and political contexts; social relations and institutions and their role in contemporary Australian art; the policy regimes and funding programmes of Australian governments; and national and international art markets. In addition, the collection will pay detailed attention to the field of indigenous art and the work of Indigenous artists. This book will be of interest to scholars in contemporary art, art history, cultural studies, and Indigenous peoples.

Debates in Art and Design Education encourages student and practising teachers to engage with contemporary issues and developments in learning and teaching. This fully updated second edition introduces key issues, concepts and tensions in order to help art educators develop a critical approach to their practice in response to the changing fields of education and visual culture. Accessible, comprehensive chapters are designed to stimulate thinking and understanding in relation to theory and practice, and help art educators to make informed judgements by arguing from a position based on theoretical knowledge and understanding. Contributing artists, lecturers and teachers debate a wide range of issues including: the latest policy and initiatives in secondary art education the concepts, skills and dispositions that can be developed through art education tensions inherent in developing the inclusive Art and Design classroom citizenship education within Art and Design teaching new practices in community arts education examining 'whiteness' in the sector Debates in Art and Design Education is for all student and practising teachers interested in furthering their understanding of an exciting, ever-changing field, and supports art educators in articulating how the subject is a vital, engaging and necessary part of the twenty-first century curriculum.

In the mid twentieth century the philosopher Ludwig Wittgenstein famously asserted that games are indefinable; there are no common threads that link them all. "Nonsense," says the sensible Bernard Suits: "playing a game is a voluntary attempt to overcome unnecessary obstacles." The short book Suits wrote demonstrating precisely that is as playful as it is insightful, as stimulating as it is delightful. Suits not only argues that games can be meaningfully defined; he also suggests that playing games is a central part of the ideal of human existence, so games belong at the heart of any vision of Utopia. Originally published in 1978, The Grasshopper is now re-issued with a new introduction by Thomas Hurka and with additional material (much of it previously unpublished) by the author, in which he expands on the ideas put forward in The Grasshopper and answers some questions that have been raised by critics.

Games, Life and Utopia

A Memoir

An Adversarial Collaboration on the Russell--Copleston Debate

A Human's Guide to the Art of Persuasion

A Workbook for Arguments

Arguing About Law

This volume presents a double argumentative analysis of the debate between Bertrand Russell and Frederick Copleston on the existence of God. It includes an introduction justifying the choice of text and describing the historical and philosophical background of the debate. It also provides a transcript of the debate, based in part on the original recording. The argumentative analyses occupy Parts I and II of the book. In Part I the argumentative process is analysed by means of the ideal model of critical discussion, the workhorse of pragma-dialectics. Part I shows how the two parties go through the four stages of a critical discussion. It highlights the questions raised over and beyond the presiding question of whether God exists and examines almost a hundred questions that are raised. Many are left in the air, whereas a few others give rise to sundry sub-discussions or meta-dialogues. In Part II the theoretical framework of argument dialectic is put to work: argument structures are identified by means of punctuation marks, argumentative connectors and operators, allowing to see the argumentative exchange as the collaborative construction of a macro-argument. Such a macro-argument is both a joint product of the arguers and a complex structure representing the dialectical relationships between the individual arguments combined in it. Finally, the complementarity of the two approaches is addressed. Thus the book can be described as an exercise in adversarial collaboration.

The definitive guide to getting your way, revised and updated with new material on writing, speaking, framing, and other key tools for arguing more powerfullylly “Cross Cicero with David Letterman and you get Jay Heinrichs.”—Joseph Ellis, Pulitzer Prize–winning author of The Quartet and American Sphinx Now in its fourth edition, Jay Heinrichs’s Thank You for Arguing is your master class in the art of persuasion, taught by history’s greatest professors, ranging from Queen Victoria and Winston Churchill to Homer Simpson and Barack Obama. Filled with time-tested secrets for emerging victorious from any dispute, including Cicero’s three-step strategy for inspiring action and Honest Abe’s Shameless Trick for lowering an audience’s expectations, this fascinating book also includes an assortment of persuasion tips, such as: • The Chandler Bing Adjustment: Match your argument to your audience (that is, persuasion is not about you). • The Belushi Paradigm: Before people will follow you, they have to consider you worth following. • The Yoda Technique: Transform a banal idiom by switching the words around. Additionally, Heinrichs considers the dark arts of persuasion, such as politicians’ use of coded language to appeal to specific groups. His sage guide has been fully updated to address our culture of “fake news” and political polarization. Whether you’re a lover of language books or just want to win more anger-free arguments on the page, at the podium, or over a beer, Thank You for Arguing is for you. Warm, witty, and truly enlightening, it not only teaches you how to identify a paraleipsis when you hear it but also how to wield such persuasive weapons the next time you really, really need to get your way. This expanded edition also includes a new chapter on how to reset your audience’s priorities, as well as new and improved ArgueLab games to hone your skills.

By the time of his death in 1904, critics, arts reformers, and government officials were near universal in their praise of Art Nouveau designer Emile Gallé (1846–1904), whose works they described as the essence of French design. Many even went so far as to argue that the artist’s creations could reinvigorate France’s fading arts industries and help restore its economic prosperity by defining a modern style to represent the nation. For fin-de-siècle viewers, Gallé’s works constituted powerful reflections on the idea of national belonging, modernity, and the role of the arts in political engagement. While existing scholarship has largely focused on the artist’s innovative technical processes, a close analysis of Gallé’s works brings to light the surprisingly complex ways in which his fragile creations were imbricated in the political turmoil that characterized fin-de-siècle France.

Examining Gallé’s works inspired by Japanese art, his patriotically inflected designs for the Universal Exposition of 1889, his artistic manifesto in support of Dreyfus created in 1900, and finally, his late works that explore the concept of evolution, this book reveals how Gallé returns again and again to the question of national identity as the central issue in his work.

*Arguing about Art, 2nd Edition*is an expanded and revised new edition of this highly acclaimed anthology. This lively collection presents twenty-seven readings in a clear and accessible format discussing the major themes and arguments in aesthetics. Alex Neill and Aaron Ridley’s introductions provide a balanced account of each topic and highlight the important questions that are raised in the readings. The new sections of the book are: The Art of Food; Rock Music and Culture; Enjoying Horror; Art and Morality; and Public Art. In addition, many of the introductions have been updated and each section includes suggestions for further reading.

A Guide to Mooting

Nature and the Nation in Fin-de-Siècle France

Arguing about Art

Philosophy of the Arts

The Psychology of Wine

From Dissertation to Book, Second Edition

This is the first comprehensive book-length introduction to the philosophy of Western music that fully integrates consideration of popular music and hybrid musical forms, especially song. Its author, Andrew Kania, begins by asking whether Bob Dylan should even have been eligible for the Nobel Prize in Literature, given that he is a musician. This motivates a discussion of music as an artistic medium, and what philosophy has to contribute to our thinking about music. Chapters 2-5 investigate the most commonly defended sources of musical value: its emotional power, its form, and specifically musical features (such as pitch, rhythm, and harmony). In chapters 6-9, Kania explores issues arising from different musical practices, particularly work-performance (with a focus on classical music), improvisation (with a focus on jazz), and recording (with a focus on rock and pop). Chapter 10 examines the intersection of music and morality. The book ends with a consideration of what, ultimately, music is. Key Features Uses popular-song examples throughout, but also discusses a range of musical traditions (notably, rock, pop, classical, and jazz) Explains both philosophical and musical terms when they are first introduced Provides publicly accessible Spotify playlists of the musical examples discussed in the book Each chapter begins with an overview and ends with questions for testing comprehension and stimulating further thought, along with suggestions for further reading

This is a book about how to read visual images: from fine art to photography, film, television and new media. It explores how meaning is communicated by the wide variety of texts that inhabit our increasingly visual world. But, rather than simply providing set meanings to individual images, Visual Culture teaches readers how to interpret visual texts with their own eyes. While the first part of the book takes readers through differing theoretical approaches to visual analysis, the second part shifts to a medium-based analysis, connected by an underlying theme about the complex relationship between visual culture and reality. Howells and Negreiros draw together seemingly diverse methodologies, while ultimately arguing for a polysemic approach to visual analysis. The third edition of this popular book contains over fifty illustrations, for the first time in colour. Included in the revised text is a new section on images of power, fear and seduction, a new segment on video games, as well as fresh material on taste and judgement. This timely edition also offers a glossary and suggestions for further reading. Written in a clear, lively and engaging style, Visual Culture continues to be an ideal introduction for students taking courses in visual culture and communications in a range of disciplines, including media and cultural studies, sociology, and art and design.

More and more, first- year writing courses foreground skills of critical analysis and argumentation. In response, Arguing about Literature first hones students’ analytical skills through instruction in close critical reading of texts; then, it shows them how to turn their reading into well-supported and rhetorically effective argumentative writing. From the authors of the groundbreaking and widely adopted Making Literature Matter, Arguing about Literature economically combines two books in one: a concise guide to reading literature and writing arguments, and a compact thematic anthology of stories, poems, plays, arguments, and other kinds of texts for inquiry, analysis and research. The second edition includes even more instruction in the key skills of argumentation, critical reading, and research, while linking literature more directly to the newsworthy current issues of today.

When a dissertation crosses my desk, I usually want to grab it by its metaphorical lapels and give it a good shake. “You know something!” I would say if it could hear me. “Now tell it to us in language we can understand!” Since its publication in 2005, From Dissertation to Book has helped thousands of young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers. Now revised and updated to reflect the evolution of scholarly publishing, this edition includes a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that meets the broader expectations of readers rather than the narrow requirements of academic committees. At the heart of From Dissertation to Book is the idea that revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience—a committee or advisors—to those of a broader scholarly audience that wants writing to be both informative and engaging. William Germano offers clear guidance on how to do this, with advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a book that an audience will actually enjoy, whether reading on a page or a screen. Germano also acknowledges that not all dissertations can or even should become books and explores other, often overlooked, options, such as turning them into journal articles or chapters in an edited work. With clear directions, engaging examples, and an eye for the idiosyncrasies of academic writing, From Dissertation to Book reveals to recent PhDs the secrets of careful and thoughtful revision—a skill that will be truly invaluable as they add “author” to their curriculum vitae.

Arguing for Atheism

Visual Culture

Debates in Art and Design Education

An Introduction to Aesthetics

Drawn to Enchant

Practices, Policies, Institutions

A new edition of this bestselling introduction to aesthetics and the philosophy of art. Includes new sections on digital music and environmental aesthetics. All other chapters have been thoroughly revised and updated.

Arguing is a fundamental human activity; it is a process of making sense of the world and negotiating understandings with others. Arguing can be—and often is—healthy for both relationships and societies. The values of the community are shaped through people sharing their opinions, offering reasons in support of their beliefs, and deliberating. Hollihan and Baaske present techniques for effective analysis, logical reasoning, and socially constructive argumentation. They illustrate their discussions of theory and practice with multiple engaging examples. The book focuses on narrative—argument as a story backed by evidence to evaluate courses of action or to resolve conflicts. A chapter on visual argumentation highlights the power of visual elements in arguments. Effective arguing requires a sensitivity to the demands of different argumentative contexts. Readers will become familiar with the elements of argument essential for politics, the law, debate, business, and relationships. Narrative arguments are rational arguments. Learning about the narrative reasoning process helps us tell more convincing, credible, and compassionate stories—and to become better critics of the stories we hear.

The Triadic Structure of the Mind provides a philosophical system that offers fresh solutions in the fields of ontology, knowledge, ethics, and politics. The second edition includes a more extensive treatment of the topics addressed in the first edition, the introduction of new concepts, and the inclusion of additional thinkers.

Arguing About Science is an outstanding, engaging introduction to the essential topics in philosophy of science, edited by two leading experts in the field. This exciting and innovative anthology contains a selection of classic and contemporary readings that examine a broad range of issues, from classic problems such as scientific reasoning; causation; and scientific realism, to more recent topics such as science and race; forensic science; and the scientific status of medicine. The editors bring together some of the most influential contributions of famous philosophers in the field, including John Stuart Mill and Karl Popper, as well as more recent extracts from philosophers and scientists such as Ian Hacking, Stephen Jay Gould, Bas van Fraassen, Nancy Cartwright, and John Worrall. The anthology is organised into nine clear sections: science, non science and pseudo-science race, gender and science scientific reasoning scientific explanation laws and causation science and medicine probability and forensic science risk, uncertainty and science policy scientific realism and anti-realism. The articles chosen are clear, interesting, and free from unnecessary jargon. The editors provide lucid introductions to each section in which they provide an overview of the debate, as well as suggestions for further reading.

Schopenhauer’s Philosophy of Value

An Introduction to the Philosophy of Religion

How Philosophers Argue

Thinking of Questions

Thank You for Arguing, Third Edition

The Routledge Companion to Aesthetics

The Art of Argument guides readers through the process of developing, defending and presenting a compelling argument. Primarily aimed at students who are about to undertake or participate in an international mootng competition, The Art of Argument explains in a step-by-step process what to do when you first get the moot problem, how to begin researching the subject matter, the emotional highs and lows, why practice makes perfect, how to handle yourself at the competition, and most importantly to have fun. Through the process of mootng you learn how to construct analytical arguments, to present your point logically and soundly and to consider and address the queries and concerns of your opponent and the Moot Master. For a law student there is no greater skill than constructing a logical and compelling argument.

"Now in its fourth edition, Jay Heinrichs's Thank You for Arguing is your master class in the art of persuasion, taught by history's greatest professors, ranging from Queen Victoria and Winston Churchill to Homer Simpson and Barack Obama. Filled with time-tested secrets for emerging victorious from any dispute, including Cicero's three-step strategy for inspiring action and Honest Abe's Shameless Trick for lowering an audience's expectations, this ... book also includes an assortment of persuasion tips"--Back cover.

The primary focus of the updated, second edition has not changed;it embraces the narrative or storytelling approach to the study of argumentation. The first section introduces readers to rhetorical theorists and their principles. These significant contributions to the field of argumentation and debate include Aristotles views on audiences and the ethical character of an advocate, Burkes dramatictic theory of communication, Brockriedes metaphorical image of arguers, Fishers narrative paradigm, Mills guidelines for testing the causal correlation, Perelman and Obrechts-Tytecas conception of a universal audience, Rokeachs definition of values, and Toulmins model for developing and analyzing argument claims and his conception of arguments as field dependent. Hollihan and Baaskes discussions of these ideas and their applications are easy to follow, unencumbered by technical jargon, and illustrated with engaging examples drawn from current and well-known historical events. The key to the success of this text is the authors ability to show readers how foundational principles of argumentation are used in a variety of real-world situations. The second section covers specialized contexts such as academic debates, courts of law, politics, business and organizations, and interpersonal relationships. Activities that stimulate critical thinking and the implementation of the ideas discussed are provided at the end of each chapter.
