The study of burial practices, of human attitudes and behaviour in the face of death, has been an important part of archaeological research from its very beginnings. Some funerary discoveries have achieved sensational fame. Yet

beyond this the archaeological community quickly came to understand that it is possible to gain as much information about the lives of past people from studying their funerary behaviour as it is from studying their daily activities and the resultant artefacts. This volume gathers together the majority of the papers presented at the International Symposium on Funerary Anthropology, 'Homines, Funera, Astra', which

To further the effort for sustainable development, a conference on Sustainable Construction Materials and Technologies was held at Coventry University, Coventry, U.K., from June 11th - 13th, 2007, to highlight case studies and research on new and innovative ways of achieving sustainability of construction materials and technologies. This book presents selected, important contributions made at the conference.

Over 190 papers from over 45 countries were accepted for presentation at the conference, of which approximately 100 selected papers are published in this book. The rest of the papers are published in two supplementary books. Topics covered in this book include: sustainable alternatives to natural sand, stone, and Portland cement in concrete; sustainable use of recyclable resources such as fly ash, ground municipal waste slag,

pozzolan, rice-husk ash, silica fume, gypsum plasterboard (drywall), and lime in construction; sustainable mortar, concrete, bricks, blocks, and backfill; the economics and environmental impact of sustainable materials and structures; use of construction and demolition wastes, and organic materials (straw bale, hemp, etc.) in construction; sustainable use of soil, timber, and wood products; and related sustainable

Charging for the use of transport infrastructure has very different traditions in the various modes, reflecting the different nature of their infrastructure (nodal vs. linear), but also different historical traditions of open access, system integration, etc. Since the early 90's various European Commission initiatives took on this issue, looking mainly at the road sector, where many countries had no (direct) access charges. Heavy goods vehicles were systematically identified as the primary targets for a renewed approach to this problem. What seemed an easy catch has proved to be much harder, with the various countries adopting almost exclusively national approaches,

and the European institutions unable to drive the process. This book looks at the challenges posed by this objective, recognising that there are multiple objectives for application of road tolls and charges, and discussing the various possible solutions, in the technical, institutional and legal dimensions. The multiplicity of national situations in Europe is put in perspective, the impacts of various charging schemes on regional development and on the environment are estimated, and the recent policy process is analysed, allowing a global view of the remaining difficulties and to make recommendations about the next steps in the process.

Language Policy and Planning in the Mediterranean World is a collection of the best papers presented at the

MedLPLP conference held at the University of Cyprus in 2009, enriched with invited contributions on the same topic. The book presents a panorama of situations with countries such as France, Germany, Cyprus, Malta, Italy, Spain, Poland, Turkey, Greece, Bulgaria, Albania, Romania and Serbia. It explores various aspects of the weight and ecology of the Mediterranean languages, discusses LPP in the light of international law and the protection of human rights, bilingual

education and foreign language acquisition policies. It also addresses the issue of feminization in a broad range of Mediterranean languages comparing French, Italian, Spanish, and, for the first time, Standard and Cypriot Greek. Finally, the book also discusses language revival and renovation policies, language planning in the public space, as well as cases of micro-language management. The volume is an excellent source of information for scholars and students of

From the author of the New York Times–bestselling Lost Fleet series comes 11 action-packed stories of space exploration. In Jack Campbell's Lost Fleet series, Campbell's hero Captain "Black Jack" Geary explores the furthest reaches of space. Here, Campbell explores what

kinds of problems mankind might face as our horizons expand. The third in a series of collections of Campbell's short stories includes some of Campbell's favorite stories, and some of his earliest. A brand-new author's note accompanies each story. "Lady Be Good" is one of Campbell's most popular stories, winner of Analog magazine's "AnLab" reader poll for Best Short Story and cited in Gardner Dozois's Year's Best SF.
