Lawrence Lessig, “ the most important thinker on intellectual property in the Internet era ” , masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers-that-be been able to exert such control over what we can and can ’ t do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine.

In the 1960s the Air Force buried 1,000 ICBMs in pastures across the Great Plains to keep U.S. nuclear strategy out of view. As rural civilians of all political stripes found themselves living in the Soviet crosshairs, a proud Plains individualism gave way to an economic dependence on the military-industrial complex that still persists today.

Chromebooks are perfect for Seniors. Hopefully you are at a state in your life where the Internet helps you but doesn ’ t define you. You don ’ t need to have a powerhouse computer that can have 200 spreadsheets running at the

The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the "Recommendations on the Transport of Dangerous Goods" in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled "Manual of Tests and Criteria".
