Because of changes in the health care system, the hospital has become less suitable as the primary focus of graduate medical education for primary care physicians. However, the current system of financing health care education and services makes it difficult to accomplish the needed shift to training in primary care ambulatory settings. This book suggests ways of lowering financial barriers to primary care training in ambulatory settings.

A comprehensive reference for engineers and researchers, Gas Turbine Heat Transfer and Cooling Technology, Second Edition has been completely revised and updated to reflect advances in the field made during the past ten years. The second edition retains the format that made the first edition so popular and adds new information mainly based on selected published papers in the open literature. See What's New in the Second Edition: State-of-the-art cooling technologies such as advanced turbine blade film cooling and internal cooling Modern experimental methods for gas turbine heat transfer and cooling research Advanced computational models for gas turbine heat transfer and cooling performance predictions Suggestions for future research in this critical technology The book discusses the need for turbine cooling, gas turbine heat-transfer problems, and cooling methodology and covers turbine rotor and stator heat-transfer issues, including endwall and blade tip regions under engine conditions, as well as under simulated engine conditions. It then examines turbine rotor and stator blade film cooling and discusses the unsteady high free-stream turbulence effect on simulated cascade airfoils. From here, the book explores impingement cooling, rib-turbulent cooling, pin-fin cooling, and compound and new cooling techniques. It also highlights the effect of rotation on rotor coolant passage heat transfer. Coverage of experimental methods includes heat-transfer and mass-transfer techniques, liquid crystal thermography, optical techniques, as well as flow and thermal measurement techniques. The book concludes with discussions of governing equations and turbulence models and their applications for predicting turbine blade heat transfer and film cooling, and turbine blade internal cooling.

Thomas is a tall muscular man working in a bookstore because his degree in kinesiology has not yet made him trainer to the stars. On the bright side it allows him to meet interesting people and more importantly to people watch. When a shy young man comes to the store and tries to hide the fact that he is looking for books about BDSM, Thomas is more than happy to help him find his way.

The charismatic forger immortalized in Catch Me If You Can exposes the astonishing tactics of today's identity theft criminals and offers powerful strategies to thwart them based on his second career as an acclaimed fraud-fighting consultant. When Frank Abagnale trains law enforcement officers around the country about identity theft, he asks officers for their names and addresses and nothing more. In a matter of hours he can obtain everything he would need to steal their lives: Social Security numbers, dates of birth, current salaries, checking account numbers, the names of everyone in their families, and more. This illustrates how easy it is for anyone from anywhere in the world to assume our identities and in a matter of hours devastate our lives in ways that can take years to recover from. Considering that a fresh victim is hit every four seconds, Stealing Your Life is the reference everyone needs by an unsurpassed authority on the latest identity theft schemes. Consider these sobering facts: • Six out of ten American companies and government agencies have already been hacked. • An estimated 80 percent of birth certificate requests are fulfilled through the mail for people using only a name and a return address. • Americans write 39 billion checks a year, and half of them never reconcile their bank statements. • A Social Security number costs \$49 on the black market. A driver's license goes for \$90. A birth certificate will set you back \$79. Abagnale offers dozens of concrete steps to transform anyone from an easy mark into a hard case that criminals are likely to bypass: • Don't allow your kids to use the computer on which you do online banking and store financial records (children are apt to download games and attachments that host damaging viruses or attract spyware). • Beware of offers that appeal to greed or fear in exchange for personal data. • Monitor your credit report regularly and know if anyone's been "knocking on your door." • Read privacy statements carefully and choose to opt out of sharing information whenever possible. Brimming with anecdotes of creative criminality that are as entertaining as they are enlightening, Stealing Your Life is the practical way to shield yourself from one of today's most nefarious and common crimes.

Talking About Public Issues

Matters of Opinion offers an interesting insight into 'public opinion' as reported in the media, asking where these opinions actually come from, and how they have their effects. Drawing on the analysis of conversations from focus groups, phone-ins and broadcast interviews with members of the public, Greg Myers argues that we must go back to these encounters, asking questions such as what members of the public thought they were being asked, who they were talking as, and whom they were talking to. He reveals that people don't carry a store of opinions, ready to tell strangers; they use opinions in order to get along with other people, and how they say things is as important as what they say. Engaging and informative, this book illuminates debates on research methods, the public sphere and deliberative democracy, on broadcast talk, and on what it means to participate in public life.

Monitoring and Evaluation of Production Processes

This is a biographical book. I had been careful, on my arrival in Bologna, to take up my quarters at a small inn, so as not to attract any notice, and as soon as I had dispatched my letters to Therese and the French officer, I thought of purchasing some linen, as it was at least doubtful whether I should ever get my trunk. I deemed it expedient to order some clothes likewise. I was thus ruminating, when it suddenly struck me that I was not likely now to succeed in the Church, but feeling great uncertainty as to the profession I ought to adopt, I took a fancy to transform myself into an officer, as it was evident that I had not to account to anyone for my actions.

All he wanted was a distraction- what he got was trouble- named Tully. Risking their lives for others is second nature, but can they trust each other enough to risk their hearts?

This book presents topics on monitoring and evaluation of production processes in the automotive industry. Regulation of production processes is also described in details. The text deals with the implementation and evaluation of these processes during the mass production of components useful in the automotive industry. It evaluates the effects and results achieved after implementation in practice. The book takes into account the different methodologies of the world's automakers and applicable standards, such as standard EN ISO 9001 and the requirements of VDA and ISO/TS 16949. The content is used to those working with the development, production and quality control of new products in the demanding automotive industry. The information provided may also be useful to engineers and technical staff in organizations working with series production and production of spare parts for the automotive and other demanding industries. The content presented was written based on discussions with various companies and organizations, such as Magna Steyr (Graz, Austria), Ford (Cologne, Germany; Prague, CZ), GM Powertrain (Győr, Hungary), VW (Škoda), ZF (Passau, Friedrichshafen, Germany), Bosch-Rexroth AG (Fellbach, Germany), John Deere (Mannheim, Germany; USA), Claas (Paderborn, Germany), Allison Transmission (USA), Landini (Reggio Emilia, Milan, Italy), Timken Polska (Sosnowiec, Poland), SNR France (Annecy, France), Sweden SKF Group (Lutsk, Ukraine), ZVL Ltd. (Hattingen, Germany), ZVL SpA (Milano, Italy), FAG Schaeffler Group (Debrecen, Hungary), VPZ (Vologda, Russia), ZKL OJSC (Brno, CZ), ZVL Auto Company Ltd. (Prešov, Slovakia), ZVL (Žilina, Slovakia), MAN (Munich, Germany), FTE Automotive (Kerpen, Germany), Rösler (Untermerzbach, Germany; Vienna, Austria), Spaleck (Bocholt, Germany) and Caterpillar (USA). This comprehensive study was supported by grant VEGA 1/0409/13.

Originally written as a gift from a father to a son, the book's simple message--to be understanding, thoughtful, and appreciative--has been enjoyed by men and women of all ages. This edition with all three volumes has been redesigned for a new generation.
