□ In her latest book, Brené Brown writes, □If we want to find the way back to ourselves and one another, we need language and the grounded confidence to both tell our stories and be stewards of the stories that we hear. This is the framework for meaningful connection.□ In Atlas of the Heart, Brown takes us on a journey through eighty-seven of the emotions and experiences that define what it means to be human. As she maps the necessary skills and an actionable framework for meaningful connection, she gives us the language and tools to access a universe of new choices and second chances□a universe where we can share and steward the stories of our bravest and most heartbreaking moments with one another in a way that builds connection. two decades, Brown's extensive research into the experiences that make us who we are has shaped the cultural conversation and helped define what it means to be courageous with our lives. Atlas of the Heart draws on this research, as well as on Brown's singular skills as a storyteller, to show us how accurately naming an experience doesn't give the experience more power—it gives us the power of understanding, meaning, and choice. Brown shares, "I want this book to be an atlas for all of us, because I believe that, with an adventurous heart and the right maps, we can travel anywhere and never fear losing ourselves."

Following on from the success of the first edition, Short Answer Questions and MCQs in Anaesthesia and Intensive Care has been completely rewritten to reflect the changes to the final FRCA exam from a long essay based examination to compulsory short answer questions (SAQs). This guide aims to introduce methods and

systems of answering questions succinctly and accurately.

Almost all of the questions have been asked in the final FRCA since 1996 and most chapters carry more detail than required to reach a pass standard. The new edition takes a question-orientated approach and provides guidance for the final exam. Given the short time allowed for answering the SAQs, previous practice, prior to sitting the examination, is essential.

Each of the twelve sections has a comprehensive set of multiple choice questions (MCQ) to the same standard as those set by the Royal College of Anaesthetists. It is vital that

candidates practice MCQs as well as SAQs, and the ninety multiple choice questions that follow the SAQ paper carry just as much weight as the SAQ paper. The book has been structured as topic based sections and chapters, each of which can be followed and used to enable self-testing. This book is an invaluable revision aid during preparation for the final FRCA exam and, due to the breadth of content, also forms a useful ready reference throughout anaesthetic training.
