Tactical Combat Casualty Care (TCCC) has saved hundreds of

lives during our nation's conflicts in Iraq and Afghanistan. Nearly 90 percent of combat fatalities occur before a casualty reaches a medical treatment facility.

Therefore, the prehospital phase of care is needed to focus on reducing

the number of combat deaths. However, few military physicians have had training in this area and, at the onset of hostilities, most combat medics, corpsmen, and pararescue personnel in the U.S. military have been trained to
