

Australia A Three Dimensional Expanding Country Guide City Skylines

The views of leading researchers on the emerging topic of post-mortem digital legacy and posthumous interaction are explored in this book which combines the technical, cultural and legal aspects associated with this new branch of HCI. The technical aspects of emerging technologies, both for the web and mobile platforms, are analysed and useful information is provided for system development, requirements engineering, and data management and storage. The authors address the cultural aspects of virtual identity, ethical problems, cross-culture differences regarding memories and death, bereavement, taboos and beliefs, and the visual/verbal representations of death. The legal aspects covered include regulation, property, privacy and conflicts between international and local jurisdictions. The coverage of Digital Legacy and Interaction: Post-Mortem Issues is relevant to the development of systems that consider the influence of death, bereavement and mortality on Human Computer Interaction. The interdisciplinary approach that guides this book is intended to foster enriching and innovative discussions amongst HCI scholars and professionals. Cristiano Maciel and Vinícius Carvalho Pereira are researchers at LAVI (Laboratory of Interactive Virtual Environments) and professors at UFMT (Federal University of Mato Grosso, Brazil).

Bring Great Britain to life with this beautiful three-dimensional pocket guide, featuring its most famous sites. Remember Great Britain for ever with this exquisite three-dimensional expanding pocket guide. Presented in a beautiful slipcase, the guide unfolds to a length of 1.5 metres and features 13 of Great Britain's most famous sites, including Buckingham Palace, the Tower of London, Tate Modern, Windsor Castle, Stonehenge, Oxford, Canterbury Cathedral, Shakespeare's Birthplace, Bath, Caernarfon Castle, the Lake District, the Scottish Highlands and the Giant's Causeway. The perfect souvenir for anyone wishing to remember a visit to this fascinating place, steeped in thousands of years of culture and heritage.

Bring the history of flight and aviation to life with this fact-filled three-dimensional expanding guide. Starting with the earliest hot air balloons and gliders, the guide covers the 12 key moments in the story of flight, including early planes like the Wright Flyer, airships, World War I and World War II aircraft, civil aviation, mass passenger transport, modern war planes, modern passenger planes and small private aircraft.

This beautifully illustrated cut-paper expanding pocket guide features the most important sights in the Lake District and Cumbria including Dove Cottage, Hill Top, Tullie House, Brantwood, the Beacon, Abbot Hall Art Gallery and Museum, Blackwell Arts & Crafts House, the Guildhall and the Dock Museum. Presented in a slipcase and unfolding to a length of 1.5 metres, this is the perfect way to remember a visit to this fascinating and beautiful region.

A Three-Dimensional Expanding City Guide

Australia

This stunning memento features 12 of Hong Kong and Macau's most famous sites: the Peninsula Hotel, Tai O, Tian Tan Buddha, Victoria Peak, Chi Lin Nunnery, Hong Kong Convention and Exhibition Centre, Aberdeen Harbour, Happy Valley Race Course, Victoria Harbour, Statue Square, the ruins of St Paul's and Guia Fortress.

Bring San Francisco to life with this amazing three-dimensional expanding city skyline. This cut-paper guide unfolds to a length of 1.5-metres and features the most important sights in San Francisco, such as the Golden Gate Bridge, Alcatraz Island, Fisherman's Wharf, the AT&T Park and the San Francisco Museum of Modern Art. Presented in a beautiful slipcase, this is the perfect souvenir or gift for anyone wishing to remember a trip to this fantastic city.

Bring the history of space exploration to life with this fact-filled three-dimensional expanding pocket guide. Starting with the first artificial satellite Sputnik, the guide covers the 12 key moments in the history of space exploration, including Vostok 1, Voshkod 2, Kennedy Space Center, Apollo 11, Eagle Lunar Module, Voyager 1, Space Shuttle Columbia, Mir Space Station, Cassini-Huygens, International Space Station and Curiosity Mars Rover.

A 3D Expanding Museum Guide

The Biology of Kangaroos, Wallabies and Rat-kangaroos

Great Britain

The Metropolitan Museum of Art

Bring to life one of the most famous landmarks in Britain with this fascinating three-dimensional expanding pocket guide. Unfolding to a length of 1.5 metres, the guide features twelve three-dimensional panels on key sites including the White Tower, the Crown Jewels, Tower Green, the Chapel Royal, the ravens, Traitors' Gate, the Yeoman Warders, torture, the Line of Kings, the Bloody Tower and the Royal Menagerie.

This book is the product of more than half a century of leadership and innovation in physics education. When the first edition of University Physics by Francis W. Sears and Mark W. Zemansky was published in 1949, it was revolutionary among calculus-based physics textbooks in its emphasis on the fundamental principles of physics and how to apply them. The success of University Physics with generations of (several million) students and educators around the world is a testament to the merits of this approach and to the many innovations it has introduced subsequently. In preparing

this First Australian SI edition, our aim was to create a text that is the future of Physics Education in Australia. We have further enhanced and developed University Physics to assimilate the best ideas from education research with enhanced problem-solving instruction, pioneering visual and conceptual pedagogy, the first systematically enhanced problems, and the most pedagogically proven and widely used online homework and tutorial system in the world, Mastering Physics.

This comprehensive and carefully edited volume presents a variety of experimental methods used in Shock Waves research. In 14 self contained chapters this 9th volume of the "Shock Wave Science and Technology Reference Library" presents the experimental methods used in Shock Tubes, Shock Tunnels and Expansion Tubes facilities. Also described is their set-up and operation. The uses of an arc heated wind tunnel and a gun tunnel are also contained in this volume. Whenever possible, in addition to the technical description some typical scientific results obtained using such facilities are described. Additionally, this authoritative book includes techniques for measuring physical properties of blast waves and laser generated shock waves. Information about active shock wave laboratories at different locations around the world that are not described in the chapters herein is given in the Appendix, making this book useful for every researcher involved in shock/blast wave phenomena.

Bring Boston to life with this three-dimensional expanding pocket guide. Presented in a beautiful slipcase, the guide unfolds to a length of 1.5 metres and features 12 of Boston's most famous sites, including State Garden, Boston Public Garden, USS Constitution, North End, Boston Harbour, Faneuil Hall Marketplace, Fenway Park, Esplanade, Museum of Fine Arts, Isabella Stewart Gardner Museum, John F. Kennedy Presidential Library and Museum and Harvard Square. This is the perfect gift or souvenir for anyone wishing to remember a trip to Boston.

Proceedings of the ICR'22 International Conference on Innovations in Computing Research

Digital Legacy and Interaction

This book, Proceedings of the ICR '22 International Conference on Innovations in Computing Research, provides an essential compilation of relevant and cutting-edge academic and industry work on key computer and network security, smart cities, smart energy, IoT, health informatics, biomedical imaging, data science and computer science and engineering education topics. It offers an excellent professional development resource for educators and practitioners on the state-of-the-art in these areas and contributes towards the enhancement of the community outreach and engagement component of the above-mentioned areas. Various techniques, methods, and approaches adopted by experts in these fields are introduced. This book provides detailed explanation of the concepts that are pertinently reinforced by practical examples, and a road map of future trends that are suitable for innovative computing research. It is written by professors, researchers, and industry professionals with long experience in these fields to furnish a rich collection of manuscripts in highly regarded topics that have not been creatively compiled together before. This book can be a valuable resource to university faculty, students to enhance their research work and as a supplement to their courses in these fields, researchers, and industry professionals. Furthermore, it is a valuable tool to experts in these areas to contribute towards their professional development efforts.

The Foundation of Australia's Capital Cities is the story of how the places chosen for Australia's seven colonial capitals came to shape their unique urban character and built environments. Tony Webster traces the effects of each city's geologically diverse coastal or riverine landform and the local natural materials that were available for construction, highlighting how the geology and original landforms resulted in development patterns that have persisted today.

This guide takes you through the Metropolitan Museum's most treasured rooms & exhibitions: the Great Hall, Temple of Dendur, Charles Engelhard Court, the Arms & Armour Court, Boiserie Hotel De Varengeville period room, Petri European Sculpture Court, Nur al-Din Room Islamic period room, the Modern Art Gallery & Astor Court.

This memento features 12 of Paris's most famous sites: the Eiffel Tower, Les Invalides, Notre-Dame de Paris, the Louvre, the Tuileries Gardens, Musee d'Orsay, Pompidou Centre, Pere Lachaise, Sacre-Coeur Basilica, Moulin Rouge, the Arc de Triomphe and Opera."

Synopsis coming soon.....

A cut-paper guide that unfolds to a length of 1.5-metres and features the most important sites in Prague, including Prague Castle, St Vitus Cathedral, Petrin Hill, Wallenstein Palace, Charles Bridge, Old-New Synagogue, Golden Lane, Old Town Square, Astronomical Clock, Municipal House, Wenceslas Square, National Theatre and Dancing House.

Features 12 of New York City's most famous sites in a cut-paper, accordion-fold novelty item issued in a slipcase.

Discover one of the world's most famous palaces with this exquisite cut-paper pocket guide. Unfolding to a length of 1.5 metres and presented in a beautiful slipcase, the guide features sumptuous rooms and magnificent treasures such as the Hall of Mirrors, the King's Room, the Grand Trianon and the Queen's Hamlet. Each illustration is accompanied by a short description, making this the perfect souvenir.

Stem Cells: Advances in Research and Application: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Stem Cells. The editors have built Stem Cells: Advances in Research and Application: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Stem Cells in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Stem Cells: Advances in Research and Application: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Protecting designs is complex and diverse; it involves deciding whether to protect them by design law, copyright law, or by both laws. A single protection may be under- or overprotective but two or more can be overprotective if there are no rules regulating the overlap. Legal systems in Europe and abroad have struggled to find the most adequate solution to this problem. This book traces the history of the design/copyright interface of fifteen countries, selected for their diversity in the way they dealt with the interface. It examines how these countries have coped with the problems engendered by the interface, the rules they applied to it over time and the reasons for legislative changes. This analysis reveals the most appropriate rules to regulate the interface at EU and global level and will appeal to academics, practising lawyers, judges, students and policymakers all over the world.

The book presents a collection of accepted papers from the 3DGeoinfo 2015 international conference held in Kuala Lumpur, Malaysia from October 28 - 30, 2015. All papers underwent double-blind review by experts from around the globe. The conference brought together pioneering international researchers and practitioners to facilitate the dialogue on emerging topics in the field of 3D geo-information. The focus areas include: - Data Collection and Modeling: advanced approaches for 3D data collection, reconstruction and methods for representation- Data Management: topological, geometrical and network models for maintenance of 3D geoinformation- Data Analysis and Visualization: frameworks for representing 3D spatial relationships, 3D spatial analysis and algorithms for navigation, interpolation, advanced VR, AR and MR visualisation, as well as 3D visualization on mobile devices- 3D Applications: city models, Cadastre, LBS, etc.

This pocket guide unfolds to a length of 1.5 metres and features twelve of the stunning and historically significant chateaux of the Loire region, including Chambord, Cheverny, Blois, Chaumont, Chenonceau, Amboise, Villandry, Langeais, Chinon and Saumur."

Over nine successful editions, CAMPBELL BIOLOGY has been recognised as the world's leading introductory biology textbook. The Australian edition of CAMPBELL BIOLOGY continues to engage students with its dynamic coverage of the essential elements of this critical discipline. It is the only biology text and media product that helps students to make connections across different core topics in biology, between text and visuals, between global and Australian/New Zealand biology, and from scientific study to the real world. The Tenth Edition of Australian CAMPBELL BIOLOGY helps launch students to success in biology through its clear and engaging narrative, superior pedagogy, and innovative use of art and photos to promote student learning. It continues to engage students with its dynamic coverage of the essential elements of this critical discipline. This Tenth Edition, with an increased focus on evolution, ensures students receive the most up-to-date, accurate and relevant information.

Olethreutine moths often have fruit-boring larvae and this economically important group includes many horticultural pests such as codling moths, Oriental fruit moths and macadamia nut borers. This volume is the first reference to describe the 90 olethreutine genera present in Australia. It provides generic definitions, a key to genera, generic descriptions, and illustrations of adults, heads, venation, genitalia of both sexes and other diagnostic structures of all genera. Summaries of biology and distribution and a checklist for all named Australian species are given for each genus. Importantly, it includes a comprehensive reorganisation of olethreutine classification, based on generic revisions, with a worldwide impact. The volume contains copious illustrations (two species per genus where possible) to convey generic concepts, and to allow identification of this economically important group. Nearly all olethreutine genera present in Australia extend into Asia and beyond, so the book will be relevant to horticultural pests throughout Asia, and crucial to an understanding of olethreutine evolution worldwide. The diverse Australian olethreutine fauna is particularly rich in enarmoniine and grapholitine genera, several new to science and adding significantly to the concepts of these two tribes. Given the wealth of biological information, the book will be important for ecological work on phytophagous insects well beyond Australia.

Remember Japan for ever with this exquisite cut-paper guide. This beautifully illustrated three-dimensional pocket guide unfolds to a length of 1.5 metres and features the most important sites in Japan, including the Imperial Palace, Shibuya Crossing, Meji Shrine, Rainbow Bridge, Tokyo Skytree, Kamakura Buddha, Mount Fuji, Golden Pavilion, Kiyomizu Temple, Todaiji Temple, Himeji Castle, Hiroshima Peace Memorial and Itsukushima Shrine. Presented in a slipcase, this is the perfect gift or souvenir for anyone wishing to remember a visit to Japan.

The Copyright/Design Interface

The Foundation of Australia's Capital Cities

As the largest ever Australian government investment in creative industries development, the Creative Industries Innovation Centre delivered tailored business services to more than 1500 creative businesses from 2009 to 2015 and provided industry intelligence and advice for public policy and peak sectoral activity. This collection gives an overview of the current 'state of business' in Australia's creative industries – both as an industry sector in its own right and as an enabling sector and skills set for other industries – and reflects on business needs, creative industries policy and support services for the sector. With contributions from the Centre's team of senior business advisers and from leading Australian researchers who worked closely with the Centre –including experts on design-led innovation and the creative economy – and case studies of leading Australia creative businesses, the book is intended as an industry-relevant contribution to business development and public policy. Content links to the publicly accessible Creative Industries Innovation Centre Collection Archive at the UTS Library, which holds material from Centre's activities over its six years of operation.

This memento features 12 of Washington's most famous sites: Arlington National Cemetery, the Lincoln Memorial, the Vietnam Memorial, the White House, the Washington Memorial, National Archives Building, Smithsonian Castle, National Air and Space Museum, National Gallery of Art, US Botanic Gardens, US Capitol and Supreme Court.

A pocket guide that unfolds to a length of 1.5 metres and features 12 of the most important sites in Venice, including St Mark's Basilica, the Doge's Palace, Rialto Bridge, I Frari, Galleria dell'Accademia, Ca'd'Oro, Peggy Guggenheim Museum, Burano, Bridge of Sighs, Basilica di San Giovanni e Paolo and Basilica di Santa Maria della Salute.

This illustrated three-dimensional pocket guide unfolds to a length of 1.5 metres and features the most important sites in Australia, including Sydney Opera House, Sydney Harbour Bridge, Parliament House, Melbourne Cricket Ground, Twelve Apostles, Port Arthur, Daintree Rainforest, St Peter's Cathedral, Wave Rock, Uluru, the Ghan, Kakadu National Park and the Great Barrier Reef. Presented in a slipcase, this is the perfect gift or souvenir for anyone wishing to remember a visit to Australia.

This book covers the proceedings of a major 2006 symposium on macropods that brought together the many recent advances in the biology of this diverse group of marsupials, including research on some of the much neglected macropods such as the antilopine wallaroo, the swamp wallaby and tree-kangaroos. More than 80 authors have contributed 32 chapters, which are grouped into four themes: genetics, reproduction and development; morphology and physiology; ecology; and management. The book examines such topics as embryonic development, immune function, molar progression and mesial drift, locomotory energetics, non-shivering thermogenesis, mycophagy, habitat preferences, population dynamics, juvenile mortality in drought, harvesting, overabundant species, road-kills, fertility control, threatened species, cross-fostering, translocation and

reintroduction. It also highlights the application of new techniques, from genomics to GIS. Macropods is an important reference for academics and students, researchers in molecular and ecological sciences, wildlife and park managers, and naturalists.

This volume contains the proceedings of a workshop held in Melbourne, Australia, entitled "Coupling of Fluids, Structures and Waves in Aeronautics". The 22 papers deal with new computational methods for multi-disciplinary design in aeronautics. They are grouped into chapters on fluids, structures, electromagnetics, optimisation, mathematical methods and tools, and aircraft design. Several papers treat coupling of these themes in a multi-physics setting. Included is a 17-page report of a Round Table discussion entitled "Future Tools for Design and Manufacture of Innovative Products in the Aeronautics Industry", together with a summary of important themes and issues. This research promotes the advanced technologies necessary for continued development of efficient and environmentally sustainable transport systems.
