This basic source for identification of U.S. manufacturers is arranged by product in a large multi-volume set. Includes: Products & services, Company profiles and Catalog file.

The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile

groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments.

- a tool for strategic planning, employment searches or financial research. Contains trends analysis, statistical tables, and an industry glossary. Includes one page profiles of 400 leading chemicals, coatings and plastics industry firms - includes addresses, phone numbers, executive names.

"Detroit has always been a city in the making--a place of promise and change." So writes Mort Crim in Greater Detroit: Renewing the Dream as he explores the city's heritage of abundant opportunity and transformation. Here, in the Motor City, the American dream is reborn every day, making Detroit a place that is constantly reinventing itself. Accompanied by Susan VanDeRyt's stunning collection of high-quality images from the area's finest photographers, Crim shows the many ways that Detroit fulfills its legacy as a destination for those in search of a better life. The results are clear. Detroit now boasts the largest number of privately owned homes of any urban center in the nation, as well as a staunch work ethic and an unwavering sense of resilience in the face of adversity. Like the American dream itself, Detroit is about pride. Pride in being a distinctly American metropolis. Pride in the revitalized automotive industry that slumped in the 1980s but that is once again making Detroit the Automotive Capital of the World. Pride in the soaring downtown skyscrapers. And pride in the countless communitywide celebrations--Freedom Festival on

the riverfront; the IndyCar race on Belle Isle; and the Gold Cup races on the Detroit River, the best-attended single sporting event in the nation. Detroit. Renewing and sustaining the American dream. As Mort Crim sums it up, Detroit is where Americans "across the centuries have come to improve their lot--to find the promised land." It is, indeed, the Renaissance City.--Publisher's description.

The chemicals manufacturing industry is a vibrant, global business that encompasses many important sectors: from commodity chemicals, to specialty chemicals to custom manufacturing. Key products include biochemicals, nanochemicals, polymers, petrochemicals, fertilizers, plastics, coatings, ceramics, solvents, additives, dyes and many other products basic to home and business needs. In addition, the pharmaceuticals industry is often included when discussing chemicals. Plunkett's Chemicals, Plastics & Coatings Industry Almanac 2008 covers such sectors, providing a market research tool for competitive intelligence, strategic planning, business analysis and even employment searches. Our coverage includes business trends analysis and industry statistics. The almanac also contains a chemicals, plastics and coatings business glossary and a listing of industry contacts, such as industry associations and
