Esperanza's Box of Saints is a magical, humorous, and passion-filled odyssey about a beautiful young widow's search for her missing child -- a mission that takes her from a humble Mexican village to the rowdy brothels of Tijuana and a rarely seen side of Los Angeles. Rescued from turmoil by her favorite saint, Esperanza embarks on a journey that tests her faith, teaches her the ways of the world, and transforms her from a fervently religious innocent to an independent, sexual, and passionately devout woman.

In its 5th edition, Fonética y fonología españolas remains an indispensable resource for students of Spanish as a second language. This comprehensive text covers the essential components required for fluency, with a detailed treatment of phonetics and phonology that provides a powerful framework for the study and practice of spoken language. A focus on the application of articulatory methods enables English speakers to hone advanced pronunciation skills. Extensive attention to dialect phenomena found in Latin American and Peninsular Spanish introduces readers to fascinating sociolinguistic dimensions of regional variations in spoken Spanish. An enhanced pedagogical framework provides a sophisticated and expedient set of linguistic tools. Written and oral exercises help students sharpen their pronunciation. Numerous maps, tables, figures, and illustrations guide students to an intuitive understanding of Spanish as used around the world. Augmented by online supplemental resources—including plentiful audio and video samples, class discussion topics, and group exercises-- this textbook is designed to build students' confidence while encouraging their participation and sharpening of conversational skills.

This third edition of this text presents the major grammatical contrasts between English and Spanish in a simple and direct manner that is ideal for teachers of either language. This book addresses difficult grammatical topics for the English speaker, such as the question of aspect (preterit/imperfect) and the Spanish rorindicative/subjunctive; the English modal auxiliary system; and other challenging topics for the Spanish speaker. This reworked and expanded edition presents a complete inventory of all the major inter-lingual contrasts, emphasizing those contrasts that pose difficulties for teachers and students alike. The text features numerous exercises and, new with this edition, an extensive glossary of grammatical terms. The main objective of this Research Topic is to determine the conditions that place students at risk of school failure, identifying student and context variables. In spite of the fact that there is currently little doubt about how one learns and how to teach, in some countries of the “ developed world, “ there is still there is a high rate of school failure. Although the term “ school failure “ is a very complex construct, insofar as its causes, consequences, and development, from the field of educational psychology, the construct “ student engagement “ has recently gained special interest in an attempt to deal with the serious problem of school failure. School engagement builds on the anatomy of the students ‘ involvement in school and describes their feelings, behaviors, and thoughts about their school experiences. So, engagement is an important component of students ‘ school experience, with a close relationship to achievement and school failure. Children who self-set academic goals, attend school regularly and on time, behave well in class, complete their homework, and study at home are likely to interact adequately with the school social and physical environments and perform well in school. In contrast, children who miss school are more likely to display disruptive behaviors in class, miss homework frequently, exhibit violent behaviors on the playground, fail subjects, be retained and, if the behaviors persist, quit school. Moreover, engagement should also be considered as an important school outcome, eliciting more or less supportive reactions from educators. For example, children who display school-engaged behaviors are likely to receive motivational and instructional support from their teachers. The opposite may also be true. But what makes student engage more or less? The relevant literature indicates that personal variables (e.g., sensory, motor, neurodevelopmental, cognitive, motivational, emotional, behavior problems, learning difficulties, addictions), social and/or cultural variables (e.g., negative family conditions, child abuse, cultural deprivation, ethnic conditions, immigration), or school variables (e.g. coexistence at school, bullying, cyberbullying) may concurrently hinder engagement, preventing the student from acquiring the learnings in the same conditions as the rest of the classmates.
