Royal Society Prize for Science Books shows how four tools enabled us humans to control the destiny of our species "A wondrous, visionary work." --Tim Flannery, scientist and author of the bestselling *The Weather Makers*

What enabled us to go from simple stone tools to smartphones? How did bands of hunter-gatherers evolve into multinational empires? Readers of *Sapiens* will say a cognitive revolution -- a dramatic evolutionary change that altered our brains, turning primitive humans into modern ones -- caused a cultural explosion. In *Transcendence*, Gaia Vince argues instead that modern humans are the product of a nuanced coevolution of our genes,

environment, and culture that goes back into deep time. She explains how, through four key elements -- fire, language, beauty, and time -- our species diverged from the evolutionary path of all other animals, unleashing a compounding process that launched us into the Space Age and beyond. Provocative and poetic, Transcendence shows how a primate took dominion over nature and turned itself into something marvelous.
