Insurance is perhaps the most effective device for managing ‘risk,’ which is a pervasive phenomenon in our lives. We can sometimes avoid or reduce it but never entirely eliminate it. Whether you are a Graduate student who is studying insurance as a part of your curriculum, or an Executive managing your Organization’s Insurance and Risk Management Program this book will provide you with a strong conceptual foundation, comprehensive knowledge of non-life and life insurance products, and perspectives on how insurance functions as a part of the economy. Essentially, you will understand ‘why’ it is needed, ‘what’ solutions it provides, and ‘how’ different business processes and professionals work together to deliver the vital compensation to victims of disasters. Organized in 18 chapters that are comprehensive yet brief, it continuously relates facts to theories, concepts to processes, events to their context, and the rule-of-thumb to underlying basic principles. Thus, insurance will be demystified, and you will be empowered to decode ‘insurance speak.’

I was a teacher for awhile. I started because I liked education and wanted to do something to express myself creatively but after I taught a basic psychology course called Human Growth & Development over 30 times, I said to myself I don't believe in the fake science of psychology anymore. I could keep doing this to earn a living but everyday I feel like I'm wasting my life. The point is that it's a great profession if you like the course material and the students who are mostly young, well-intentioned and inspired. I'm pro-teacher because I was one. I think it's one of the few truly honorable professions. This is not a teacher job book. I wrote a separate book for that.
