With an introduction by Charlotte R. Brown and William Edward Morris. David Hume (1711–1776) was the most important philosopher ever to write in English, as well as a master stylist. This volume contains his major philosophical works. A Treatise of Human Nature (1739–1740), published while Hume was still in his twenties, consists of three books on the understanding, the passions, and morals. It applies the experimental method of reasoning to human nature in a revolution that was intended to make Hume the Newton of the moral sciences. Disappointed with the Treatise's failure to bring about such a revolution, Hume later recast Book I as An Enquiry concerning Human Understanding (1751), and Book III as An Enquiry concerning the Principles of Morals, which he regarded as 'incomparably the best' of all his works. Both Enquiries went through several editions in his lifetime. Hume's works, controversial in his day, remain deeply and widely influential in ours, especially for his contributions to our understanding of the nature of morality, political and economic theory, philosophy of religion, and philosophical naturalism. This volume also includes Hume's anonymous Abstract of Books I and II of the Treatise, and the short autobiographical essay, 'My Own Life', which he wrote just before his death.

John Ashbery's most renowned collection of poetry -- Winner of The Pulitzer Prize, the National Book Award, and the National Book Critics Circle Award First released in 1975, Self-Portrait in a Convex Mirror is today regarded as one of the most important collections of poetry published in the last fifty years. Not only in the title poem, which the critic John Russell called "one of the finest long poems of our period," but throughout the entire volume, Ashbery reaffirms the poetic power that made him an outstanding figure in contemporary literature. These are poems "of breathtaking freshness and adventure in which dazzling orchestrations of language open up whole areas of consciousness no other American poet as ever begun to explore" (The New York Times).

MAN, born in a family, is compelled to maintain society, from necessity, from natural inclination, and from habit. The same creature, in his farther progress, is engaged to establish political society, in order to administer justice; without which there can be no peace among them, nor safety, nor mutual intercourse. We are, therefore, to look upon all the vast apparatus of our government, as having ultimately no other object or purpose but the distribution of justice, or, in other words, the support of the twelve judges. Kings and parliaments, fleets and armies, officers of the court and revenue, ambassadors, ministers, and privy-counsellors, are all subordinate in their end to this part of administration. Even the clergy, as their duty leads them to inculcate morality, may justly be thought, so far as regards this world, to have no other useful object of their institution.

This tutorial book helps you to get started with Autodesk's popular 3D modeling software using step-by-step tutorials. It starts with creating parts of an Oldham Coupling Assembly, assembling them, and then creating print ready drawings. This process gives you an overview of the design process and provides a strong base to learn additional tools and techniques. The proceeding chapters will cover additional tools related to part modelling, assemblies, sheet metal design, and drawings. Brief explanations and step-by-step tutorials help you to learn Autodesk Inventor quickly and easily. • Get an overview of the design process • Familiarize yourself with the User Interface • Teach yourself to create assembly presentations • Create custom sheet formats and templates • Learn additional part modelling tools with the help of real-world exercises • Learn to create different variations of a part • Learn Top-down assembly design and Design Accelerator • Learn to create and animate mechanical joints • Create basic sheet metal parts • Create custom punches and insert them into the sheet metal part • Create and annotate sheet metal drawings • Learn to add GD&T annotations to the drawings Downloadable tutorial and exercise file from the companion website. As requested by Congress and the White House Office of Science and Technology Policy (OSTP), this report assists federal agencies in crafting plans and reports that are responsive to the Government Performance and Results Act (GPRA), OMB Guidance, and agency missions. Using a case study approach, the report identifies best practices used by individual agencies to evaluate the performance and results of their science and technology programs. The report takes into account individual agencies' missions and how science and technology programs and human resource needs are factored into agency GPRA plans. Specific applications of recommendations are included from COSEPUP's earlier report entitled Evaluating Federal Research Programs: Research and the Government Performance and Results Act.

A cursed mermaid who wonders if she'll ever find the one. A sheriff who thinks he's past his prime. Snow is falling, holiday magic is all around, and two people are about to find that it's never too late for second chances. Sheriff Aaron Holmes is a Silver Fox-only he doesn't know it. He thinks he's past his prime and has settled on the idea that in a town full of magic, he'll never have his happily ever after. Charlotta Lawsen spent one thousand years sleeping-until she woke up, and that very day, met and fell promptly head-over-heels for the new deputy in town. Twenty-five years later, she's only more in love with Aaron, but she knows with her reputation, she doesn't have a snowball's chance with the good-to-his-core sheriff. It's the season of magical beginnings, though, and Aaron and Charlotta are about to experience the perfect holiday recipe: one part meddling family, two parts Fate, a dash of romance, and the secret ingredient of a hidden treasure ... mix it all up, and what do you get? A Sapphire Lake tale (or is it tail?) that'll have you singing "Silver Bells" and craving tater tots (trust me, it's a thing) ...Sassy mermaids + sexy sheriffs = a Christmas story you don't want to miss.

THERE are certain sects, which secretly form themselves in the learned world, as well as factions in the political; and though sometimes they come not to an open rupture, they give a different turn to the ways of thinking of those who have taken part on either side. The most remarkable of this kind are the sects, founded on the different sentiments with regard to the dignity of human nature; which is a point that seems to have divided philosophers and poets, as well as divines, from the beginning of the world to this day. Some exalt our species to the skies, and represent man as a kind of human demigod, who derives his origin from heaven, and retains evident marks of his lineage and descent. Others insist upon the blind sides of human nature, and can discover nothing, except vanity, in which man surpasses the other animals, whom he affects so much to despise. If an author possess the talent of rhetoric and declamation, he commonly takes part with the former: If his turn lie towards irony and ridicule, he naturally throws himself into the other extreme. I am far from thinking, that all those, who have depreciated our species, have been enemies to virtue, and have exposed the frailties of their fellow creatures with any bad intention. On the contrary, I am sensible that a delicate sense of morals, especially when attended with a splenetic temper, is apt to give a man a disgust of the world, and to make him consider the common course of human affairs with too much indignation. I must, however, be of opinion, that the sentiments of those, who are inclined to think favourably of mankind, are more advantageous to virtue, than the contrary principles, which give us a mean opinion of our nature. When a man is prepossessed with a high notion of his rank and character in the creation, he will naturally endeavour to act up to it, and will scorn to do a base or vicious action, which might sink him below that figure which he makes in his own imagination. Accordingly we find, that all our polite and fashionable moralists insist upon this topic, and endeavour to represent vice as unworthy of man, as well as odious in itself.

Admitting you're a bell-end is the first step to salvation... KSI is one of the biggest and baddest YouTube stars on the planet. With over a billion views and millions of subscribers to his name, he is the undisputed king of social media. But despite this success he is a self-confessed bell-end. Excessively posting selfies, oversharing about his dead nan, spending all day scouring Tinder and suffering from red-hot Fifa rage, are just some of his undesirable online habits. However, with acceptance comes salvation and now KSI is blowing the doors off the internet to find the cure. No one is spared, as KSI takes down fellow YouTubers, trolls, paedos, Tinder catfishers and Nigerian scammers in an all-out assault on the online universe. Along the way he also reveals how to become a YouTube kingpin as well as his hot Fifa tips, before he unveils his online revolution to help save the next generation from his fate. So, if you want to avoid becoming a total bell-end, then calm your tits, and simply take the medicine KSI is dishing up.

The significantly updated third edition of this short, practical book prepares students to write a questionnaire, generate a sample, conduct their own survey research, analyse data, and write up the results, while learning to read and interpret excerpts from published research. It combines statistics and survey research methods in a single book.

Fifteen-year-old Yuki is struggling at school with her confidence, and goes to Japan to stay with her grandfather, a well-known manga artist and to whom she is very close. But during her visit, a calamitous event occurs - the East Coast Earthquak and Tsunami - and her beloved Grandpa is lost. Yuki and her friend Taka must make sense of the terrible situation and come to terms with the loss of their life as they knew it - and see that through renewal and with resilience, they can emerge from this tragedy with optimism for the future. Interwoven with Japanese folk tales, modern-day ghost stories, and the creation of her very own vibrant manga hero, Yuki finds the courage to overcome extraordinary odds, and take her first steps into the world that lies beyond catastrophe. Told through both prose and manga, this story for young adults will touch the heart of any reader.

In his writings, David Hume set out to bridge the gap between the learned world of the academy and the marketplace of polite society. This collection, drawing largely on his *Essays Moral, Political, and Literary* (1776 edition), which was even more popular than his famous *Treatise of Human Nature*, comprehensively shows how far he succeeded. From 'Of Essay Writing' to 'Of the Rise and Progress of the Arts and Sciences' Hume embraces a staggering range of social, cultural, political, demographic, and historical concerns. With the scope typical of the Scottish Enlightenment, he charts the state of civil society, manners, morals, and taste, and the development of political economy in the mid-eighteenth century. These essays represent not only those areas where Hume's arguments are revealingly typical of his day, but also where he is strikingly innovative in a period already famous for its great thinkers. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

The Essential Philosophical Works

Self-Portrait in a Convex Mirror

A Collection of essays from famous Scottish philosopher David Hume, one of the most prominent figures of the Scottish Enlightenment and a close friend of Adam Smith. Hume's contributions to economics are found mostly in his Political Discourses (1752), which were later incorporated into his Essays (1758).

Artists are increasingly interested in producing work that is not only beautifully designed and produced, but is also environmentally friendly and socially responsible. In Sustainable Ceramics, pioneer Robert Harrison draws on more than four decades of making, and a wealth of experience shared by other artists to present practical possibilities for ceramic artists. This book covers all the factors to consider when going 'green', from fuels and alternative firing technology to energy-saving methods, sustainable ways to collect and use clay itself, and ways to deal with or recycle waste materials and save water. He suggests simple and achievable methods by which to reduce the carbon footprint of ceramic art, and draws on interviews and examples throughout by practitioners who reclaim, reuse and recycle in their studio or work. Sustainable Ceramics is an essential resource for any ceramicist, studio or school looking for ideas on how to reduce the impact of their practice on the environment.

On the long roads of Deverry ride two mercenaries whose fates like hidden deep in that of their own land. But Lord Rhodry, exiled from the dragon court of Aberwyn, has yet to discover his true parentage, and his swordmaster-lover, Jill, has barely glimpsed her awesome powers. Meanwhile, the ancient sorcerer Nevyn, held back by his vows from boldly intervening in their lives, can only watch and wait as Rhodry and Jill move ever closer to danger. For as the two struggle to recover the Great Stone, the mystic jewel that guides the conscience of the kingship of Deverry, malevolent dark masters are weaving terrifying spells against them--and displacing messengers of death. Katharine Kerr has extensively rewritten Darkspell, incorporating major changes in the text, making this her definitive edition. Here the epic saga that began with the Daggertspell continues--a tale of might and magic, lust and glory, dark danger and poignant desires that echo from Deverry's sapphire waters to its secret mountain caverns. It's a spellbinding story destined to please fantasy lovers everywhere.

From the food photographers and creators of the popular blog The Way We Ate comes a lavishly illustrated journey through the rich culinary tradition of the last American century, with 100 recipes from the nation's top chefs and food personalities. Take a trip back in time through the rich culinary tradition of the last American century with more than 100 of the nation's top chefs and food personalities. The Way We Ate captures the twentieth century through the food we've shared and prepared. Noah Fecks and Paul Wagtouicz (creators of the hugely popular blog The Way We Ate) are your guides to a dazzling display of culinary impressionism: For each year from 1901 to 2000, they invite a well-known chef or food connoisseur to translate the essence or idea of a historical event into a beautifully realized dish or cocktail. The result is an eclectic array of modern takes and memorable classics, featuring original recipes conjured by culinary notables, including: Daniel Boulud, Jacques Pépin, Marc Forgione, José Andrés, Ruth Reichl, Marcus Samuelsson, Michael White, Andrew Carmellini, Anita Lo, Gael Greene, Michael Lomonaco, Melissa Clark, Justin Warner, Michael Laiskonis, Sara Jenkins, Shanna Pacifico, Jeremiah Tower, and Ashley Christensen An innovative work of history and a cookbook like no other, The Way We Ate is the story of a nation's cravings—and how they continue to influence the way we cook, eat, and talk about food today.

Nothing is more apt to surprise a foreigner, than the extreme liberty which we enjoy in this country of communicating whatever we please to the public and of openly censuring every measure of ministers. If the administration resolve upon war, it is affirmed, that, either wilfully or ignorantly, they mistake the interests of the nation; and that peace, in the present situation of affairs, is infinitely more the passion of the ministers lie towards peace, our political writers breathe nothing but war and devastation, and represent the specific conduct of the government as mean and pusillanimous. As this is not the case in any other government, either republican or monarchical; in Holland and Venice, more than in France or Spain; it may very naturally give occasion to the question, How it happens that Great Britain has this peculiar privilege?

As no party, in the present age, can well support itself without a philosophical or speculative system of principles annexed to its political or practical one, we accordingly find, that each of the factions which is divided has reared up a fabric of the former kind, in order to protect and cover that scheme of actions which it pursues. The people being commonly very rude builders, especially in this speculative age, especially still when actuated by party-zeal, it is natural to imagine that their workmanship must be a little unshapely, and discover evident marks of that violence and hurry in which it was raised up. Government, when set up government to the Deity, endeavoured to render it so sacred and inviolate, that it must be little less than sacrilege, however, tyrannical it may become, to touch or invade it in the smallest article. In founding government altogether on the consent of the people, suppose that there is a kind of original contract, by which the subjects have tacitly reserved the power of resisting their sovereign, if they are aggrieved by that authority, with which they have, for certain purposes, voluntarily intrusted him. These are the speculative principles of the two parties, and these, too, are the practical consequences.
