Rosie "Aunty" Lee, the feisty widow, amateur sleuth, and proprietor of Singapore's best-loved home cooking restaurant, is back in another delectable, witty mystery involving scandal and murder among the city's elite. Few know more about what goes on in Singapore than Aunty Lee. When a scandal over illegal organ donation involving prominent citizens makes news, she already has a list of suspects. There's no time to snoop, though—Aunty Lee's Delights is catering a brunch for local socialites Henry and Mabel Sung at their opulent house. Rumor has it that the Sung's fortune is in trouble, and Aunty Lee wonders if the gossip is true. But soon after arriving at the Sung's house, her curiosity turns to suspicion. Why is a storage house she discovers locked? What is the couple arguing about behind closed doors? Where is the guest of honor who never showed up? Then, Mabel Sung and her

son Leonard are found dead. The authorities blame it on Aunty Lee's special stewed chicken with buah keluak, a local black nut that can be poisonous if cooked improperly. Aunty Lee has never carelessly prepared a dish. She's certain the deaths are murder—and that they're somehow linked to the organ donor scandal. To save her business and her reputation, she's got to prove it—and unmask a dangerous killer whose next victim may just be Aunty Lee.

Each poet is introduced by the translator and represented by a selection that spans the poet's development and career. These constitute some of the greatest lyric poems ever written.

There have been significant developments in the field of numerical methods for diffraction problems in recent years, and as a result, it is now possible to perform computations with more than ten million unknowns. However, the importance of asymptotic methods should not be overlooked. Not only do they provide considerable physical insight into diffraction mechanisms, and can therefore aid the

design of electromagnetic devices such as radar targets and antennas, some objects are still too large in terms of wavelengths to fall in the realm of numerical methods. Furthermore, very low Radar Cross Section objects are often difficult to compute using multiple methods. Finally, objects that are very large in terms of wavelength, but with complicated details, are still a challenge both for asymptotic and numerical methods. The best, but now widely explored, solution for these problems is to combine various methods in so called hybrid methods. Asymptotic and Hybrid Methods in Electromagnetics is based on a short course, and presents recent developments in the field.

"Objection. My client had been invited. The only DNA leaving was Lilly's." Prosecutor: "Lilly did rob his DNA collection and hide it in her folds-in-space transporter." After reviewing all available evidence, the judge spoke. "Our nutrient organisms only detected Lilly's DNA. She has no prior convictions for smuggling. This case is dismissed." Futurism again invited Lilly. While they negotiated, she used his mysterious molten dust bubbles to revitalize her tri-dimension form. If Lilly was willing to do battle for one molecule of water for him, he would remove her from the cosmic hit list and help her stop time. *DNA Smugglers* is the first book in a trilogy. 1001 Quotations To Inspire You Before You Die is full of smart remarks - not just sassy one-liners (although there are plenty of those), but also more considered, philosophical epigrams that make us pause and reflect on a range of profound topics. Each quotation is accompanied by an insightful account of its meaning and the historical context in which it was first uttered or written. Some famous quotations are straightforward, but many need contextualising - it's often not exactly what was said, but who said it, and in what context, that is more important. Many oft-quoted remarks open up whole new worlds of thought and interpretation. What, for example, did Voltaire mean when he wrote 'If God did not exist, it would be necessary to invent him'? - was he hinting at his own atheism (unlikely, given the age in which he lived) or making a more subtle point about the difficulty of apprehending the Almighty? This book looks into these and a host of other such questions, and takes the reader from the

source material into illuminating discussions of its wider significance. We all love quotations - we use them to make our points, to plead our cases and to justify our opinions, as well as to honour, glorify, motivate, incite, besmirch, bewitch and beguile. 1001 Quotations To Inspire You Before You Die will help you do all that and more.

If You Could Talk To The Greatest Master of This Century - What Would You Ask? The sages of the centuries, each one tincturing their thought with their own soul essence, have united in telling us that, ""As a man thinketh in his heart, so is he."" It has been established by the experience of the ages that always the law is the same. But HOW shall one think in their heart, so that only goodness may blossom and ripen into rich deed and rare result? What is the apparently mysterious secret by which life's dull metal is transmuted into precious mintage? As Troward has said, ""Thought is the only action of the mind. By your habitual thoughts you create corresponding external physical conditions, because you thereby create the nucleus which attracts to itself its own correspondence, in due order, until the finished work is manifested on the material plane."" A GLOBE & MAIL BEST BOOK OF THE YEAR FOR

2012 "Glover is a master of narrative structure."

—Wall Street Journal In the tradition of E.M. Forster, John Gardner, and James Wood, Douglas Glover has produced a book on writing at once erudite, anecdotal, instructive, and amusing. *Attack of the Copula Spiders* represents the accumulated wisdom of a remarkable literary career: novelist, short story writer, essayist, teacher and mentor, Glover has for decades been asking the vital questions. How does the way we read influence the way we write? What do craft books fail to teach aspiring writers about theme, about plot and subplot, about constructing point of view? How can we maintain drama on the level of the sentence—and explain drama in the sentences of others? What is the relationship of form and art? How do you make words live? Whether his subject is Alice Munro, Cervantes, or the creative writing classroom, Glover's take is frank and fresh, demonstrating again and again that graceful writers must first be strong readers. This collection is a call-to-arms for all lovers of English, and *Attack of the*

Copula Spiders our best defense against the assaults of a post-literate age. Douglas Glover is the award-winning author of five story collections, four novels, and two works of non-fiction. He is currently on the faculty of the Vermont College of Fine Arts MFA in Writing program. Praise for Douglas Glover "So sharp, so evocative, that the reader sees well beyond the tissue of words into ... the author's poetic grace." - The New Yorker "Glover invents his own assembly of critical approaches and theories that is eclectic, personal, scholarly, and smart ... a direction for future literary criticism to take." - The Denver Quarterly "A ribald, raunchy wit with a talent for searing self-investigation." - The Globe and Mail "Knotty, intelligent, often raucously funny." - Maclean's "Passionately intricate." - The Chicago Tribune "Darkly humorous, simultaneously restless and relentless." - Kirkus Reviews

One hundred of the most evocative modern poems on joy, selected by an award-winning contemporary poet "Bursting with energy and surprising locutions.

. . . Even the most familiar poets seem somehow new within the context of Joy."--David Skeel, Wall Street Journal "Wiman takes readers through the ostensible ordinariness of life and reveals the extraordinary."--Adrianna Smith, The Atlantic

Christian Wiman, a poet known for his meditations on mortality, has long been fascinated by joy and by its relative absence in modern literature. Why is joy so resistant to language? How has it become so suspect in our times? Manipulated by advertisers, religious leaders, and politicians, joy can seem disquieting, even offensive. How does one speak of joy amid such ubiquitous injustice and suffering in the world? In this revelatory anthology, Wiman takes readers on a profound and surprising journey through some of the most underexplored terrain in contemporary life. Rather than define joy for readers, he wants them to experience it. Ranging from Emily Dickinson to Mahmoud Darwish and from Sylvia Plath to Wendell Berry, he brings together diverse and provocative works as a kind of counter to the old, modernist maxim "light writes white"--no agony, no art. His rich selections awaken us to the essential role joy plays in human life.

The first in-depth analysis of Maren Ade's acclaimed contemporary classic, a generational tug-of-war about the meaning of life, work, and death.
