

Bargaining For Advantage

We all negotiate on a daily basis. We negotiate with our spouses, children, parents, and friends. We negotiate when we rent an apartment, buy a car, purchase a house, and apply for a job. Your ability to negotiate might even be the most important factor in your career advancement. Negotiation is also the key to business success. No organization can survive without contracts that produce profits. At a strategic level, businesses are concerned with value creation and achieving competitive advantage. But the success of high-level business strategies depends on contracts made with suppliers, customers, and other stakeholders. Contracting capability—the ability to negotiate and perform successful contracts—is the most important function in any organization. This book is designed to help you achieve success in your personal negotiations and in your business transactions. The book is unique in two ways. First, the book not only covers negotiation concepts, but also provides practical actions you can take in future negotiations. This includes a Negotiation Planning Checklist and a completed example of the checklist for your use in

future negotiations. The book also includes (1) a tool you can use to assess your negotiation style; (2) examples of “decision trees,” which are useful in calculating your alternatives if your negotiation is unsuccessful; (3) a three-part strategy for increasing your power during negotiations; (4) a practical plan for analyzing your negotiations based on your reservation price, stretch goal, most-likely target, and zone of potential agreement; (5) clear guidelines on ethical standards that apply to negotiations; (6) factors to consider when deciding whether you should negotiate through an agent; (7) psychological tools you can use in negotiations—and traps to avoid when the other side uses them; (8) key elements of contract law that arise during negotiations; and (9) a checklist of factors to use when you evaluate your performance as a negotiator. Second, the book is unique in its holistic approach to the negotiation process. Other books often focus narrowly either on negotiation or on contract law. Furthermore, the books on negotiation tend to focus on what happens at the bargaining table without addressing the performance of an agreement. These books make the mistaken assumption that success is determined by evaluating the negotiation rather than evaluating

performance of the agreement. Similarly, the books on contract law tend to focus on the legal requirements for a contract to be valid, thus giving short shrift to the negotiation process that precedes the contract and to the performance that follows. In the real world, the contracting process is not divided into independent phases. What happens during a negotiation has a profound impact on the contract and on the performance that follows. The contract's legal content should reflect the realities of what happened at the bargaining table and the performance that is to follow. This book, in contrast to others, covers the entire negotiation process in chronological order beginning with your decision to negotiate and continuing through the evaluation of your performance as a negotiator. A business executive in one of the negotiation seminars the author teaches as a University of Michigan professor summarized negotiation as follows: "Life is negotiation!" No one ever stated it better. As a mother with young children and as a company leader, the executive realized that negotiations are pervasive in our personal and business lives. With its emphasis on practical action, and with its chronological, holistic approach, this book provides a roadmap you can use when navigating

through your life as a negotiator.

The groundbreaking classic that explores how women can and should negotiate for parity in their workplaces, homes, and beyond *When Linda Babcock* wanted to know why male graduate students were teaching their own courses while female students were always assigned as assistants, her dean said: "More men ask. The women just don't ask." Drawing on psychology, sociology, economics, and organizational behavior as well as dozens of interviews with men and women in different fields and at all stages in their careers, *Women Don't Ask* explores how our institutions, child-rearing practices, and implicit assumptions discourage women from asking for the opportunities and resources that they have earned and deserve—perpetuating inequalities that are fundamentally unfair and economically unsound. *Women Don't Ask* tells women how to ask, and why they should.

Combining insights in negotiation research with the tactics

Bargaining for Advantage is a practical guide to becoming a

more effective negotiator. Richard Shell explores the hidden

psychology and patterns that govern every bargaining situation. Driven by stories about everything from hostage taking and high stakes business deals to everyday encounters, this work offers a step-by-step approach that draws on your own communication style to make you a skilful negotiator. Thomas Carson offers the most comprehensive and up-to-date investigation of moral and conceptual questions about lying and deception. Part I addresses conceptual questions and offers definitions of lying, deception, and related concepts such as withholding information, "keeping someone in the dark," and "half truths." Part II deals with questions in ethical theory. Carson argues that standard debates about lying and deception between act-utilitarians and their critics are inconclusive because they rest on appeals to disputed moral intuitions. He defends a version of the golden rule and a theory of moral reasoning. His theory implies that there is a moral presumption against lying and deception that causes harm — a presumption at least as strong as that endorsed by act-utilitarianism. He uses this theory to justify his claims about the issues he

addresses in Part III: deception and withholding information in sales, deception in advertising, bluffing in negotiations, the duties of professionals to inform clients, lying and deception by leaders as a pretext for fighting wars, and lying and deception about history (with special attention to the Holocaust), and cases of distorting the historical record by telling half-truths. The book concludes with a qualified defence of the view that honesty is a virtue.

Powerful Tools to Change the Game in Your Most Important Deals

“Written in the same remarkable vein as Getting to Yes, this book is a masterpiece.” —Dr. Steven R. Covey, author of The 7 Habits of Highly Effective People • Winner of the Outstanding Book Award for Excellence in Conflict Resolution from the International Institute for Conflict Prevention and Resolution • In Getting to Yes, renowned educator and negotiator Roger Fisher presented a universally applicable method for effectively negotiating personal and professional disputes. Building on his work as director of the Harvard

*Negotiation Project, Fisher now teams with Harvard psychologist Daniel Shapiro, an expert on the emotional dimension of negotiation and author of *Negotiating the Nonnegotiable: How to Resolve Your Most Emotionally Charged Conflicts*. In *Beyond Reason*, Fisher and Shapiro show readers how to use emotions to turn a disagreement-big or small, professional or personal-into an opportunity for mutual gain. Presenting principles of negotiation from theoretical and practical perspectives, this book helps readers develop negotiating skills in both individual and collective situations. Each chapter introduces and discusses an essential negotiating concept and then connects that concept to a related skill. Exercises are integrated throughout each chapter to provide readers with the opportunity to practice these skills. Using this unique theory-into-practice organization principle, the book demonstrates how negotiation works, outlines options and procedures for negotiation preparation, and identifies common negotiating problems.*

Negotiation Excellence: Successful Deal Making is written by leading negotiation experts from top-rated universities in the US and in Asia and its objective is to introduce readers to the theory and best

practices of effective negotiation. The book includes chapters ranging from: preparing and planning for successful negotiations; building relationships and establishing trust between negotiators; negotiating creatively to create mutual value and win-win situations; understanding and dealing with negotiators from different cultures; to managing ethical dilemmas. In addition to emphasizing the link between theory and practice, the book includes deal examples such as: Renault-Nissan alliance; mega-merger between Arcelor and Mittal Steel; Kraft Foods' acquisition of Cadbury PLC, Walt Disney Company's negotiation with the Hong Kong government; and Komatsu, a Japanese firm's negotiation with Dresser, an American firm. Following the success of the first edition, the second edition re-emphasizes the spirit of linking theory to practice with two new chapters on emotions in negotiation and the Indian negotiation style. Negotiations are challenging and sometimes scary. You prepare and know what you want, but then things go terribly wrong. Your emotions get in the way. Sometimes you don't even try, or lose your way and fail to achieve your objectives. This book helps you get out of your own way, manage your emotions, and negotiate effectively.

The Conscience Code is a practical guide to creating workplaces where everyone can thrive. Surveys show that more than 40% of employees report seeing ethical misconduct at work, and most fail to report it--killing office morale and allowing the wrong people to set the example. Collegiate professor G. Richard Shell has heard work misconduct stories from his MBA students which inspired him to create this helpful guide for navigating these nuances. Shell created?this book?to point to a better path: recognize that these conflicts are coming, learn to spot them, then

follow a research-based, step-by-step approach for resolving them skillfully.?By committing to the Code, you can replace regret with long-term career success as a leader of conscience. In The Conscience Code, Shell shares tips and facts that: Solves a crucial problem faced by professionals everywhere: What should they do when they are asked to compromise their core values to achieve organizational goals? Teaches readers to recognize and overcome the five organizational forces that push people toward actions they later regret. Lays out a systematic, values-to-action process that people at all levels can follow to maintain their integrity while achieving true success in their lives and careers. Driven by dramatic, real-world examples from Shell's classroom, today's headlines, and classic cases of corporate wrongdoing, The Conscience Code shows how to create value-based workplaces where everyone can thrive.

This fine blend of Harvard scholarship and seasoned judgment is really two books in one. The first develops a sophisticated approach to negotiation for executives, attorneys, diplomats -- indeed, for anyone who bargains or studies its challenges. The second offers a new and compelling vision of the successful manager: as a strong, often subtle negotiator, constantly shaping agreements and informal understandings throughout the complex web of relationships in an organization. Effective managers must be able to reach good formal accords such as contracts, out-of-court settlements, and joint venture agreements. Yet they also have to negotiate with others on whom they depend for results, resources, and authority. Whether getting fuller support from the marketing department, hammering out next year's budget, or winning the approval for a new line of business, managers must be adept at advantageously working out and modifying understandings, resolving disputes, and finding mutual gains where interests and perceptions conflict. In such situations, The Manager as Negotiator shows how to creatively further the totality

of one's interests, including important relationships -- in a way that Richard Walton, Harvard Business School Professor of Organizational Behavior, describes as "sensitive to the nuances of negotiating in organizations" and "relentless and skillful in making systematic sense of the process." This book differs fundamentally from the recent spate of negotiation handbooks that tend to espouse one of two approaches: the competitive ("Get yours and most of theirs, too") or the cooperative ("Everyone can always win"). Transcending such cynical and naive views, the authors develop a comprehensive approach, based on strategies and tactics for productively managing the tension between the cooperation and competition that are both inherent in bargaining. Based on the authors' extensive experience with hundreds of cases, and peppered with a number of wide-ranging examples, *The Manager as Negotiator* will be invaluable to novice and experienced negotiators, public and private managers, academics, and anyone who needs to know the state of the art in this important field.

Wharton professor Richard Shell created the Success Course to help his world-class MBA students answer two questions that aren't as obvious as they seem: "What, for me, is success?" and "How will I achieve it?" Based on that acclaimed course, *Springboard* shows how to assess the hidden influences of family, media, and culture on your beliefs about success. Then it helps you figure out your unique passions and capabilities, so you can focus more on what gives meaning and excitement to your life, and less on what you are "supposed" to want.

How Women Can Master the Hidden Agendas That Determine Bargaining Success

The Art of Woo

A look at how relationships can drive successful negotiation, from an award-winning faculty member at the Wharton School of Business. Contrary to conventional wisdom about what makes a good negotiator - namely, being aggressive and unemotional - in Bring Yourself, Taheripour offers a radically different perspective. In her own life, and in her more than 15 years of experience teaching negotiation, she's found that the best negotiators are empathetic, curious, and present. The essence of bargaining isn't the transaction, but the conversation and human connection. It is when we bring our whole, authentic selves to the table that we can advocate for ourselves fearlessly and find creative solutions that benefit everyone. Taheripour has seen the power of this mindset shift firsthand. In her consulting, her classes at Wharton, and in her work teaching negotiation for the Goldman Sachs 10,000 Small Businesses program, her students and clients experience personal breakthroughs as they face the fears and false narratives that held them back. Bring Yourself explains how our pressure points,

personal experience, and even our cultural expectations can become roadblocks to finding common ground, and it offers essential strategies to move beyond them and open our minds. Taheripour argues that regardless of our own perceived ability to negotiate, we must have the courage to engage because bargaining plays a crucial role in every aspect of our lives. We negotiate boundaries with our parents and partners, bedtimes with our kids, and even with ourselves every time we make a pros and cons list to weigh a major decision. Negotiation is how we problem solve and how we find our voice. With eye-opening and empowering stories throughout, Bring Yourself helps readers gain the confidence they need to achieve their goals in work and in life. Timely and provocative, this paradigm-shifting book can transform our world and the way we work together.

International environmental agreements have increased exponentially within the last five decades. However, decisions on policies to address key issues such as biodiversity loss, climate change, ozone depletion, hazardous waste transport and numerous other planetary challenges require individual countries to adhere to international norms. What have been the successes and failures in the environmental treaty-

making arena? How has the role of civil society and scientific consensus contributed to this maturing process? Why have some treaties been more enforceable than others and which theories of international relations can further inform efforts in this regard? Addressing these questions with renewed emphasis on close case analysis makes this volume a timely and thorough postscript to the Rio-Plus 20 summit's celebrated invocation document, The Future We Want, towards sustainable development. Environmental Diplomacy: Negotiating More Effective Global Agreements provides an accessible narrative on understanding the geopolitics of negotiating international environmental agreements and clear guidance on improving the current system. In this book, authors Lawrence Susskind and Saleem Ali expertly observe international environmental negotiations to effectively inform the reader on the geopolitics of protecting our planet. This second edition offers an additional perspective from the Global South as well as providing a broader analysis of the role of science in environmental treaty-making. It provides a unique contribution as a panoramic analysis of the process of environmental treaty-making.

"A must-read for lawyers, business people, and other professionals wanting helpful negotiation advice." -Robert Mnookin, author of Bargaining with the Devil: When to Negotiate, When to Fight "As social creatures, we are always trying to influence each other. Russell Korobkin's book lays out five techniques that anyone can use to ensure you get what you want and leave enough on the table so others win, too. The book moves quickly, is full of examples, and provides step-by-step actionable instructions to help you negotiate anything. Everyone needs this book." -Paul J. Zak, author of Trust Factor: The Science of Creating High-Performance Companies From leading negotiation expert Russell Korobkin comes this revelatory guide that distills the keys to bargaining into five simple-yet-sophisticated tools that anyone can master. The Five Tool Negotiator stands apart in a category saturated with breezy, self-help volumes as a compulsively readable and highly researched must-have for anyone looking to improve their bargaining skills. Nationally renowned UCLA law professor Russell Korobkin distills insights drawn from his decades of studying and teaching the keys to successful negotiations into five simple-yet-sophisticated strategies: Bargaining Zone Analysis * Persuasion * Deal

Design * Power * and Fairness Norms. Incorporating lively anecdotes and fascinating social science experiments, Korobkin brings to life concepts from the disparate fields of psychology, economics, and game theory. Designed for use at both the flea market and in the C-suite, this game-changing, universal approach provides a formula that a savvy reader can implement immediately:

- **Tool #1, Bargaining Zone Analysis**, enables you to identify the range of agreements that will benefit both parties.
- **Tool #2, Persuasion**, convinces your counterpart that reaching an agreement will benefit them more than they otherwise would have recognized, making them willing to give you more.
- **Tool #3, Deal Design**, structures the agreement in ways that increase its value to both parties.
- **Tool #4, Power**, forces your counterpart to agree to terms relatively more desirable to you.
- **Tool #5, Fairness Norms**, enables you to seal a bargain that both parties can feel good about.

From negotiating the price of a used car to closing a multimillion-dollar merger, Korobkin meticulously explains how to answer the following questions that arise in every negotiation: Should you make the first offer or let the other side go first? What makes some proposals seem more fair than others? How do you decide

whether to accept an offer, reject it, or make a counteroffer? When should you propose an unusual agreement structure? What steps can you take to make a bluff believable? Readers will come away with a roadmap to becoming a truly complete negotiator, able to understand bargaining as both a strategic and social activity. Intuitively accessible and reassuringly persuasive, The Five Tool Negotiator promises to be a classic in the art of bargaining strategy.

For years, academic thinking on negotiations and auctions has matured in different silos. Negotiation theory focused on deals between two parties, investigating psychological motivations and incentives, with ideas like 'best alternative to a negotiated agreement.' Auction theory, on the other hand, focused exclusively on situations where multiple bidders were involved and the highest bidder won. Harvard Business School professor Guhan Subramanian specializes in understanding how deals are made. As he has studied deals in the news, observed deals as a participant and invited legendary dealmakers in his classroom, one commonality kept cropping up. Assets most often change hand not in a pure negotiation or a pure auction, but by a mechanism that freely combines elements from both schools of thought. Negotiators are 'fighting on two fronts' across the table, but also on the same side of the table with known, unknown, or possible competitors. In Negotiauctions, Subramanian provides a lively tour of both negotiation and auction theory, following those summaries with an in-depth look at his hybrid theory that includes strategies that readers can use in real life situations. Along the

When discussing being stuck in a "win-win vs. win-lose" debate, most negotiation books focus on face-to-face tactics. Yet, table tactics are only the "first dimension" of David A. Lax and James K. "second dimension"—deal design—systematically unlock economic and noneconomic value by creatively structuring agreements. But what sets the 3-D approach apart is its "third dimension": setup. Before showing up at a bargaining session, 3-D Negotiators ensure that the right parties have been approached, in the right sequence, to address the right interests, under the right expectations, and facing the right consequences of walking away if there is no deal. This new arsenal of moves away from the table often has the greatest impact on the negotiated outcome. Packed with practical steps and cases, 3-D Negotiation demonstrates how superior setup moves plus insightful deal designs can enable you to reach remarkable agreements at the table, unattainable by standard tactics.

Some negotiations are easy. Others are more difficult. And then there are situations that seem completely hopeless. Conflict is escalating, people are getting aggressive, and no one is willing to back down. And to top it off, you have little power or other resources to work with. Harvard professor and negotiation adviser Deepak Malhotra shows how to defuse even the most potentially explosive situations and to find success when things seem impossible. Malhotra identifies three broad approaches for breaking deadlocks and resolving conflicts, and draws out scores of actionable lessons using behind-the-scenes stories of fascinating real-life negotiations, including drafting of the US Constitution, resolving the Cuban Missile Crisis, ending bitter disputes in the NFL and NHL, and beating the odds in complex business situations. But he also shows how these same principles and

tactics can be applied in everyday life, whether you are making corporate deals, negotiating job offers, resolving business disputes, tackling obstacles in personal relationships, or even negotiating with children. As Malhotra reminds us, regardless of the context or which issues are on the table, negotiation is always, fundamentally, about human interaction. No matter how high the stakes or how protracted the dispute, the object of negotiation is to engage with other human beings in a way that leads to better understandings and agreements. The principles and strategies in this book will help you do this more effectively in every situation. "This book is magic for any deal maker." —Daniel H. Pink, New York Times–bestselling author

a promotion, a contract with a new client, a bigger role in decision-making -- a parallel negotiation unfolds beneath the surface of the "formal" discussion. Bargainers constantly maneuver to determine whose interests and needs will hold sway, whose opinions will matter, and how cooperative each person will be in reaching an agreement. How the issues are resolved hangs on the actions people take in the shadow negotiation, yet it is in this shadow negotiation that women most often run into trouble. The most productive negotiations take place when strong advocates can connect with each other. Good results depend equally on a bargainer's positioning her ideas for a fair hearing and on being open to the other side's point of view. But traditionally women have not fared well on either front. Often, they let negotiable moments slip by and take the first "no" as a final answer, or their efforts to be responsive to the other side's position are interpreted as accommodation. As a result, women can come away from negotiations with fewer dollars, perks, plum assignments, or

less say in decision-making than men. To negotiate effectively, women must pay attention to acts of self-sabotage as well as to the moves others make in the shadow negotiation. By bargaining more strategically, women can establish the terms of their advocacy, their voice, and at the same time encourage the open communication essential to a collaborative discussion in which not only acceptable, but creative, agreements can be worked out. Written by Deborah M. Kolb and Judith Williams, two authorities in the field, *The Shadow Negotiation* shows women a whole new way to think about the negotiation process. Kolb and Williams identify the common stumbling blocks that women encounter and present a game plan for turning their particular strengths to their advantage. Based on extensive interviews with hundreds of business-women, *The Shadow Negotiation* provides women with a clear, insightful guide to the hidden machinations that are at work in every bargaining situation.

President Donald J. Trump lays out his professional and personal worldview in this classic work—a firsthand account of the rise of America’s foremost deal-maker. “I like thinking big. I always have. To me it’s very simple: If you’re going to be thinking anyway, you might as well think big.”—Donald J. Trump Here is Trump in action—how he runs his organization and how he runs his life—as he meets the people he needs to meet, chats with family and friends, clashes with enemies, and challenges conventional thinking. But even a maverick plays by rules, and Trump has formulated time-tested guidelines for success. He isolates the common elements in his greatest accomplishments; he shatters myths; he names names, spells out the zeros, and fully reveals the deal-maker’s art. And throughout, Trump talks—really talks—about how he does it. Trump: The Art of the Deal is an unguarded look at the mind of a brilliant entrepreneur—the ultimate read for anyone interested in the man behind the

A member of the world renowned Program on Negotiation at Harvard Law School introduces the powerful next-generation approach to negotiation. A member of the world-renowned Program on Negotiation at Harvard Law School introduces the powerful next-generation approach to negotiation. For many years, two approaches to negotiation have prevailed: the “win-win” method exemplified in *Getting to Yes* by Roger Fisher, William Ury, and Bruce Patton; and the hard-bargaining style of Herb Cohen’s *You Can Negotiate Anything*. Now award-winning Harvard Business School professor Michael Wheeler provides a dynamic alternative to one-size-fits-all strategies that don’t match real world realities. *The Art of Negotiation* shows how master negotiators thrive in the face of chaos and uncertainty. They don’t trap themselves with rigid plans. Instead they understand negotiation as a process of exploration that demands ongoing learning, adapting, and influencing. Their agility enables them to reach agreement when others would be stalemated. Michael Wheeler illuminates the improvisational nature of negotiation, drawing on his own research and his work with Program on Negotiation colleagues. He explains how the best practices of diplomats such as George J. Mitchell, dealmaker Bruce Wasserstein, and Hollywood producer Jerry Weintraub apply to everyday transactions like selling a house, buying a car, or landing a new contract. Wheeler also draws lessons on agility and creativity from

fields like jazz, sports, theater, and even military science.

Whether you are selling a house, closing a business deal, settling a divorce, arbitrating a labor dispute, or trying to hammer out an international treaty, Howard Raiffa's new book will measurably improve your negotiating skills. Although it is a sophisticated self-help book—directed to the lawyer, labor arbitrator, business executive, college dean, diplomat—it is not cynical or Machiavellian: Raiffa emphasizes problems and situations where, with the kinds of skills he aims to develop, disputants can achieve results that are beneficial to all parties concerned. Indeed, he argues that the popular “zero-sum” way of thinking, according to which one side must lose if the other wins, often makes both sides worse off than they would be when bargaining for joint mutual gains. Using a vast array of specific cases and clear, helpful diagrams, Raiffa not only elucidates the step-by-step processes of negotiation but also translates this deeper understanding into practical guidelines for negotiators and “intervenors.” He examines the mechanics of negotiation in imaginative fashion, drawing on his extensive background in game theory and decision analysis, on his quarter-century of teaching nonspecialists in schools of business and public policy, on his personal experiences as director of an international institute dealing with East/West problems, and on the results of simulated negotiation exercises with hundreds of participants. There are popular books on the art of winning and scholarly books on the science of negotiation, but this is the first book to bridge the two currents. Shrewd, accessible, and engagingly written, it shows how a little analysis sprinkled with a

This book introduces a dynamic, new framework for using law, litigation, regulation and lobbying as part of competitive business strategy. Every business strategist, entrepreneur, and corporate lawyer needs to understand a basic truth of the modern market -- you must make the legal rules that govern your products and services or one of your competitors will. And it is much easier to stay in business if you are the one writing the rules. Written in a lively style with a host of stories and examples drawn from business history as well as contemporary events, professor G. Richard Shell of the world-famous Wharton School of Business shows how business leaders from Henry Ford and Bill Gates and corporate rivals from Coke to Pepsi have fought and won the battle for legal supremacy.
