The doctrine of "Islamic economics" entered debates over the social role of Islam in the mid-twentieth century. Since then it has pursued the goal of restructuring economies according to perceived Islamic teachings. Beyond its most visible practical achievement--the establishment of Islamic banks meant to avoid interest--it has promoted Islamic norms of economic behavior and founded redistribution systems modeled after early Islamic fiscal practices. In this bold and timely critique, Timur Kuran argues that the doctrine of Islamic economics is simplistic, incoherent, and largely irrelevant to present economic challenges. Observing that few Muslims take it

seriously, he also finds that its practical applications have had no discernible effects on efficiency, growth, or poverty reduction. Why, then, has Islamic economics enjoyed any appeal at all? Kuran's answer is that the real purpose of Islamic economics has not been economic improvement but cultivation of a distinct Islamic identity to resist cultural globalization. The Islamic subeconomies that have sprung up across the Islamic world are commonly viewed as manifestations of Islamic economics. In reality, Kuran demonstrates, they emerged to meet the economic aspirations of socially marginalized groups. The Islamic enterprises that form these subeconomies provide advancement opportunities to the disadvantaged. By enhancing interpersonal trust, they also facilitate intragroup transactions. These findings raise the question of whether there exist links between Islam and economic performance.

Exploring these links in relation to the long-unsettled question of why the Islamic world became underdeveloped, Kuran identifies several pertinent social mechanisms, some beneficial to economic development, others harmful.

It is 1981. Delhi summer. A small office. Three “hungry” minds brainstorming launch strategy of a product. They have been doing this for the past 3 months, 12 hours a day. The office is HCL and the product is Systems-2 computers. What they are about to launch will kick start the Indian computer story, and which will be known as the “inflection point” of the Indian IT Industry. This book is the tale of that “inflection point,” and told through the life of that third “hungry” mind who together with Arjun Malhotra and Shiv Nadar was one of the stimulators of computer revolution in the country, a visionary who remained in the background and silently scripted the Indian IT story into a global epic—Amit Dutta Gupta.

Enlightenment in the Colony opens up the history of the "Jewish question" for the first time to a broader discussion--one of the social exclusion of religious and cultural minorities in modern times, and in particular the crisis of Muslim identity in modern India. Aamir Mufti identifies the Hindu-Muslim conflict in India as a colonial variation of what he calls "the exemplary crisis of minority"--Jewishness in Europe. He shows how the emergence of this conflict in the late nineteenth century represented an early instance of the reinscription of the "Jewish question" in a non-Western society undergoing modernization under colonial rule. In so doing, he charts one particular route by which this European phenomenon linked to nation-states takes on a global significance. Mufti examines the literary dimensions of this crisis of identity through close readings of

canonical texts of modern Western--mostly British-literature, as well as major works of modern Indian literature in Urdu and English. He argues that the one characteristic shared by all emerging national cultures since the nineteenth century is the minoritization of some social and cultural fragment of the population, and that national belonging and minority separatism go hand in hand with modernization. Enlightenment in the Colony calls for the adoption of secular, minority, and exilic perspectives in criticism and intellectual life as a means to critique the very forms of marginalization that give rise to the uniquely powerful minority voice in world literatures. Less than two decades later, after building a solid life for themselves, his family were targeted by communal violence during Bangladesh's turbulent birth, in which most of Azmat's family members were killed. On the road once again, it wasn't until 2002, nearly fifty years after his first migration, that Azmat finally completed his epic search for a home, settling in Canada with his wife and three daughters. The ten essays which make up the body of this book are drawn from a wide variety of disciplines and weave a complex pattern of the experiences of women in India over the last one hundred years. The book departs from traditional historiography which has given inadequate attention to women, and in this sense From the Seams of History attempts to 'rewrite' history. Beginning with the debate on widow remarriage in Bengal and Haryana, the book moves on to examine how the new fashions in clothing of the Bengali 'gentlewomen' in the nineteenth century were tailored according to the values and anxieties of their dominant male counterparts. The argument of male domination is taken further in an essay demonstrating that male oppression of women in Indian society was in fact

Freshly arrived in 1930s Bombay, Manto saw the city like no one else, an ethnic melting pot that became ever more varied as migrant workers flooded in. It was to be Manto's favourite city. His edgy, moving stories, often peopled with prostitutes and criminals, remain startling and provocative even a hundred years after his birth - in searching out those forgotten by humanity, Manto wrote about what it means to be human. At his centenary, *Bombay Stories* brings together Manto's work from his years in that city for the first time. Matt Reeck and Aftab Ahmad's
