• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation

against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." -Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom." —David Roberts. Vox "This is the ideal environmental sciences textbook-only it is too interesting and inspiring to be called a textbook." -Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use

practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being-giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Long Walk to FreedomThe Autobiography of Nelson MandelaLittle, Brown

Due to a constantly high population growth of India's sixth largest metropolis Hyderabad, a strongly growing middle-class and the subsequent rise of tra c and motorised vehicles in particular, sustainable solutions are needed to secure daily routines. For up to 50 % of the - predominantly poor - population, walking is crucial for everyday life. There is a tendency towards suburbanisation, still, for many people living in the city's central areas even low fares for busses or rickshaws are often not a ordable. Additionally, the high level of air pollution poses a risk for people's health. This paper presents the action research conducted in 2009 (Citizens'

Exhibition, expert workshop and online-dialogue). It analyses the degree of participation at di erent levels and evaluates the participative tools and methods used. It explains the most important problems in the eld of tra c and transport from the citizens' point of view on the local level and gives an outlook on the problems and tasks at the city level. The analysis shows that the situation of pedestrians can be seen as one of the most important problems in the eld of tra c and transport: a high rate of fatal accidents in which pedestrians lose their lives. Also missing or unattractive footpaths lead to a high probability of switching over to motorised transport modes by those pedestrians who can a ord it and to the marginalisation of those who cannot a ord it. At the same time the topic bears good opportunities to come up with low-tech, cost e ective and at the same time highly e cient solutions in terms of CO2 reduction. Although or for the reason that the topic is not on the top list of the political agenda, there is a civil movement to push it forward and forcefully improve mobility and quality of life.

This book provides the first up-to-date introduction to the shape and style of Australian television in the 1980s, 1990s and beyond. Traditional formats like news, current affairs and sport as well as newer genres like tabloid and reality TV are treated in detail. The authors use their expertise in cultural and media studies to take apart the medium in terms of text, genre, audience, nation, culture, policy, industry and postmodernity. Trends and

developments that are taking Australian television into the future, such as the increasingly international orientation of the local industry and new services like pay TV, community TV and ABC satellite TV are also examined in depth.

horrors of war and an eloquent testament to the human spirit. Updated for the 75th Anniversary of the Diary's first publication with a new introduction by Nobel Prize-winner Nadia Murad "The single most compelling personal account of the Holocaust ... remains astonishing and excruciating."—The New York Times Book Review In 1942, with Nazis occupying Holland, a thirteenyear-old Jewish girl and her family fled their home in Amsterdam and went into hiding. For the next two years, until their whereabouts were betrayed to the Gestapo, they and another family lived cloistered in the "Secret Annex" of an old office building. Cut off from the outside world, they faced hunger, boredom, the constant cruelties of living in confined quarters, and the everpresent threat of discovery and death. In her diary Anne Frank recorded vivid impressions of her experiences during this period. By turns thoughtful, moving, and amusing, her account of fers a fascinating commentary on human courage and frailty and a compelling self-portrait of a sensitive and spirited young woman whose promise was tragically cut short.

This new Cambridge History is the first major history of twentieth-century English literature to cover the full range of writing in England, Scotland, Wales and Ireland. The volume also explores the impact of writing from the former colonies on English literature of the period and analyses the ways in which conventional literary genres were shaped and inflected by the new cultural technologies of radio, cinema and television. In providing an authoritative narrative of literary and cultural production across the century, this History acknowledges the claims for innovation and modernisation that characterise the beginning of the period. At the same time, it attends analytically to the more profound patterns of continuity and development which avantgarde tendencies characteristically underplay.

The Bloomsbury Handbook of Popular Music and Social Class is the first extensive analysis of the most important themes and concepts in this field. Encompassing contemporary research in ethnomusicology, sociology, cultural studies, history, and race studies, the volume explores the intersections between music and class, and how the meanings of class are asserted and denied, confused and clarified, through music. With chapters on key genres, traditions, and subcultures, as well as fresh and engaging directions for future scholarship, the volume considers how music has thought about and articulated social class. It consists entirely of original contributions written by internationally renowned scholars, and provides an essential reference point for scholars interested in the relationship between popular music and social class. The story tells of the efforts of a nervous and excitable man who starts to propose to an attractive young woman, but who gets into a tremendous quarrel over a boundary line.

Globalization and global equity are built on the premise of peace. The causes of many divisions and tensions in human communities lie in the imagined or real gain of financial or material assets of some elements of the community to be at the expense of others. The global community however lacks clear definitions and methods of stability, whether political, economic, or social. Digital Bridges: Developing Countriesin the Knowledge Economy provides insight into the methods and theories behind the globalization of information technologies.

This book provides a unique and timely window into the views and opinions of a wide segment of the Turkish society on the subject of contemporary Turkish-U.S. relations. Based

on interview data collected and analyzed largely by Turkish academicians, this study focuses on the opinions and attitudes of Turkish citizens across nine different sectors of Turkish society. Ranging from military officers to university students to the labor and media sectors, the depth and breadth of this multi-sectoral survey, looked at carefully by a group of scholars from broad academic backgrounds and public service expertise, serves as an important contribution to the literature. This innovative book looks at the topic of migration through the prism of law and literature. The author uses a rich mix of novels, short stories, literary realism, human rights and comparative literature to explore the experiences of African migrants and asylum seekers. The book is divided into two. Part one is conceptual and focuses on art activism and the myriad ways in which people have sought to 'write justice.'

Using Mazrui's diasporas of slavery and colonialism, it then considers histories of migration across the centuries before honing in on the recent anti-migration policies of western states. Achiume is used to show how these histories of imposition and exploitation create a bond which bestows on Africans a "status as co-sovereigns of the First World through citizenship." The many fictional examples of the schemes used to gain entry are set against the formal legal processes. Attention is paid to life post-arrival which for asylum seekers may include periods in detention. The impact of the increased hostility of receiving states is examined in light of their human rights obligations. Consideration is paid to how Africans navigate their post-migration lives which includes reconciling themselves to status fracture-taking on jobs for which they are over-qualified, while simultaneously dealing with the resentment borne of status threat on the part of the citizenry. Part two moves from the general to consider the intersections of gender and status focusing on women, LGBTI individuals and children. Focusing on their human rights and the fictional literature, chapter four looks at women who have been trafficked as well as domestic workers and hotel maids while chapter five is on LGBTI people whose legal and literary stories are only now being told. The final substantive chapter considers the experiences of children who may arrive as unaccompanied minors. Using a mixture of poetry and first person accounts, the chapter examines the post-arrival lives of children, some of whom may be citizens but who are continually made to feel like outsiders. The conclusion follows, starting with two stories about walls by Hadero and Lanchester which are used to illustrate the themes discussed in the book. Few African lawyers write about literature and few books and articles in Western law and literature look at books by or about Africans, so a book that engages with both is long overdue. This book provides fascinating reading for academics, students of law, literature, $\frac{1}{Page} \frac{17/19}{17/19}$

This book illustrates the degree of variability in voting behaviour within social groups and suggests reasons for that variability. It reviews and critiques conventional analyses and presents statistical analyses of the geography of voting in England. The book reveals that substantial geographical variations exist in the widely-held generalisations, such as that white-collar owner-occupiers favour the Conservatives or that blue-collar council tenants prefer Labour.
