Since its publication in the late 1950s, Mountains Painted with Turmeric has struck a chord in the hearts of hundreds of thousands of Nepali readers. Set in the hills of far eastern Nepal, the novel offers readers a window into the lives of the people by depicting in subtle detail the stark realities of village life. Carefully translated from the original text, Mountains Painted with Turmeric tells the story of a peasant farmer named Dhané (which means, ironically, "wealthy one") who is struggling to provide for his wife and son and arrange the marriage of his beautiful younger sister. Unable to keep up with the financial demands of the "big men" who control his village, Dhané and his family suffer one calamity after another, and a series of quarrels with fellow villagers forces them into exile. In haunting prose, Lil Bahadur Chettri portrays the dukha, or suffering and sorrow, endured by ordinary peasants; the exploitation of the poor by the rich and powerful; and the social conservatism that twists a community into punishing a woman for being the victim of a crime. Chettri describes the impoverishment, dispossession, and banishment of Dhané's family to expose profound divisions between those who prosper and those who are slowly stripped of their meager possessions. Yet he also conveys the warmth and intimacy of village society, from which Dhané and his family are ultimately excluded.

**Third Completely Revised and Updated Edition**Mass Communication in India is a result of the author s in-depth study and understanding of the media. The book deals with a general introduction to Communication Theory, Advertising, Television, Effects of Media and Development. In short, the book is designed to give the student of Mass Communication a general and comprehensive view of the modern and traditional media in India. It meets the objective of being a text book as well as a book that gives an overview of mass communication in India.

Remember to email us at GoudaBCA for free videos and more. Gouda BCA: Ten Years of BCA Test Prep & Thousands of Students Helped!

This book is about algebra. This is a very old science and its gems have lost their charm for us through everyday use. We have tried in this book to refresh them for you. The main part of the book is made up of problems. The best way to deal with them is: Solve the problem by yourself - compare your solution with the solution in the book (if it exists) - go to the next problem. However, if you have difficulties solving a problem (and some of them are quite difficult), you may read the hint or try to read the solution. If there is no solution in the book for some problem, you may skip it (it is not heavily used in the sequel) and return to it later. The book is divided into sections devoted to different topics. Some of them are very short, others are rather long. Of course, you know arithmetic pretty well. However, we shall go through it once more, starting with easy things. 2 Exchange of terms in addition Let's add 3 and 5: 3+5=8. And now change the order: 5+3=8. We get the same result. Adding three apples to five apples is the same as adding five apples to three - apples do not disappear and we get eight of them in both cases. 3 Exchange of terms in multiplication Multiplication has a similar property. But let us first agree on notation.

**FROM THE PUBLISHER:** Oswaal Handbooks for Physics, Chemistry, Biology & Mathematics which will supplement the need for concept clarity at every step of study. The Handbooks will act as Exam Reckoners for preparation of various Engineering & Medical competitive exams. These books are compact reference books and are the best for chapter-wise & topic wise preparation.
