Melinda Barta. In the "Peyote Basics" chapter, you will learn the basics of creating flat peyote bands, then advance to circular and tubular variations, eventually learning to fashion dimensional jewelry pieces. Once you've mastered the basics, Melinda dives into designing dimensional jewelry pieces. Additional chapters cover combining peyote with other popular beadweaving techniques (right-angle weave, herringbone, and bead embroidery) and creating unique edgings and embellishments for finished pieces. Melinda, together with Beadwork's Designers of the Year, including Jean Campbell, Lisa Kan, Carole Ohl, Melanie Potter, Jean Power, Cynthia Rutledge, and Sherry Serafini, demonstrates a range of styles in 15 beautiful jewelry projects.

Electrical Engineering 101 covers the basic theory and practice of electronics, starting by answering the question "What is electricity?" It goes on to explain the fundamental principles and components, relating them constantly to real-world examples. Sections on tools and troubleshooting give engineers deeper understanding and the know-how to create and maintain their own electronic design projects. Unlike other books that simply describe electronics and provide step-by-step build instructions, EE101 delves into how and why electricity and electronics work, giving the reader the tools to take their electronics education to the next level. It is written in a down-to-earth style and explains jargon, technical terms and schematics as they arise. The author builds a genuine understanding of the fundamentals and shows how they can be applied to a range of engineering problems. This third edition includes more real-world examples and a glossary of

It contains new coverage of: Microcontrollers FPGAs Classes of components Memory (RAM, ROM, etc.) Surface mount High speed design Board layout Advanced digital electronics (e.g. processors) Transistor circuits and circuit design Op-amp and logic circuits Use of test equipment Gives readers a simple explanation of complex concepts, in terms they can understand and relate to everyday life.
