This book addresses sixteen different reform proposals that are urgently needed to correct the fault lines in the international tax system as it exists today, and which deprive both developing and developed countries of critical tax resources. It offers clear and concrete ideas on how the reforms can be achieved and why they are important for a more just and equitable global system to prevail. The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency. Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues, and are an impediment to sustainable development. A major break-through for financial transparency is now within reach. The policy reforms outlined in this book not only advance tax justice but also protect human rights by curtailing illegal activity and making available more resources for development. While the reforms are realistic they require both political and an informed and engaged civil society that can put pressure on governments and policy makers to act.

This book forms a serious, in-depth study of the subject and proposes that e-learning is not simply a matter of 'digitizing' traditional materials, but involves a new approach, which must take into account pedagogical, technological and organizational features to form a well-designed education system.

This 2009 edition presents a wide range of educational indicators to assess progress towards Education for All Millennium Development Goals. These cross-nationally comparable indicators also provide benchmarks for the performance of national education systems. The

special of this 2009 global education digest is the analysis of emerging global trends in tertiary education, highlighting the rapid growth of tertiary education systems since 1970, changing patterns in tertiary education graduates by field of study, and in particular, the changing landscape of international student mobility.

Raise the academic bar for your students and watch their confidence and success skills increase. STUDENT SUCCESS IN COLLEGE: DOING WHAT WORKS!, SECOND EDITION provides an accessible and relevant way for students to move beyond opinions and advice about how to succeed in college by offering an integrated approach of research-backed student success practices paired with student success research studies. Students learn how to put skills for success into practice as they strive to accomplish their academic goals. With an overall theme of reading, critical thinking, and information literacy skills, the text helps students feel comfortable with the structure of research study articles, making it more likely that they will successfully use these higher level sources earlier in their academic careers. By increasing academic rigor, STUDENT SUCCESS IN COLLEGE: DOING WHAT WORKS!, SECOND EDITION builds research-based knowledge about what study skills work; teaches students how to engage with scholarly sources; provides opportunities for students to actively read, critically think, and enhance information literacy skills; and supports students to increase their self-efficacy and motivation. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

When the chance to run arrives, Beldon doesn't think twice about escaping into the shadows of an enchanted castle locked in an eternal winter. He just wants to bury a secret. But the castle is a cold, cruel place and his host is less than welcoming. The sparks that fly between them are icy and aggressive; the tension building until one night it almost costs Beldon his life. Then things change. Beldon's attention turns to the shadowy Beast and the mystery that surrounds him. There is a curse to be broken after all and Beldon promised to help find a mysterious figure known as Beauty. However, Beldon did not expect his secret to resurface within this frozen castle and as such he is forced to confront himself and answer one question. As he and The Beast grow closer, does he want this Beauty found?~~~~ The original draft for the community who wanted a physical copy~

In Tom Kundig: Works, the celebrated Seattle-based architect presents nineteen new projects, from Hawaii to New York City. Kundig's award-winning houses, known for their rugged yet elegant and welcoming style, are showcased in lush photography with drawings and sketches, and appear alongside his commercial work—from multistory complexes to

the Tacoma Art Museum to a line of hardware (handles, door pulls, hinges, and more). In firsthand accounts, Kundig describes the projects and his design process with many personal anecdotes, making Tom Kundig: Works as much memoir as monograph. The book also includes an introduction by design editor Pilar Viladas and in-depth conversations with Kundig's frequent collaborators—"gizmologist" Phil Turner and contractor Jim Dow (Schuchart/ Dow)—and clients (Bigwood Residence and Studhorse).

Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications—in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for

Educational institutions in which administrators, managers and teachers will be working in the late 1990's will be far different from those of today. Schools, which until recently were lagging behind in the implementation of information technology (IT) in their administration and management, are now attempting to close the gap. A massive and rapid computerization process in schools, school districts and throughout the other levels of the educational system, including universities, has made computers an integral part of the educational management scene. A computer on the desk of every educational management staff might become a reality

in the near future. The term "IT" includes three main components: hardware, software - mainly management information systems (MIS)/decision support systems (DSS) and human factors. Presently, successful implementation depends on adequate software and on human factors. MIS/DSSs are being implemented with the aim of providing meaningful support for school employees in their daily activities, and to improve their performance, effectiveness and efficiency. Much like at universities, usable and accessible school databases are being established, encompassing data on students, teachers, employees, classrooms, grade levels, courses, student achievements and behavior, school space, curriculum, finance, inventory, transportation, etc. Monsters aren't born, they are created. Katya. After spending years in hospitals, I can finally have a life. Then my mom abandons me to the care of the most breathtaking man I've ever seen. He's like the embodiment of Death, a Greek tragedy waiting to unfold. Can I break through the darkness that has a hold on him? Kristoff. My soul is black as tar. I'm a cold-hearted killer, the leader of my own Bratva. What mother in her right mind would leave a teenage daughter on my doorstep? A desperate one who's willing to make a deal with the devil. In the latest novel from the New York Times bestselling author of Agony of the

Leaves, Indigo Tea Shop owner Theodosia Browning may always be a bridesmaid, never a bride, but this groom is never going to make it to the altar... Theodosia Browning's dear friend Delaine Dish has asked her to be a bridesmaid for her wedding. But when the big day arrives, everything seems to be going wrong. First, a massive storm is brewing over Charleston. A bad omen? Second, Delaine's sister is late for the ceremony. And finally, the groom not only has cold feet—his whole body is cold. A murderer has crashed the wedding. As Theodosia comforts a devastated Delaine, she needs to sort out the suspects on the groom's side from the suspects on the bride's side. One thing soon becomes apparent—revenge won't be the only dish served cold at this wedding. And if Theodosia doesn't watch her step, a cold-blooded killer may have a rude reception in store for her... "If the trumpet give an uncertain sound, who shall prepare himself to the battle?"—1 Corinthians 14:8

THE volume now in the reader's hands consists of a series of papers, systematically arranged, on the leading truths of Christianity which are "necessary to salvation." Few, probably, will deny that there are some things in religion about which we may think other people hold very erroneous views, and are, notwithstanding, in no danger of being finally lost. About baptism and the Lord's Supper,—about the Christian ministry,—about forms of prayer and modes of worship,—about the union of Church and State,—about all these things it is commonly admitted that people may differ widely, and yet be finally saved. No doubt there are always bigots and extreme partisans, who are ready to excommunicate every one who cannot pronounce their Shibboleth on the above-named points. But, speaking generally, to shut out of heaven all who disagree with us about these things, is to take up a position which most thoughtful Christians condemn as unscriptural, narrow; and uncharitable. On the ether hand, there are certain great truths of which some knowledge, by common consent, appears essential to salvation. Such truths are the immortality of the soul,—the sinfulness of human nature, the work of Christ for us as our Redeemer, the work of the Holy Ghost in us,—forgiveness, justification,—conversion,—faith,—repentance,—the marks of a right heart,—Christ's invitations,—Christ's intercession, and the like. If truths like these are not absolutely necessary to salvation, it is difficult to understand how any truths whatever can be called necessary. If people may be saved without knowing anything about these truths, it appears to me that we may throw away our Bibles altogether, and proclaim that the Christian religion is of no use. From such a miserable conclusion I hope most people will shrink back with horror. To open out and explain these great necessary truths,—to confirm them by Scripture,—to enforce them by some appeals to the conscience of all who read this volume,—this is the simple object of the series of papers which is now offered to the public. The name which I have selected will prepare the reader to expect no new doctrines in this volume. It is simple, unadulterated, old-fashioned Evangelical theology. It contains nothing but the "Old Paths" in which the Apostolic Christians, the Reformers, the best English Churchmen for the last three hundred years, and the best Evangelical Christians of the present day, have persistently walked. From these "paths." I see no reason to depart. They are often sneered at and ridiculed, as old-fashioned, effete, worn out, and powerless in the Nineteenth Century. Be it so. "None of these things move me." I have yet to learn that there is any system of religious teaching, by whatever name it may be called, High, or Broad, or Romish, or Neologian, which produces one quarter of the effect on human nature that is produced by the old, despised system of

doctrine which is commonly called Evangelical. I willingly admit the zeal, earnestness, and devotedness of many religious teachers who are not Evangelical. But I firmly maintain that the way of the school to which I belong is the "more excellent way." The longer I live the more I am convinced that the world needs no new Gospel, as some profess to think. I am thoroughly persuaded that the world needs nothing but a bold, full, unflinching teaching of the "old paths." The heart of man is the same in every age. The spiritual medicine which it requires is always the same. The same Gospel which was preached by Latimer, and Hooper, and Bradford, ruby Hall, Deviant, Usher, Reynolds, and Hopkins,—by Manton, Brooks, Watson, Charnock, Owen, and Gurnall,—by Romaine, Venn, Grimshaw, Hervey, and Cecil,—this is the gospel which alone will do real good in the present day. The leading doctrines of that gospel are the substance of the papers which compose this volume. They are the doctrines, I firmly believe, of the Bible and the Thirty-nine Articles of the Church of England. They are doctrines which, I find, wear well, and in the faith of them I hope to live and die. I repeat most emphatically that I am not ashamed of what are commonly called "Evangelical principles." Fiercely and bitterly as those principles are assailed on all sides,—loudly and scornfully as some proclaim that they have done their work and are useless in this day, I see no evidence whatever that they are defective or decayed, and I see no reason for giving them up. No doubt other schools of thought produce great outward effects on mankind, gather large congregations, attain great popularity, and by means of music, ornaments, gestures, postures, and a generally histrionic ceremonial, make a great show of religion. I see it all, and I am not surprised. It is exactly what a study of human nature by the light of the Bible would lead me to expect. But for real inward effects on hearts, and outward effects on lives, I see no teaching so powerful as thorough, genuine Evangelical teaching. Just in proportion as the preachers of other schools borrow Evangelical weapons and Evangelical phraseology I see them obtaining influence. No doubt the good that is done in the world is little, and evil abounds. But I am certain that the teaching which does most good is that of the despised Evangelical school. It is not merely true and good up to a certain point, and then defective and needing additions, as some tell us; it is true and good all round, and needs no addition at all. If those who hold Evangelical views were only more faithful to their own principles, and more bold, and uncompromising, and decided, both in their preaching and their lives, they would soon find, whatever infidels and Romanists may please to say, that they hold the only lever which can shake the world. The readers of the many tracts which God has allowed me to send forth for thirty years, must not expect much that they have not seen before, in "Old Paths." Experience has taught me, at last, that the peculiar tastes of all classes of society must be consulted, if good is to be done by the press. I am convinced that there are thousands of people in England who are willing to read a volume, but will never look at anything in the form of a tract. It is for them that I now send forth "Old Paths." Those who read through this book continuously, and without a pause, will, doubtless, observe a certain degree of sameness and similarity in some of the papers. The same thoughts are occasionally repeated, though in a different dress. To account for this, I will ask them to remember that most of the papers were originally written separately, and at long intervals of time, in some cases of as much as twenty years. On calm reflection, I have thought it better to republish them, pretty much as they originally appeared. Few readers of a religious book like this read it all through at once; and the great

majority, I suspect, find it enough to read quietly only one or two chapters at a time. I now send forth the volume with a deep sense of its many defects; but with an earnest prayer that it may do some good. J. C. LIVERPOOL. This classic includes the following chapters: Chapter 1. You've read Kingdom Marriage, or maybe you haven't. But somehow you've stumbled upon this book out of all the millions of books in the world, and you're holding it in your hand. It may be the most important book you've ever read. It may confirm words I've been speaking to you that have been hard to hear. Difficult to believe. You may be looking for answers about your life, about your future, about your kingdom mate. And they may be here. You'll never know until you read it. I can tell you this: I am God, and I don't let people stumble upon treasures like this lightly. If you're holding this book, it's because I want you to read it. It's because I want you to have the chance to incorporate these principles into your life. It's likely because I want to confirm some things I've been saying to you in other venues, or in other ways. Read this book. Believe its principles. Act on its directives. It will change your life. -God

Randiana, or Excitable Tales is an anonymously written erotic novel originally published by William Lazenby in 1884. The book depicts a variety of sexual activities, including incest, defloration and lesbianism. Anyone embarking on a research project for the first time is likely to be daunted by the research process and the huge array of seemingly impenetrable terminology. This user-friendly yet comprehensive book is divided into three sections. Tehmina Basit carefully guides the reader step-by-step through the entire research process, from getting started and gathering data, to making sense of the data. Accessible and down-to-earth, Conducting Research in Educational Contexts will prove an invaluable resource for educational researchers everywhere.

The book is supported by a CD-ROM containing extensive revision and exam practice questions, background information and reference material.

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all. The Fifth Edition of *A History of the Roman People* continues to provide a comprehensive analytical survey of Roman history from its prehistoric roots in Italy and the wider Mediterranean world to the dissolution of the Roman Empire in Late Antiquity in A.D. 600. Clearly organized and highly readable, the text's narrative of major political and military events provides a chronological and conceptual framework for the social, economic, and cultural developments of the periods covered. Major topics are treated separately so that students can easily grasp key concepts and ideas.

A Guideline to Implementation of Sustainable Development Goals,

2017-2023

Global Education Digest 2009

It is, of course, commonplace for corporations to operate sophisticated identity programmes. But identity has now moved way beyond the commercial area. We live in a world in which cities, charities, universities, clubs - in fact any activity that involves more than two or three people - all seem to have identities too. However, very few of these organizations have released the full potential that effective management of identity can achieve. In this book, the world's leading authority on corporate identity shows how managing identity can create and sustain behavioural change in an organization as well as achieving the more traditional outcome of influencing its external audiences. The New Guide to Identity provides a simple clear guide to identity, including what it is and how it can be used to full effect. If a change of identity is required, the whole process is described from start-up (including investigation and analysis of the current identity), through developing the new identity structure, to implementation and launch. For anyone responsible for the identity of an organization, or for designing it for someone else, or attempting to achieve change in their organization, or studying the subject, this straightforward guide is essential reading. *Betrayal in the City*, first published in 1976 and 1977, was Kenya's national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive, thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Mosese, one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future."--Page 4 of cover.

Praise is perhaps the most widely used technique to influence others. When used appropriately, praise can motivate people, make them feel better, and improve their social relationships. Often, however, praise fails to work as intended and may even cause harm. *Psychological Perspectives on Praise* reviews and integrates psychological theory and research to provide an overarching perspective on praise. With contributions from leading scholars in the field, this book amalgamates diverse theoretical and empirical perspectives on praise. The book starts with providing an overview of prominent theories that seek to explain the effects of praise, including self-enhancement theory, self-verification theory, attribution theory, and self-determination theory. It then discusses several lines of empirical research on how praise impacts competence and motivation, self-perceptions (e.g., self-esteem and narcissism), and social relationships. It does so in a range of contexts, including children's learning at school, employees' commitment at work, and people's behavior within romantic relationships. The book concludes by showing how praise can be understood in its developmental and cultural context. Revealing that praise is a message rich in information about ourselves and our social environments, this book will be of interest to social, organizational, personality, developmental, and educational psychologists; students in psychology and related disciplines; and practitioners including teachers, managers, and counselors who use praise in their daily practice.

Natalie Shapero spars with apathy, nihilism, and mortality, while engaging the rich territory of the 30s and new motherhood

This Selected Issues paper examines the stability of the financial sector in Botswana. The financial system has grown rapidly over the years, but there is still substantial scope for expansion. Banks, institutional investors,

and the Botswana Stock Exchange have grown steadily over the years based on political and economic stability, savings from diamond exports, and fiscal surpluses. Botswana ' s financial stability framework could benefit from upgrading. Data gaps and incomplete information on cross-border capital flows and growing interconnection with the nonbank financial sector may entail risks. In this regard, close cooperation among regulators and proper assessment of macro-financial risks associated with banks ' large exposures will contribute to more effective financial system supervision.
