**main content of the CD contains pages that summarize the topics covered in the book. Each page has voice over content that simulates a lecture environment. There are also interactive examples that allow the learner to go through the instructor led and in-class student exercises found in the book on their own. Video examples are also included to supplement the learning process. Each chapter contains these types of exercises: Instructor led in-class exercises Students complete these exercises in class using information presented by the instructor using the PowerPoint slides on the instructor CD. In-class student exercises These are exercises that students complete in class using the principles presented in the lecture. Video Exercises These exercises are found in the text and correspond to videos found on the CD. In the videos the author shows how to complete the exercise as well as other possible solutions and common mistakes to avoid. Interactive Exercises These exercises are found on the CD and allow students to test what they've learned and instantly see the results. End of chapter problems These problems allow students to apply the principles presented in the book. All exercises are on perforated pages that can be handed in as assignments. Review Questions The**
