From Jack the Ripper to Frankenstein, Halloween customs to Alexander McQueen collections, Fashioning Horror examines how terror is fashioned visually, symbolically, and materially through fashion and costume, in literature, film, and real life. With a series of case studies that range from sensationalist cinema and Slasher films to true crime and nineteenth-century literature, the volume investigates the central importance of clothing to the horror genre, and broadens our understanding of both material and popular culture. Arguing that dress is fundamental to our understanding of character and setting within horror, the chapters also reveal how the grotesque and horrific is at the center of fashion itself, with its potential for instability, disguise, and carnivalesque subversion. Packed with original research, and bringing together a range of international scholars, the book is the first to thoroughly examine the aesthetics of terror and the role of fashion in the construction of horror.

Beyond Mothers, Monsters, Whores takes the suggestion in *Mothers, Monsters, Whores* that it is important to see genderings in characterizations of violent women, and to use critique of those genderings to retheorize individual violence in global politics. It begins by demonstrating the interdependence of the personal and international levels of global politics in violent women's lives, but then shows that this interdependence is inaccurately depicted in gender-subordinating narratives of women's violence. Such narratives, the authors argue, are not only normatively problematic on the surface but also intersect with other identifiers, such as race, religion, and geopolitical location.

June Thomson and Giselle Ross are inextricably linked by two unspeakable acts of evil. On the same day, a few miles apart, their estranged husbands slaughtered their children. The murders were not driven by rage, or committed in moments of madness. They were planned, and carried out with chilling precision, to inflict the worst pain imaginable. June and Giselle did not know each other. Tragedy is all that binds them. In the passing of an afternoon, on a late spring day, they were destined to come together as "sisters," united by pain, grief, and a sense of loss so immense that it would drive both to the brink of madness. Both women had separated from their husbands, and neither had had happy relationships. June's life with Rab Thomson had been a dark and turbulent existence, characterized by mental torture, physical violence, and rape. Giselle's relationship with Ashok Kalyanjee had been a strange and distant affair, of lives spent apart before, during and after marriage. But both relationships had produced two beautiful children, and on that fateful Saturday in May 2008 the pain and misery of their marriages was in the past for the women. Both mothers had a conscience and believed it was important to allow the fathers' access to their children. Neither could have foreseen the horrific lengths their husbands would go to to take revenge for being cast aside. On that spring day, neither could have conceived that the men they had once loved would do anything to harm their children. But they were wrong, so terribly wrong. Nothing can bring their children back. But June and Giselle have one solitary comfort: they are no longer alone. Their lives may have been torn apart, but they have each other. June is the only other person in the world who understands what Giselle has gone through. And when June cries out, it is only Giselle who can appreciate the depths of her despair. Together they are stronger. This is the story of their parallel journeys: of the dreadful days before, during, and after the murders of their children. Told in their own words, with searing honesty of their pain, and guilt, it is a story of endurance, friendship, and survival against the odds. It is not a story for the faint hearted, but it is a story that must be told, for in the end, it is a testament to the human spirit.

This classic of film criticism, long considered invaluable for its eloquent study of a problematic period in film history, is now substantially updated and revised by the author to include chapters beyond the Reagan era and into the twenty-first century. For the new edition, Robin Wood has written a substantial new preface that explores the interesting double context within which the book can be read—that in which it was written and that in which we find ourselves today. Among the other additions to this new edition are a celebration of modern "screwball" comedies like *My Best Friend's Wedding*, and an analysis of '90s American and Canadian teen movies in the vein of *American Pie*, *Can't Hardly Wait*, and *Rollercoaster*. Also included are a chapter on Hollywood today that looks at David Fincher and Jim Jarmusch (among others) and an illuminating essay on *Day of the Dead*.

This book brings together Ancient Chinese stories from millennia ago, great novels depicting China's culture, online literature attracting millions of its youngsters, and people celebrating its traditions. It discusses the first-hand experience of living and teaching in China, different versions of "Beauty and the Beast," the Chinese New Year and its celebration beyond China, Taoism and Confucianism, and traditional and newly emerged literature. The volume represents a magic combination of stories and academic studies, with ideas from writers from different backgrounds. All these voices form a China in the modern chaotic world and depict its relationship with other cultures, histories and literatures.

The essays in *Beyond the Stars 5* examine a small but important sample of the conventional themes and ideologies treated in popular film. Among the topics covered are family, social class, gender roles, politics, warfare, hedonism, and the 1960s.

"The Metal Monster" – Dr. Goodwin is on a botanical expedition in the Himalayas. There he meets Dick Drake, the son of one of his old science acquaintances. They are witnesses of a strange aurora-like effect, but seemingly a deliberate one. As they go out to investigate, they meet Goodwin's old friends Martin and Ruth Ventnor, brother and sister scientists. The group is saved from death in the mountains by a magnificent woman they get to know as Norhala. They are led to a hidden valley occupied by what they name "The Metal Monster", a strange metal city occupied by the metal animate "Things Nomaha commands. This city is governed by what they call the Metal Emperor, assisted by the Keeper of the Cones. "The Moon Pool" deals with an advanced race which has developed within the Earth's core. Eventually their most intelligent members create an offspring. This created entity encompasses both great good and great evil, but it slowly turns away from its creators and towards evil. The entity is called either the Dweller or the Shining One.

Spanning the years 500 to 1000 A.D. this volume illustrates the conflict between brutality and civilization that seemed to characterize the period so often called—not improperly—the "Dark Ages." Islam and Byzantium, as much as Western Europe, figure in the twenty-two chapters of documents offered in this book, part of the ten-volume series, "Sources of Western Civilization."

Many analysts in Victorian British novels were intimately connected with the protagonists, and representative of both the personal failings of a character and the failings of the society in which he or she lived. By contrast, more recent film adaptations of these novels depict the creatures as arbitrarily engaging in senseless violence, and suggest a modern fear of the uncontrollable. This work analyzes the dichotomy through examinations of Shelley's Frankenstein, Stoker's Dracula, H. Rider Haggard's She, Stevenson's Strange Case of Dr. Jekyll and Mr. Hyde and Wells's The Island of Dr. Moreau, and consideration of the 20th century film adaptations of the works.

Nothing foretold the trouble on planet "TM." Every day the Sun was rising and setting down at the same time. The colorful houses, by shape look like beans, charged from the Sun's energy. At night, they rose upward and gave off their light like flashlights. Nevertheless, suddenly the monsters woke up in the pitch darkness. In the morning, the houses went down on the blue grass but the Sun was not shining. What is the matter? The houses cannot rise upwards to illuminate planet "TM" without the Sun. The monsters began to turn on flashlights on their gadgets. The watchful monster Cynthia has noticed footprints in the twilight. She has scanned that finding with her magnifying glass. These are the evil monster Henry's footprints, are not they? Sean and Brad are sure that Henry is involved in this disappearance of the Sun. Where will they search the Sun? No one knows that the Sun disappeared from planet "M" once, before the birth of monsters. But where? Moreover, who returned it back? Suddenly Brad's sensor starts giving a loud signal - his little sister MIMI has disappeared. The sensor indicates that she is far beyond the city of "T", where Monsters-friends have never been before. Monsters go to seek Mimi without wasting any time. Will the friends find MIMI? Will they manage to return the Sun back?

As monsters in popular media have evolved and grown more complex, so have those who take on the job of stalking and slaying them. This book examines the evolution of the contemporary monster hunter from Bram Stoker's Abraham Van Helsing to today's non-traditional monster hunters such as Blade, Buffy the Vampire Slayer, and Watchmen. Critically surveying a diverse range of books, films, television shows, and graphic novels, this study reveals how the monster hunter began as a white, upper-class, educated male and became everything from a vampire to a teenage girl with supernatural powers. Now often resembling the monsters they've world to conquer, modern characters occupy a gray area where the battle is often with their own inner natures as much as with the "evil" they fight.

The Epic Tradition of the Ainu

Death and the Retribution Principle in the Book of Job

Time and everything else are running out for the Empire. In fact, it's already running on fumes. Before the last grain of sand falls from its hourglass, each person will have hard choice to make. Some will shut their eyes to the inevitable. Others will choose to reject catastrophe. But even if they're doomed, there's no point in going down quietly. Beneath her mask of patriotism, Tanya vows to do whatever it takes to avoid going down with the ship.

In the course of the Belief series, Steven Chase brings the book of Job to life as its issues connect with our lives today. The ideas and questions of theodicy, divine justice, and divine power that arise and challenge Job's life still resonate with us today. Chase's commentary wrestles, theologically, with these issues and many others raised in the biblical text, but it also probes the depths of spiritual theology in the book of Job.

As an especially beautiful and pure example of the archaic epic styles that were once current among the hunting and fishing peoples of northern Asia, the Ainu epic folklore is of immense literary value. This collection and English translation by Donald Philippi contains thirty-three representative selections from a number of epic genres including mythic epics, culture hero epics, women's epics, and heroic epics. This is the first time, outside of Japan, that the Ainu epic folklore has been treated in a comprehensive manner. This book presents a comprehensive re-examination of the cinemas of the Soviet Union and Central and Eastern Europe during the communist era. It argues that, since the end of communism in these countries, film scholars are able to view these cinemas in a different way, no longer bound by an outlook relying on binary Cold War terms. With the opening of archives in Eastern Europe and the former Soviet Union, much more is known about these states and societies; at the same time, the field has been reinvigorated by its opening up to more contemporary concepts, themes and approaches in film studies and adjacent disciplines. Taking stock of these developments, this book presents a rich, varied tapestry, relating specific films to specific national and transnational circumstances, rather than viewing them as a single, monolithic "Cold War Communist" cinema.

As he dropped the last grisly fragment of the dismembered and mutilated body into the small vat of nitric acid that was to devour every trace of the horrid evidence which might easily send him to the gallows, the man sank weakly into a chair and throwing his body forward upon his great, teak desk buried his face in his arms, breaking into dry, moaning sobs. Beads of perspiration followed the seams of his high, wrinkled forehead, replacing the tears which might have lessened the pressure upon his overworked nerves. His slender frame shook, as with ague, and at times was racked by a convulsive shudder. A sudden step upon the stairway leading to his workshop brought him trembling and wide eyed to his feet, starting fearfully at the locked and bolted door. Although he knew perfectly well whose the advancing footfalls were, he was all but overcome by the madness of apprehension as they came softly nearer and nearer to the barred door. At last they halted before it, to be followed by a gentle knock. "Daddy!" came the sweet tones of a girl's voice. The man made an effort to take a firm grasp upon himself that no tell-tale evidence of his emotion might be betrayed in his speech. "Daddy!" called the girl again, a trace of anxiety in her voice this time. "What IS the matter with you, and what ARE you doing? You've been shut up in that hateful old room for three days now without a morsel to eat, and in all likelihood without a wink of sleep. You'll kill yourself with your stuffy old experiments." The man's face softened....

In 1968, George Romero's film *Night of the Living Dead* premiered, launching a growing preoccupation with zombies within mass and literary fiction, film, television, and video games. Romero's creativity and enduring influence make him a worthy object of inquiry in his own right, and his long career helps us take stock of the shifting interest in zombies since the 1960s. Examining his work promotes a better understanding of the current state of the zombie and where it is going amidst the political and social turmoil of the twenty-first century. These new essays document, interpret, and explain the meaning of the still-budding Romero legacy, drawing cross-disciplinary perspectives from such fields as literature, political science, philosophy, and comparative film studies. *Essays consider some of the sources of Romero's inspiration (including comics, science fiction, and Westerns), chart his influence as a storyteller and a social critic, and consider the legacy he leaves for viewers, artists, and those studying the living dead.*

Bram Stoker Award finalist Michael Laimo delivers his most horrifying novel yet! Is Bev Mathers going crazy? He's been hearing chilling voices in his head, seeing nightmarish visions that just can't be true. And it keeps getting worse and worse. No, unfortunately for Bev,

he's completely sane. What's taking control of him is far more terrifying than insanity. And it has an unimaginable purpose... Bev has become an innocent pawn in an infernal game, a victim of hellish forces beyond understanding. His visions of blood and debauchery are growing more ghastly every day. Some of them — the most shocking — are real. Bev can feel his mind, his body, his very soul slipping away. Will his only hope or his eternal damnation come from... the demonologist?

June Thomson and Giselle Ross are inextricably linked by two unspeakable acts of evil. On the same day, a few miles apart, their estranged husbands slaughtered their children. The murders were not driven by rage, or committed in moments of madness. They were planned, and carried out with chilling precision, to inflict the worst pain imaginable.

The simplicity of children's picture books—stories told with illustrations and a few well chosen words or none at all—makes them powerful tools for teaching morals and personal integrity. Children follow the story and see the characters' behaviors on the page and interpret them in the context of their own lives. But unlike many picture books, most children's lives don't feature monsters. p.p1 (margin: 0.0px 0.0px 0.0px; font: 12.0px Times New Roman) This collection of new essays explores the societally sanctioned behaviors imparted to children through the use of monstrous and supernatural characters. Topics include monsters as instructors, the normalization of strangers, or the "other," fostering gender norms, and therapeutic monsters, among others.

In ancient China a monster called Taouwu was known for both its vicious nature and its power to see the past and the future. Over the centuries Taouwu underwent many incarnations until it became identifiable with history itself. Since the seventeenth century, fictive accounts of history have accommodated themselves to the monstrous nature of Taouwu. Moving effortlessly across the entire twentieth-century literary landscape, David Der-wei Wang delineates the many meanings of Chinese violence and its literary manifestations. Taking into account the campaigns of violence and brutality that have rocked generations of Chinese—often in the name of enlightenment, rationality, and utopian plenitude—this book places its arguments along two related axes: history and representation, modernity and monstrosity. Wang considers modern Chinese history as a complex of geopolitical, ethnic, gendered, and personal articulations of bygone and ongoing events. His discussion ranges from the politics of decapitation to the poetics of suicide, and from the typology of hunger and starvation to the technology of crime and punishment.

'Modern European thought' describes a wide range of philosophies, cultural programmes, and political arguments developed in Europe in the period following the French Revolution. Throughout this period, many of the wide range of 'modernisms' (and anti-modernisms) had a distinctly religious and even theological character-not least when religion was subjected to the harshest criticism. Yet for all the breadth and complexity of modern European thought and, in particular, its relations to theology, a distinct body of themes and approaches recurred in each generation. Moreover, many of the issues that took intellectual shape in Europe are now global, rather than narrowly European, and, for good or ill, they form part of Europe's bequest to the world-from colonialism and the economic theories behind globalisation through to democracy to terrorism. This volume attempts to identify and comment on some of the most important of these. The thirty chapters are grouped into six thematic parts, moving from questions of identity and the self, through discussions of the human condition, the age of revolution, the world (both natural and technological), and knowledge methodologies, concluding with a section looking explicitly at how major theological themes have developed in modern European thought. The chapters engage with major thinkers including Kant, Hegel, Kierkegaard, Heidegger, Schleiermacher, Nietzsche, Dostoevsky, Barth, Rahner, Tillich, Bonhoeffer, Sartre, de Beauvoir, Wittgenstein, and Derrida, amongst many others. Taken together, these new essays provide a rich and reflective overview of the interchange between theology, philosophy and critical thought in Europe, over the past two hundred years.

In recent decades, scholars have tended to interpret what Job says about death in one of two ways. They interpret it either as part of the broader reading of death in the Old Testament, or by imposing Ancient Near Eastern mythological concepts upon the text disregarding its nature as part of the Old Testament's wisdom tradition. Varunaj Churnai attempts to redress the latter interpretation and treats the book of Job, and its development and understanding of death, contextually. Churnai specifically looks at how Job presents the two faces of God: God's wrathful face and God's gracious face. Beyond Justice demonstrates that the retribution principle allows humans to know the hidden God as it illuminates the relationship between individual and Creator. Through Job's experiences and heartfelt outpouring of his soul before both God's wrathful face and God's gracious face we can know God more fully. Churnai shows how these faces of God are reconciled in the two divine speeches of YHWH, which invite both Job and the reader to move beyond retribution theology to trust in the graciousness of God.

A philosophical history of the concept of evil in western culture. "Evil is something to be feared, and historically, we shall see, it is the enemy within who has been seen as representing the most intense evil of all - the enemy who looks just like us, talks like us, and is just like us." The Myth of Evil explores a contradiction: the belief that human beings cannot commit acts of pure evil, that they cannot inflict harm for its own sake, and the evidence that pure "evil" truly is a human capacity. Acts of horror are committed not by inhuman "monsters", but by ordinary human beings. This contradiction is clearest in the apparently "extreme" acts of war criminals, terrorists, serial murderers, sex offenders and children who kill. Phillip Cole delves deep into our two, costly established approaches to evil.

There is the traditional approach where evil is a force which creates monsters in human shape. And there is the "enlightened" perspective where evil is the consequence of the actions of misguided or mentally deranged agents. Cole rejects both approaches. Satan may have played a role in its evolution, but evil is really a myth we have created about ourselves. And to understand it fully, we must acknowledge this. Drawing on the philosophical ideas of Nietzsche, Arendt, Kant, Mary Midgley and others, as well as theology, psychoanalysis, fictional representations and contemporary political events such as the global "war on terror", Cole presents an account of evil that is thorough and thought-provoking, and which, more fundamentally, compels us to reassess our understanding of human nature.
