Presentamos el tercer volumen de una obra que contiene todo el texto del Antiguo Testamento en caracteres hebreos según los originales del manuscrito de Leningrado, el más completo y más antiguo de los que se conocen hasta el día de hoy. Debajo de cada palabra hebrea viene la traducción literal. Se ha seguido un criterio literalista, de modo que aunque muchas expresiones y giros idiomáticos no tienen un sentido claro al verse literalmente al castellano, se ha preferido seguir este criterio a fin de acercar más al lector el texto original. Este tercer volumen contiene la segunda parte de los Libros Históricos y todos los Libros Poéticos.

THE NEW TESTAMENT was written in Koine Greek during the first century AD. From the time of its original revelation, handwritten copies continually were prepared in order to maintain and preserve that original text into the modern era. All copies made prior to the invention of movable-type printing were made by hand, resulting in various scribal alterations, most of these being of a minor nature. Although the autographs no longer exist and no two manuscript copies are completely identical, sufficient evidence exists by which one can produce an accurate representation of the original text by comparing and evaluating the overall manuscript consensus. Robinson and Pierpont have taken the utmost care in preparing that text for this edition. Various other methods for restoration of the original NT text have fallen short of their goal, in part due to methodological subjectivity, and in part to a presuppositional bias against the claims of the Byzantine Textform. The texts created under such a bias tend to be based on only a handful of favored manuscripts, and fail to consider all transmissional factors in the preservation of the original text. As a result, the modern eclectic texts tend to preserve more of a caricature than the essence of the originals. In contrast, Robinson and Pierpont have applied many of the same methods of textual criticism to their task, but without the anti-Byzantine bias. Their method of "reasoned transmissionalism" is based on the wider scope of manuscript transmission throughout history. The preface of this edition explains the basic method by which the present editors have arrived at their basic text. The appendix contains Robinson's essay, "The Case for Byzantine Priority," which presents a rationale for and defense of the theory and methodology that has been applied in the preparation of this edition.

Codex Sinaiticus is one of the world's most remarkable books. Written in Greek in the fourth century, it is the oldest surviving complete New Testament, and one of the two oldest manuscripts of the whole Bible. No other early manuscript of the Christian Bible has been so extensively corrected, and the significance of Codex Sinaiticus for the reconstruction of the Christian Bible's original text, the history of the Bible and the history of western book making is immense. Since 2002, a major international project has been creating an electronic version of the manuscript. This magnificent printed facsimile reunites the text, now divided between the British Library, the National Library of Russia, St Catherine's Monastery, Mt Sinai and Leipzig University Library. In this groundbreaking study of Paul's first epistle to the Corinthians, Kenneth Bailey examines the canonical letter through Paul's Jewish socio-cultural and rhetorical background and through the Mediterranean context of its Corinthian recipients.

An enduring academic favorite now updated for the first time in fifteen years, this user-friendly introduction to New Testament Greek keeps discussion of grammar as non-technical as possible. Author David Alan Black provides tools and exercises for bringing the student to the experience of reading from the Greek New Testament after just seventeen lessons. Among the revisions to this third edition are updated discussions and scholarship, further back matter vocabulary references, and additional appendices.

What is the central theme of the Bible? Given the diversity of authorship, genre, and context of the Bible's various books, is it

*even possible to answer such a question? Or in trying to do so, is an external grid being unnaturally superimposed on the biblical text? These are difficult questions that the discipline of biblical theology has struggled to answer. In this thoroughly revised and expanded edition of his classic *Toward an Old Testament Theology*, Walter Kaiser offers a solution to these unresolved issues. He proposes that there is indeed a unifying center to the theology and message of the Bible that is indicated and affirmed by Scripture itself. That center is the promise of God. It is one all-encompassing promise of life through the Messiah that winds itself throughout salvation history in both the Old and New Testaments, giving cohesiveness and unity to the various parts of Scripture. After laying out his proposal, Kaiser works chronologically through the books of both testaments, demonstrating how the promise is seen throughout, how the various sub-themes of each book relate to the promise, and how God's plan to fulfill the promise progressively unfolds. Here is a rich and illuminating biblical theology that will stir the emotion and the intellect.*

In this volume, *The Great Doctrines of the Bible*, author William Evans identifies and explains some of the most important doctrinal and dogmatic tenets of the Christian faith.

In most Bibles the period between the Old and the New Testaments is represented by a single blank page which, perhaps, has symbolic significance. 'From Malachi to Matthew' has for long remained vague and unfamiliar to many readers of the Scriptures. Many mysteries remain,

but in recent times much light has been cast on this whole period. Exciting new insights have been provided by the writings of numbers of scholars and by some remarkable archaeological discoveries. The discovery of the Dead Sea Scrolls caught the popular imagination and engaged the attention of worldwide scholarship. In this small volume an attempt is made to review these years in the light of recent study and discoveries and in particular to assess the religious contribution made by that rather strange company of men known as 'the apocalyptists'. The purpose of this book is selective rather than exhaustive, indicating the part which the apocalyptists had to play within the religious development of Judaism and in the preparation of men's minds for the coming of Christianity. From the dramatic find in the caves of Qumran, the world's most ancient version of the Bible allows us to read the scriptures as they were in the time of Jesus.

This is a print on demand book and is therefore non- returnable. The Handbook, designed as a complete tool for the student of Biblical Hebrew, is the result of over twenty- five years of teaching the language. While it is primarily intended for use in Hebrew courses, it is also an excellent tool for a refresher course or useful as a basic grammatical reference work to aid the exegete. Similar in format to the author's Handbook of New Testament Greek, it combines reading lessons (vol. 1) with grammar, paradigms, and basic vocabulary (vol. 2). William LaSor uses the inductive method, studying directly from the text, rather than the conventional method of language study in which beginning students learn the rules of grammar and syntax and memorize vocabulary, often without reading the actual text. Instead of memorizing numerous forms that will never be encountered in actual reading, the student learns only what he or she encounters. The lessons are based on the Hebrew text of Esther, chosen because it presents little difficulty in theological or textual matters and has an excellent vocabulary. LaSor has included readings from other portions of the Bible, such as several chapters from Genesis, to introduce the student to Hebrew other than that found in Esther. The diligent student of this method will learn not only the elements of Hebrew but also how to inductively study the language and how to learn by induction what the Hebrew text says.
