Changes in health care are at a breakneck pace. Regardless of the many changes we have collectively experienced, delivering health care has been, is, and will continue to be an enormously information-intensive process. Whether caring for a patient or a population, whether managing a clinic or a continuum, we are in a knowledge

In a fiercely competitive healthcare marketplace, the pressures to succeed in this undertaking-and the rewards associated with success-are enormous. While the task is still daunting, we can all be encouraged by progress being made in information management. There are documented successes throughout health care, and there is growing recognition by healthcare chief executive officers and boards that information
