

## Big Boeing 747 Fmc User Guide

When it first rolled off the assembly line in the 1960s, the Boeing 747 took on the mantle of the largest commercial airliner in the world, a position it has still to relinquish after more than 30 years. The 747-400 model is the latest and largest in Boeing's evolution of the giant. Its story is told here. Including numerous pictures, it is the latest in the popular abc series of airliner and airline books.

Directory for Financial Managers

For a quarter of a century, David L. Lewis' Ford Country column has been an eagerly anticipated feature in each issue of Cars & Parts magazine. With art authoritative yet breezy style, he has established himself as an expert on all things

Ford -- the family, the company, and the automobiles. This second hardbound volume presents even more of Ford Country as it has appeared through the years, along with accompanying photographs and captions.

This questionnaire is addressed to pilots operating the B747-400. It is based on the Flight Crew Operations Manual (FCOM) 747-509, and theFlight Crew Training Manual (FCTM) B747-400, both published by Air

Atlanta Icelandic. It is not substituting any approved bibliography and it is not covering all topics. It is organized in 26 chapters, in order to be compatible with the bibliography of origin. It is

configured under the ISD method, used in the Air Force of many states (i.e. USAF). As such, it serves for studying and better understanding, instead of assessing. In an ISD questionnaire: ? There are no

statements about equally True or False. ? It is usually very easy to identify the True answer. Remember that the question serves as an excuse to provide an information, not for assessing knowledge. ? The

False answers serve to increase the contrast between True and False, and not to confuse the trainee and increase the level of difficulty. ? Whenever there is a choice of True or False, the answer is

always the True. This is to prevent for a False information to be adopted. ? Whenever is asked to "Mark the True statements", expect almost all statements to be valid. This serves as an excuse to provide

information, not for assessing knowledge. Note that due to the bibliography of origin, some company limitations or procedures may be incorporated in the questionnaire.
