

## Bike Exif Custom Motorcycle Calendar 2018

Death arrives in this darkly humorous and brilliantly illustrated tale created by Nicholas Gurewitch, author of The Perry Bible Fellowship Almanack! Death becomes a patient of a recently-bereaved psychoanalyst. The topic of discussion? His frolicsome child, who has no apparent interest in grim-reaping! Featuring an unfathomable number of lines which have been hand-chiseled into inked clay, this labor of love by Nicholas Gurewitch invokes the morbid humor of his comic strip (The Perry Bible Fellowship) and the spooky silent-film qualities of the late Edward Gorey.

Go on the trip of a lifetime. Two Wheels South shows you how to realize your own journey. Two friends take the motorcycle trip of their life--From Brooklyn to Patagonia. Matias Corea shares his insights on how to prepare, choose the right motorcycle, what to pack, how to plan the route, where to camp and last but not least: How to prepare your mind. Setbacks and breaking down are part of the adventure, but preparation and being on the road teach you the confidence to tackle any problem. Follow Matias Corea and his friend Joel through the American South, Central America over the Darien Gap and beyond, over wooden cracking jungle bridges in Colombia and to dry lake high plateaus in Argentina. Feel the character of the roads and the smell of nature: Riding a motorcycle is one of the purest forms of traveling. After 7 months and 13 countries Matias and Joel have learned a lot while riding down south on their trusty BMW air-cooled G / S overland haulers and are ready to share their experience. Two Wheels South invites you on the experience of a lifetime.

Hallelujah, it's a book! After proving itself to be the "funniest calendar of the year" (according to Gene Shalit), "irresistible" (USA Weekend), and "habit-forming" (Maxim magazine), the Nuns Having Fun calendar has inspired Nuns Having Fun, a book of endearing nuttiness. Catholic kitsch doesn't get any funnier. Written by Maureen Kelly and Jeffrey Stone, pitch-perfect co-authors of the nuns calendar and the New York Times bestseller Growing Up Catholic, Nuns Having Fun features hundreds of sisters in full habit, cutting loose and having a hoot. Here are nuns in the surf ("This is even more fun than walking on water"), nuns in bumper cars ("We brake for Jesus"), nuns in a beer hall ("Ale Marys"), and nuns in the museum, huddled in front of a study of nudes ("It's okay to open your eyes. Sister Wendy says it's art"). There are nuns on skates, at bat, at the theater, skeet shooting (nuns with guns!), even hitting the slots (you know it's for a good cause). The 125 images are from the 1950s and '60s, black-and-white and possessing a pure retro charm; the written material is all-new. Drawing on their years as parochial school students, the authors explore the lore and legends surrounding nuns, including Favorite Punishments from Nuns, Nuns Say the Darndest Things, How to Recognize a Nun After Vatican II, a Wimple Watch, and List of People Who Could Have Been Nuns. As Sister says, "To err is human. To laugh is divine."

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

The story of the four-wheel-drive tractors built by Steiger, International Harvester, Case, and Case IH is told in dramatic fashion in this authoritative guide. Starting with the development of early four-wheel-drive systems at International Harvester, the book traces the evolution and design some of the most powerful and capable tractors of the twentieth century. With fresh detail on the 4300, 4100, Steiger-built IH tractors, and the 2+2 tractors including the Super 70 series, the book offers prototype drawings of several models--including the complete story of the never-before-published Magnum 2+2-- as well as inside stories and backroom drama that is a must for any enthusiast for farm history or tractors. Learn the complete story of Steiger tractors, which were originally designed and built in the barn of John, Douglass, and Maurice Steiger located near Red Lake Falls, Minnesota. Containing interviews with more than 50 of the people who built Steiger from its humble origin to a world leader, the book traces the evolution of the lime green Steigers in engrossing detail. The book also covers the J.I. Case 4WD line in great detail. In addition, the book tells the story of how each of these significant players in the industry combined under one banner and--together--created one of the current industry-leading technologies, the Quadtrac. The modern evolution of the Steigers and the introduction of the STX Series (and more) also receive in-depth coverage. The same team that created the award-winning books Red Tractors 1958-2013 and Red Combines 1915-2015 created this book, and notable new contributors include Sherry Schaefer (editor of Heritage Iron magazine) and noted historian Jim Allen. Contributors include Sherry Schaefer, Oscar H. Will III, Jim Allen, Kenneth Updike, Todd Markle, Gregg Montgomery, Guy Fay, Martin Rickatson, Sarah Tornac, Matthias Buschmann, Jean Cointe, Michael Osweiler, and Johann Dittmer.

When 16-year-old poetry blogger Tessa Dickinson is involved in a car accident and loses her eyesight for 100 days, she feels like her whole world has been turned upside-down. Terrified that her vision might never return, Tessa feels like she has nothing left to be happy about. But when her grandparents place an ad in the local newspaper looking for a typist to help Tessa continue writing and blogging, an unlikely answer knocks at their door: Weston Ludovico, a boy her age with bright eyes, an optimistic smile...and no legs. Knowing how angry and afraid Tessa is feeling, Weston thinks he can help her. But he has one condition -- no one can tell Tessa about his disability. And because she can't see him, she treats him with contempt: screaming at him to get out of her house and never come back. But for Weston, it's the most amazing feeling: to be treated like a normal person, not just a sob story. So he comes back. Again and again and again. Tessa spurns Weston's "obnoxious optimism", convinced that he has no idea what she's going through. But Weston knows exactly how she feels and reaches into her darkness to show her that there is more than one way to experience the world. As Tessa grows closer to Weston, she finds it harder and harder to imagine life without him -- and Weston can't imagine life without her. But he still hasn't told her the truth, and when Tessa's sight returns he'll have to make the hardest decision of his life: vanish from Tessa's world...or overcome his fear of being seen. 100 Days of Sunlight is a poignant and heartfelt novel by author Abbie Emmons. If you like sweet contemporary romance and strong family themes then you'll love this touching story of hope, healing, and getting back up when life knocks you down.

Speed, power, and head-turning looks—there ’s no mistaking a supercar! In this 16-month wall calendar, G. F. Williams ’ superb photography captures the greatest high-performance offerings. From classics like the Jaguar XJ220 and Ferrari 250 to today ’s stunning Bugatti, Pagani, and McLaren hypercars, Supercars 2022 features top makes and models from around the world. This 12" x 12" wall calendar includes a convenient page that shows the months of September, October, November, and December 2021, followed by individual pages for the months of 2022. Supercars 2022 belongs on the wall of any fan of these super high-performance machines.

'Vantastic' takes a lively look at one of New Zealand's most popular traditional holiday pursuits - caravanning.

16-Month Calendar - September 2021 Through December 2022

An essential and compelling exploration of the design, history, and culture of the motorcycle - an icon of the machine age Motorcycles are ubiquitous in the world's streets and cities, evolving over decades in engineering and design to meet individual transportation needs. With the coming demise of the internal combustion engine and the rise of electricpowered vehicles, motorcycle design is being revolutionized by new technologies, the demands of climate change, and global social transformation. The Motorcycle: Desire, Art, Design traces the exciting evolution of this automotive icon -- and the culture of desire, freedom, and rebellion that surrounds it.

Bike EXIF Custom Motorcycle Calendar 2014

***This book chronicles the development and history all five Ducati Corse World Superbike generations together with interviews with the designers, racers and team managers. This unique insight is provided by renown motorcycle racer and journalist Alan Cathcart who has had the opportunity to test ride every one of the race bikes over the last 25 years***
***“Technology is rapidly moving into our bodies,” writes cyber expert Keenan, “and this book gives a chilling look ahead into where that road may lead us – on a one way trip to the total surrender of privacy and the commoditization of intimacy.” Here is the definitive dissection of privacy-eroding and life-invading technologies, coming at you from governments, corporations, and the person next door. Take, for example, “Girls Around Me”: a Russian-made iPhone App that allowed anyone to scan the immediate vicinity for girls and women who checked in on Foursquare and had poorly secured Facebook profiles. It combined this information in a way never intended by the original poster. Going to a Disney theme park? Your creepy new “MagicBand” will alert Minnie Mouse that you’re on the way and she’ll know your kid’s name when you approach her. Thinking about sending your DNA off to Ancestry.com for some “genetic genealogy”? Perhaps you should think again: your genetic information could be used against you. With security scares like the Heartbleed bug (which compromised even supposedly safe internet behemoths like Google and Yahoo!) becoming more commonplace, this book is a must-read for anybody who values their privacy in a wired world.***

***Ever since Max Friz first mounted his innovative M2B32 opposed-twin engine in a motorcycle frame in 1923, the history of BMW motorcycles has been defined by a constant and relentless quest for perfection. In the 95 years that have followed, the company has created the most innovative and technologically advanced motorcycles produced anywhere on earth. BMW has earned a reputation for not doing things the way everyone else does, but its motorcycles aren’t different simply for the sake of being different. Each distinctive feature represents a brilliant and elegant solution to a real problem, leading BMW to be the first company to introduce many of the features that were later adopted by other manufacturers. But there’s more to a BMW motorcycle than innovation and technology—there’s also art. And as beautiful as the bikes are in their totality, they may be even more so when broken down into their individual details. This book captures the elegance of these amazing machines, both in their details and in the sum of their parts, through the masterful photography of Henry von Wartenberg and writing of author Peter Gantriis. The Art of BMW: Ninety Years of Motorcycling Excellence features the Peter Nettesheim collection, one of the world’s premier collections of BMW motorcycles. These wonderfully restored pieces exemplify the design and engineering prowess that have defined the BMW motorcycle tradition for almost a century. DIVPhotographer bio: Henry von Wartenberg was born in Mar del Plata, Argentina, in 1967 and has been a professional photographer since 1990. He worked as a photojournalist for Gente magazine for nine years before opening his own office near Buenos Aires in 1999. He has worked for many companies and publishers in Argentina and overseas, including Geographic Adventure magazine. With his publishing firm, Triple Ve Editores, he has also published several books of his photography: Red Deer-Stag Hunting in Argentina*m*, iMotos Clasicas en Argentina*i*, iThe Best of Argentine Polo*i*, and iBuenos Aires in Stone and Bronze*i*. Henry lives in Tigre, Argentina, with his wife and two daughters. You can visit his website at [www.henryvonwartenberg.com.div/divdiv](http://www.henryvonwartenberg.com.div/divdiv)Author bio:/divdiv/divdivPeter Gantriis is founder and president of RPM Research LLC, a market research and consulting firm that works with the world’s leading automotive and powersports manufacturers. Peter earned an MBA from the University of Minnesota. He is an avid motorcycle enthusiast and lives in Mahtomedi, Minnesota./div/divp***

***Whatever the vehicle--from classic hot rod to pick-up to chopper--a custom paint job sets it apart. But not all paint jobs are created equal, so how can you tell which style, technique, or scheme will suit the unique demands of your vehicle and budget? Before making a big investment--whether youâ€™re hiring a painter or doing the job yourself--turn to this book for a clear idea of what works and what doesnâ€™t. Drawing on years of experience running her own custom painting shop, JoAnn Bortles reviews the full array of options for paints, graphics, and effects. In an easygoing and engaging manner, and with photographs to illustrate her points, she explains the tools and techniques that apply in various paint schemes and shows what might work especially well in certain situations and for particular vehicles. Whether youâ€™re looking for inspiration, considering color combinations or graphics, or simply wondering what to look for in a local paint shop, this book will answer your questions--and help you get the custom paint job thatâ€™s perfect for you.***

*The annual Bike EXIF calendar is a roll call of the world's 2019s best custom bikes, shot by professional photographers. Printed on luxurious art paper, it measures a substantial 17 x 12 inches.*

*For the past fifty years and more, Harley-Davidson has been ruling some racing roosts. Its competition iron has always been significant, often supremely victorious and never without passion. To borrow a term from another scene, this is a book about "hog power."What were H-D's competition bikes? How did they fare? And who were the heroes who rode them? Allan Girdler, noted wordsmith, historian and straight-talking H-D enthusiast, digs deep to bring fresh perspective, technical analysis, and rider anecdotes to this substantial and fascinating story of America's most successful racing motorcycles. His "review" starts in the early 1930s, after the board tracks, after the overpowering success of the Wrecking Crew and its eight-valve twins, after the ear-splitting Pea Shooters, at the beginning of a new era of American racing organized by a reorganized AMA. A time ripe for a new style of Harley racer based loosely on production designs. Read of the XLR, CR, CRS, CRTT, KR7T, XR-750, XR1000, and many more. Learn about Len Andres, Bill Huber, Bart Markel, Jay Springsteen, Chris Carr, Scott Parker, Dick O'Brien, and other racing stars. This is an engaging, passionate story by acclaimed motorcycle and automobile writer, Allan Girdler. Allan is a former editor for Car Life, Cycle World, and Road & Track magazine. He has authored numerous books including Harley-Davidson Sportster and Harley-Davidson XR-750. Readers interested in related titles from Allan Girdler will also want to see: American Road Race Specials, 1934-70 (ISBN: 9781626549333), Harley Davidson Sportster (ISBN: 9781626549357), Harley-Davidson Xr-750 (ISBN: 9781626549340).*

*This title strengthens reading and comprehension skills and strategies. It is designed for guided, shared and independent reading. The first part of this book displays elements common to motorcycles. The second part highlights examples of different uses of motorcycles. There are full-color photographs, a fun facts page and a glossary.*

*Written by photography experts--including a Pulitzer-Prize winning National Geographic photographer--this full-color book is a must-have for amateur photographers serious about improving both the quality of their photographs and their proficiency in the digital darkroom. The book is the perfect combination of a technical treatise on digital imaging and an artistic exploration of light, composition, and form, allowing you to glean the essential techniques needed for digital photography without losing sight of the artistic and aesthetic aspects of the craft. Using an easy-to-follow approach, the authors explain the image conceptualization process through shooting, editing, and image correction to finished print. In addition, top photographers from a variety of disciplines offer real-world advice on how they use digital photography to create compelling images for high-profile magazine articles, advertising campaigns, and fine art prints.*

MOTOCOURSE 2020-2021 celebrates its 45th year of publication - and despite the World pandemic throwing the sport into chaos, what a year it was for motorcycle racing! In a thrilling MotoGP season, Marc Marquez and Honda

were expected to be the dominant force once more, but an accident in the opening round saw him side-lined for much of the season and left him with but a slim chance of retaining his MotoGP crown. Other riders stepped up in his absence and shared out victories. Ducati's Andrea Dovizioso, and Yamaha's trio of Maverick Vinales, Fabio Quartararo and Franco Morbidelli all took to the top step of the podium. The emergence of KTM as a race winning machine saw both Brad Binder and Miguel Oliveira join the list of first time winners, in a close fought battle for supremacy throughout the whole of the MotoGP field. Once again, Valentino Rossi defied the years to remain at the sharp end of the grid, whilst the Suzuki pair of Alex Rins and Joan Mir both looked equally capable of adding to the list of winners in an enthralling contest for the title. Editor Michael Scott provides a no-holds-barred assessment of all the aspects of a compelling season's action. MOTOCOURSE alone has full coverage of the support classes, Moto2 and Moto3, where Italian riders Luca Marini, Estea Bastinani, Marco Bezzecchi were contenders to clinch the Moto2 crown, whilst Albert Arenas, Ai Ogura and John McPhee hotly disputed the Moto3 title. In World Superbikes, Kawasaki's dominance was challenged by Ducati's Scott Redding, with Jonathan Rea looking to retain his championship title for the sixth successive year, ahead of the chasing pack including Alavaro Bautista, Chaz Davies and Yamaha's Michael van der Mark. No book covers the motorcycle racing world in as much detail as MOTOCOURSE, which, in addition to the two major world series covers The World Supersport Championship, The British Superbike Championship and the AMA USA Superbike series. Incredible value for money, with 304 large-format pages, bursting with over 450 stunning colour photographs from the world's finest photographers, MOTOCOURSE covers it all. No wonder MOTOCOURSE is regarded worldwide as 'The Bible of Motorcycle Racing'.

From early efforts of the '60s and '70s to the radical machines of today, Choppers and Custom Motorcycles profiles these rolling works of art with informative descriptions and vivid photography. Profiles of more than 70 fascinating choppers and customs

Two political strategists offer the tools to become successful in any field, and cover everything from how to present an argument and get the message across to how to compromise and handle negative publicity.

A British bomb disposal expert describes his tour of duty in Iraq, his team's perilous assignment to personally dismantle terrorist-planted explosives, and the effectiveness that made him the target of both Sunni and Shia terrorists.

*If you appreciate the beauty of the machine, the fantastic custom motorcycles featured on Bike EXIF are sure to please. The featured creations range from modern machines with fantastic lines and more carbon fiber than an F1 car to cleverly-modified vintage Japanese bikes turned into cafe racers with little more than hand-turned flat bars and paint. The art of the machine is what makes this calendar perfect for a motorcycle fan or gearhead of any stripe.*

*Classic Honda Motorcycles presents an overview of Honda motorcycles produced from 1958 through 1990, including iconic models such as the CB77 Super Hawk, CB92 Benly, Dream, CB750 and many others. Enthusiasts will find a bounty of useful and interesting information about which bikes are likely to suit an individual rider's needs, which models are most collectible and how to find parts for rare Honda motorcycles.*

*How to Build a Motorcycle leads you through all the key stages - from initially finding the right project for your skill level, to sourcing a base bike and safely taking on some full-on bike-building tasks. With clear, easy-to-follow instructions, proper advice and specially commissioned step-by-step illustrations throughout it is an ideal aid to getting your hands oily. Written by Gary Inman, the co-founder of independent motorcycle magazine Sideburn, and illustrated by Adi Gilbert who is best known for his bicycle and motorcycle drawings whose clients include Harley-Davidson, Guy Martin, Wired magazine, Sideburn magazine and Nike, this is a must-have for all motorcycle lovers. Read this book, even dip in and out where relevant. It makes sense, schedule some time, clear your mind, pull on some old clothes, grab your toolbox and get going. The chapters in How to Build a Motorcycle will tell you how to complete a huge variety of tasks that will allow even the greenest of novices to get their hands dirty and start modifying with purpose. If you belong to this camp, start with some of the low-input, high-reward jobs, such as fitting bars, swapping the rear shocks or wiring in a new tail light. Even though these require relatively little work, they'll transform the look of your bike, and completing them will fill you with confidence to undertake the more difficult jobs, such as fitting more modern front forks or even making your own frame. The book comes with a glossy 32-page section on finished bikes and is a reference and the perfect gift for all fans, from those who merely like to tinker, to riders taking on a full build.*

**This is the must-have guide for all amateur astronomers who double as makers, doers, tinkerers, problem-solvers, and inventors. In a world where an amateur astronomy habit can easily run into the many thousands of dollars, it is still possible for practitioners to get high-quality results and equipment on a budget by utilizing DIY techniques. Surprisingly, it's not that hard to modify existing equipment to get new and improved usability from older or outdated technology, creating an end result that can outshine the pricey higher-end tools. All it takes is some elbow grease, a creative and open mind and the help of Chung's hard-won knowledge on building and modifying telescopes and cameras. With this book, it is possible for readers to improve their craft, making their equipment more user friendly. The tools are at hand, and the advice on how to do it is here. Readers will discover a comprehensive presentation of astronomical projects that any amateur on any budget can replicate - projects that utilize leading edge technology and techniques sure to invigorate the experts and elevate the less experienced. As the "maker" community continues to expand, it has wonderful things to offer amateur astronomers with a willingness to get their hands dirty. Tweaking observing and imaging equipment so that it serves a custom purpose can take your observing options to the next level, while being fun to boot.**

**Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE**
Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples
RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective.
Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes:
A scientific framework for learning RF and microwaves easily and effectively
Fundamental RF and microwave concepts and their applications
The characterization of two-port networks at RF and microwaves using S-parameters
Use of the Smith Chart to simplify analysis of complex design problems
Key design considerations for microwave amplifiers: stability, gain, and noise
Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits
RF and Microwave Integrated Circuits (MICs)
Novel use of "live math" in circuit analysis and design
Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design.
Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more.
About the Web Site
The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

A bestseller for years,Farmall 2011boasts a collection of International Harvester fans' favorite classic Farmall tractors, from the Mogul 8-16 and F-12 to the great Super M, Super MD, McCormick-Deering 15-30, Farmall 200, Farmall H, Farmall 340 Diesel, Super C, International Model 560 High-Crop, Farmall B Wide Front, and International 2806. Including color photography of current restored machines.

In 1982, at the age of just twenty-three and halfway through her architecture studies, Elspeth Beard left her family and friends in London and set off on a 35,000-mile solo adventure around the world on her 1974 BMW R60/6. Reeling from a recent breakup and with only limited savings from her pub job, a tent, a few clothes and some tools, all packed on the back of her bike, she was determined to prove herself. She had ridden bikes since her teens and was well travelled. But nothing could prepare her for what lay ahead. When she returned to London nearly two and a half years later she was stoner lighter and decades wiser. She'd ridden through unforgiving landscapes and countries ravaged by war, witnessed civil uprisings that forced her to fake documents, and fended off sexual attacks, biker gangs and corrupt police convinced she was trafficking drugs. She'd survived life-threatening illnesses, personal loss and brutal accidents that had left permanent scars and a black hole in her memory. And she'd fallen in love with two very different men. In an age before email, the internet, mobile phones, satnavs and, in some parts of the world, readily available and reliable maps, Elspeth achieved something that would still seem remarkable today. Told with honesty and wit, this is the extraordinary and moving story of a unique and life-changing adventure.

### Supercars 2022

*It's another new year celebrating everything under the Sun, including the Moon, with The Old Farmer's Almanac, America's oldest continuously published periodical! Always timely, topical, and distinctively "useful, with a pleasant degree of humor," the Almanac has been beloved for centuries by people from all walks of life. As the nation's iconic calendar, the 2020 edition will forecast cultural, culinary, and other life-changing trends; preview notable astronomical events; provide time- and money-saving tips for gardeners of all varieties; set the hook for best fishing days; forecast traditionally 80 percent-accurate weather; and cover a range of related topics, including anniversaries, folklore, husbandry, home remedies, recipes, amusement, contests, and more--too much more to mention--all in the inimitable way it has done since 1792.*

*This book examines how business, the social sciences, science and technology will impact the future of ASEAN. Following the ASEAN VISION 2020, it analyses the issues faced by ASEAN countries, which are diverse, while also positioning ASEAN as a competitive entity through partnerships. On the 30th anniversary of ASEAN, all ASEAN leaders agreed to the establishment of the ASEAN VISION 2020, which delineates the formation of a peaceful, stable and dynamically developed region while maintaining a community of caring societies in Malaysia, Indonesia, Singapore, Brunei, Vietnam, Thailand, the Philippines, Myanmar, Laos and Cambodia. In keeping with this aspiration, Universiti Teknologi MARA Perlis took the initial steps to organise conferences and activities that highlight the role of the ASEAN region. The Second International Conference on the Future of ASEAN (ICoFA) 2017 was organised by the Office of Academic Affairs, Universiti Teknologi MARA Perlis, to promote more comprehensive integration among ASEAN members. This book, divided into two volumes, offers a useful guide for all those engaged in research on business, the social sciences, science and technology. It will also benefit researchers worldwide who want to gain more knowledge about ASEAN countries*

*Mood mapping simply involves plotting how you feel against your energy levels, to determine your current mood. Dr Liz Miller then gives you the tools you need to lift your low mood, so improving your mental health and wellbeing. Dr Miller developed this technique as a result of her own diagnosis of bipolar disorder (manic depression), and of overcoming it, leading her to seek ways to improve the mental health of others. This innovative book illustrates:
\* The Five Keys to Moods: learn to identify the physical or emotional factors that affect your moods
\* The Miller Mood Map: learn to visually map your mood to increase self-awareness
\* Practical ways to implement change to alleviate low mood
Mood mapping is an essential life skill; by giving an innovative perspective to your life, it enables you to be happier, calmer and to bring positivity to your own life and to those around you.
'A gloriously accessible read from a truly unique voice'
'Mary O'Hara, Guardian
'It's great to have such accessible and positive advice about our moods, which, after all, govern everything we do. I love the idea of MoodMapping'
Dr Phil Hammond
'Can help you find calm and take the edge off your anxieties'
Evening Standard
'MoodMapping is a fantastic tool for managing your mental health and taking control of your life'
Jonathan Naess, Founder of Stand to Reason*

*The motorcycle is back! Similar to the fresh contemporary scene that has established itself around bicycles in the last few years, the motorcycle is currently undergoing an aesthetic rebirth. A young subculture worldwide is discovering the motorcycle as an expression of its personality and creativity. The Ride explores motorcycle riding as it is meant to be: as a means of getting around with attitude, as an extension of one's own body, as an expression of personal freedom, but also as a significant challenge to technical expertise, craftsmanship, physics, discipline, and driving skill. In the motorcycle scene of 1960s Britain, it was frowned upon to drive a motorcycle as it was produced in a factory. Following in this historical tradition, The Ride focuses on those who are creating customized motorcycles that come as close to one's own vision of how pure riding should be as possible. For example, the creative young people who are buying old, wrecked bikes on eBay, removing everything but the motor and frame, and then rebuilding them in ways that are as radical and subversively creative as they are knowledgeable and respectful of tradition. The archetypes of the new motorcycles created in this way--classic board racers, bobbers, café racers, and choppers--may very well be 30-50 or even 80 years old, but what is made out of them is new, not retro. Decked out with state-of-the-art disk brakes, LED lights, gears, and drive components, these machines are more agile, faster, more radical, and therefore more fun than anything produced in the past. The Ride features transformations such as a boring plastic motorcycle made in Japan in the 1990s turned into a slick café racer with an Italian feel, a soulless neo-baroque machine turned into an in-your-face scrambler, or an old find from grandpa's barn turned into a absolutely comfort-free hardtail with the coolest of sounds. The book also presents small, local custom motorcycle workshops from around the globe that have established themselves with sought-after products that inspire other builders worldwide. It features extensive profiles of pioneers including Walt Siegl, Wrenchmonkees, DP Customs, Cole Foster, Deus, Shinya Kimura, Ian Barry, and Uwe Ehinger and their very different ideas of how a motorcycle should be. The unique bikes created in their garages--sometimes made-to-order, sometimes in a limited series--are often technically superior, better thought-out, and simply more radical than those produced by larger manufacturers who need to appeal to a broader audience. The spirit of this young motorcycle scene is reminiscent of that of current bike frame builders or even today's new food subculture. It's about making, transforming, or designing something with your own hands. In this case, something that will get a person from A to B, that makes noise, smells, vibrates, and comes to life. What could be more exciting, more analog, and more satisfying?*

**A long time ago, the world's most powerful empire was the Muslim empire. It was a nation full of scholars, doctors, scientists, ethical businessmen, and genius inventors. The early Muslim nation was founded by confident individuals, who trusted the Divine plan, using their God-given talents to make this world a better place. But somewhere down the line, things changed. The Muslim Nation declined until it became a shell of its former self. And then it broke into many fragmented pieces. This was followed by a generation of followers and imitators, low in confidence and self-esteem, feeling inferior to others, following and never daring to lead. The Muslim nation lost its confidence, but we can get it back by returning to our roots and going back to that which made the early generations so successful.**

**A Good Morning America Book Club Pick! • A work-from-home comedy where WFH meets WTF. "An absurd, hilarious romp through the haunted house of late-stage capitalism."—Carmen María Machado, author of In the Dream House Told entirely through clever and captivating Slack messages, this irresistible, relatable satire of both virtual work and contemporary life is The Office for a new world. Gerald, a mid-level employee of a New York–based public relations firm has been uploaded into the company’s internal Slack channels—at least his consciousness has. His colleagues assume it’s an elaborate gag to exploit the new work-from home policy, but now that Gerald’s productivity is through the roof, his bosses are only too happy to let him work from . . . wherever he says he is. Faced with the looming abyss of a disembodied life online, Gerald enlists his co-worker Pradeep to help him escape, and to find out what happened to his body. But the longer Gerald stays in the void, the more alluring and absurd his reality becomes. Meanwhile, Gerald’s colleagues have PR catastrophes of their own to handle in the real world. Their biggest client, a high-end dog food company, is in the midst of recalling a bad batch of food that’s allegedly poisoning Pomeranians nationwide. And their CEO suspects someone is sabotaging his office furniture. And if Gerald gets to work from home all the time, why can’t everyone? Is true love possible between two people, when one is just a line of text in an app? And what in the hell does the :dusty-stick: emoji mean? In a time when office paranoia and politics have followed us home, Calvin Kasulke is here to capture the surprising, absurd, and fully-relatable factors attacking our collective sanity...and give us hope that we can still find a human connection.**

**With one of the world’s most scenic backdrops as a brilliant seascape for passengers, the Ocean Shore Railroad skirted northern California’s coastline to service communities south of San Francisco for the first two decades of the 20th century. As impressive as it was idealistic, the line was held prisoner by natural forces that eventually took too much of a toll to keep its striking route churning. Today’s Highway 1 traces the passage once paved with tracks, and points to the few remnants of one of California’s most well-known excursion lines.**

**The annual Bike EXIF calendar is a roll call of the world’s best custom bikes, shot by professional photographers. Printed on luxurious art paper, it measures a substantial 17 x 12 inches.**
